## 1. Overview

### 1.1 Project Description

Samsung Renewable Energy and Pattern Energy (hereinafter referred to as the “Proponent”) are jointly proposing to develop the South Kent Wind Project, a 270 MW wind energy project (the “Project”), consisting of approximately 124 operational wind turbines, as well as supporting infrastructure including access roads, construction and turnaround areas, and buried and/or overhead collection/transmission lines. The collection/transmission line will include approximately 34 km of 239 kV transmission line and two (2) substations to enable step-up of the voltage from 34.5 kV to 230 kV to connect to the Chatham Switching Station (SS). The project area is located in the Municipality of Chatham-Kent in southwestern Ontario. The Project is located south of Highway 401 between the towns of Tilbury and Ridgetown to the west and east, respectively.

Ontario Regulation (O. Reg.) 359/09 – *Renewable Energy Approvals Under Part V.0.1 of the Act*, made under the *Environmental Protection Act* identifies the Renewable Energy Approval (REA) requirements for renewable energy projects in Ontario. As per Section 4 of O. Reg. 359/09, wind facilities with a nameplate capacity greater than 50 kilowatts (kW) and a sound power level of greater than 102 dBA are classified as Class 4 wind facilities and do require a REA.

Consultation is a requirement of the REA process as stipulated by Sections 14, 15, 16, 17 and 18 of the REA Regulation. In addition, the Ministry of the Environment (MOE) has prepared draft guidelines called “*Technical Bulletin Five - Guidance for Preparing the Consultation Report*” (MOE, 2010) outlining the Ministry’s expectations and guidelines for appropriate consultation, including the development of a Consultation Report as part of the REA application package. This Consultation Report has been prepared in accordance with the requirements of the REA Regulation and the MOE Technical Bulletin.

The “*Technical Guide to Renewable Energy Approval*” (MOE, 2011a) outlines further recommendations regarding the consultation process. The information provided in this technical guide was incorporated into this report. Further, an additional guidance document titled “*Draft Aboriginal Consultation Guide for preparing a Renewable Energy Approval (REA) Application*” (MOE, 2011b) provided additional information and guidance on Aboriginal consultation. The information presented in this guide is incorporated into this report, where required.

Table 1 in the REA Regulation requires the Consultation Report to include:

- a summary of communications with any members of the public, Aboriginal communities, municipalities, local road boards and Local Services Boards regarding the Project
- evidence that the information required to be distributed to Aboriginal communities under Subsection 17 (1) was distributed
- any information provided by an Aboriginal community in response to a request made under paragraph 4 of subsection 17 (1)
- evidence that a consultation form was distributed in accordance with subsection 18 (1)

- the consultation form distributed under subsection 18 (1), if any part of it has been completed by a municipality, local roads board or Local Services Board
- a description of whether and how:
  - ◆ comments from the members of the public, Aboriginal communities, municipalities, local roads boards and Local Service Boards were considered by the person who is engaging in the project
  - ◆ the documents that were made available under subsection 16(5) were amended after the final public meeting was held
  - ◆ the proposal to engage in the project was altered in response to comments made from members of the public, Aboriginal communities, municipalities, local roads boards and Local Service Boards.

The legislative requirements have been documented within this Consultation Report. The information as it relates to legislative requirements is in a concordance table, Table 1.1.

## **1.2 The Consultation Process**

Pursuant to O. Reg. 359/09, consultation conducted for the Project has included adjacent landowners, government agencies (e.g., Ontario Ministry of Natural Resources (MNR), MOE, Lower Thames Valley Conservation Authority (LTVCA), etc), local municipality (Municipality of Chatham Kent– single tier), Aboriginal communities, and the public. The objectives of the consultation process have been to obtain information about the Project location, identify issues and potential concerns, and to identify potential impacts associated with the Project. As well, the consultation process has been used to identify specific stakeholders as a means to establish open and meaningful dialogue between the project Proponent and the stakeholders.

Local road boards and Local Service Boards are not present in the Project area. Therefore, no consultation is possible with these bodies for the Project.

The following report sections provide:

- an outline and description of all consultation activities held for this Project for the public, government agencies (including the municipality) and Aboriginal communities
- a summary of comments from public, government agencies and Aboriginal communities
- a summary of how these comments were incorporated into the REA process.

Table 1.1 Legislative Requirements – Concordance Table

OREG Section	Requirements	Location within the Consultation Report
	A summary of communications with public, Aboriginal communities, and municipalities.	Communications with the public are summarized in Table 2.1. Communications with Aboriginal communities are summarized in Table 4.2 and provided in Appendixes I and J. Communications with municipalities and other public Agencies are summarized in Table 3.1 and found in Appendix G.
17(1)	Evidence that the information required to be distributed to Aboriginal communities under Subsection 17 (1) was distributed.	Section 4
17(1)	Any information provided by an Aboriginal community in response to a request made under paragraph 4 of subsection 17 (1).	Section 4 and in Appendix J
18(1)	Evidence that a consultation form was distributed in accordance with subsection 18 (1).	Section 3
18(1)	The consultation form distributed under subsection 18 (1), if any part of it has been completed by a municipality, location roads board or Local Service Board.	Appendix G
16(5)	A description of whether and how: comments from the members of the public, Aboriginal communities, municipalities, local roads boards and Local Service Boards were considered by the person who is engaging in the project; the documents that were made available under subsection 16 (5) were amended after the final public meeting was held; and the proposal to engage in the project was altered in response to comments made from members of the public, Aboriginal communities, municipalities, local roads boards and Local Service Boards.	Table 2.1, Table 3.1 and Table 4.2

## 2. Consultation with the Public

### 2.1 Methods of Consultation

The methods of consultation for the Project include the requirements identified in O.Reg. 359/09, as well additional measures deemed necessary to ensure adequate consultation. A wide variety of consultation methods increases the amount of public awareness and participation. The methods of consultation for this Project included:

- Notice of Proposal to Engage in a Renewable Energy Project/Notice of Public Meeting
  - ♦ Direct mail to all identified landowners within 120 meters of the Project location as per O.Reg. 359/09. However, all landowners with the Project area as identified in Figure 2.1 were sent the Notice. A full list of landowners is provided in Appendix A. A total of two thousand four hundred and sixty seven (2467) notices were issued on October 15, 2010 in advance of the first public meeting.
  - ♦ Postings on Thursday, October 21, 2010 and Thursday October 28, 2010 in the *Chatham Daily News* which has a general circulation in the Project area. These notices are included in Appendix B.
- Notice of Final Public Meeting - September 24, 2011
  - ♦ Direct mail to all identified landowners within the Project area (a full list of landowners is provided in Appendix A). A total of 2,737 notices were issued on July 21, 2011, for the final public meeting.
  - ♦ Postings on Tuesday July 26, 2011, and Tuesday August 23, 2011 in the *Chatham Daily News*. These notices are included in Appendix B.
- Notice of Final Public Meeting - November 12, 2011
  - ♦ Direct mail to all identified landowners within the Project area (a full list of landowners is provided in Appendix A). A total of approximately 2, 730 notices were issued on September 6, 2011, for the final public meeting.
  - ♦ Postings on Saturday September 10, 2011, and Saturday October 8, 2011 in the *Chatham Daily News*. These notices are included in Appendix B.
- Notice of Public Meeting – May 12, 2012
  - Direct mail to all identified landowners within the Project area (a full list of landowners is provided in Appendix A). A total of approximately 2, 730 notices were issued on April 28, 2012, for the public meeting.
  - Postings on Saturday April 28, 2012, and Saturday May 5, 2012 in the *Chatham Daily News*. These notices are included in Appendix B.

- A website ([www.southkentwind.ca](http://www.southkentwind.ca)) with Project and proponent information, Notices and Project documents posted as required.
- Hard copies of the Project Description Report and Project documents available for review at the Chatham Kent Civic Centre, Tilbury Library Branch, Blenheim Library Branch and the South Kent Wind Office in Blenheim.
- Five public meetings: November 22, 2010, November 23, 2010, September 24, 2011, November 12, 2011 and May 12, 2012.
- Means to obtain comments on the Project by having comment sheets available at all public meetings and advertisement of phone numbers, fax and emails for the public to make comments.
- One hardcopy of Draft Project Description Report available at the first public meetings and all the Draft REA project documents available for review at all subsequent public meetings.
- Handouts (printed copies of public meeting boards, 1 page info sheet) available at the first public meetings.
- Handouts (1 page info sheet) available at the September 24, 2011, November 12, 2011 and May 12, 2012 public meetings.
- Presentations to community groups to answer questions about the project and obtain community input.
- Local office in the project area to make project materials and information available and to consult with interested members of the public.

Through these methods, information, questions, comments, feedback and concerns regarding the Project were obtained and then utilized and addressed.

## 2.2 List of Stakeholders

Initially, a list of property owners within the Project area as shown in Figure 2.1 which is greater than the required 550 m of the Project location was determined.

As correspondence was received from members of the public and other organizations regarding the Project, newly identified names and contact details were added to the public mailing list for the Project. For example, during the first public meeting, if any attendees provided their mailing address on the sign-in sheet, this address was added to the mailing list. Project information (e.g., notification of an upcoming public meeting) was distributed to the identified property owners or interested parties.

Appendix A contains a copy of the stakeholder list that was used for distribution of the Notice of Proposal to Engage in a Renewable Energy Project/Notice of Public Meeting and the expanded stakeholder list that was used for distribution of the Notices of Final Public Meeting.

## 2.3 Details and Results of Consultation

The following sections provide information on the details of the consultation completed and the results.

It should be noted that between the formalized consultation activities, all stakeholders were encouraged to provide comments or questions via telephone, fax, email or mail at any time during the consultation process. Stakeholders were also encouraged to provide any concerns early in the process. Where relevant, a response was provided for each question or comment received, either directly (i.e., at the public meeting or community group meetings) or through the same medium through which the submission was made. All comments and concerns, responses, and the impact to the Project are provided in this report.

### **2.3.1 First Public Meetings and Notice**

The Notice of Proposal to Engage in a Renewable Energy Project and Public Meeting was published 30 days prior to the event in *Chatham Daily News* on Thursday, October 21, 2010 and again on Thursday October 28, 2010. These published notices are included in Appendix B. This local paper has general circulation in the area around the Project area. The notice and a cover letter were also sent by regular mail to all members of the stakeholder list, including all identified landowners within the Project area (greater than 120 m of the Project location). A total of two thousand four hundred and sixty seven (2,467) stakeholders were mailed a notification on Friday October 15, 2010. A copy of the Notice and a sample letter are contained in Appendix B.

A copy of the first Notice along with the draft Project Description Report (PDR) were posted on the Project website, [www.southkentwind.com](http://www.southkentwind.com), on October 15, 2010.

There were two first public meetings, the first was held on Monday November 22, 2010 at the Blenheim Golf Club, 439 Chatham Street South, Blenheim, On from 5:00 pm to 9:00 pm. An additional public meeting was held on Tuesday November 23, 2010 at the Tilbury Arena, 55 Bond Street, Tilbury, Ontario from 5:00 pm to 9:00 pm. These first public meetings were held with a purpose to:

- introduce the Proponent and the Project to the community
- identify the Project contacts and avenues for comment or question submission
- solicit feedback on the Draft PDR.

A total of 184 people signed in at the first public meeting located at Blenheim Golf Club and an additional 83 people signed in at the Tilbury Arena. All individuals that provided contact information were added to the Project stakeholder list for future communications.

The draft PDR was made available for public review on the Project's website, and at the Municipality of Chatham Kent Civic Centre, 30-days prior to the meeting. Paper copies of the draft PDR were made available for review at the events. Further information was provided on the display boards presented at the public meetings. Appendix C contains a copy of the display boards, comment sheet that was distributed to attendees, completed sign in sheets and one-page handout provided at the meetings.

During the public meetings, questions were answered by the Proponent and BowArk representatives (e.g., typically Project specific questions) or by Hatch, and Natural Resource Solution Inc. (NRSI)(e.g., typically REA process or environmental impact questions). BowArk has been contracted by the Proponent to assist in the development and acquisition of the properties, including liaison with the

participating property owners. Hatch has been contracted by the Proponent to assist them in all aspects of the REA process. NRSI has been sub-contracted by Hatch to complete the natural environmental aspects of the REA process.

Feedback obtained from the public meetings was intended to provide direction for the scope of the assessment and ensure that local issues would be addressed as appropriate. Comment sheets were offered at the public meetings to all attendees as a means to obtain and record comments and concerns as well as pertinent background information about the Project location.

Twenty five (25) comment sheets were obtained at the public meetings and two written correspondences from members of the public were also provided at the public meetings. Appendix C contains a copy of the comment sheets and written correspondences. Comments are identified in Table 2.1. The response from the Proponent and the way in which the REA reports or the Project were altered to address the comment (where applicable) are also identified in Table 2.1.

### **2.3.2 Final Public Meeting and Notice - September 24, 2011**

The Notice of Final Public Meeting was published 60 days prior to the event in the *Chatham Daily News* on Tuesday July 26, 2011, and again on Tuesday August 23, 2011. These notices are included in Appendix B. Notices were sent to stakeholders by regular mail accompanied by a covering letter. The mailing list included any other individuals who provided their mailing information since the first public meeting. A copy of this Notice and a sample letter are provided in Appendix B.

The purpose of the public meeting was to solicit feedback on the content and the findings of the draft supporting documents prepared for the Project. Draft copies of the Project documents required to be prepared under the REA process were made available for public review starting on Tuesday July 26, 2011, at the Chatham Kent Civic Centre, Tilbury Library Branch, Blenheim Library Branch and the South Kent Wind Office in Blenheim, and on the Project website. Hard copies were also available for review at the final public meeting. These Project documents included the:

- Executive Summary (including summaries of the following documents)
- Project Description Report
- Construction Plan Report
- Design and Operations Report
- Decommissioning Plan Report
- Wind Turbine Specifications Report
- Noise Assessment Study
- Stage 1 and 2 Archaeological Assessment Reports
- Water Body Assessment Reports (i.e. Water Body Records Review, Water Body Site Investigation and Water Body Environmental Impact Study)
- Natural Heritage Assessment Reports (i.e. Natural Heritage Records Review, Natural Heritage Site Investigation, Natural Heritage Evaluation of Significance and Natural Heritage Environmental Impact Study).

A copy of the Notice of Final Public Meeting, drafts of the Project supporting documents and summaries were posted on the Project website at the same time as the notice was published.

The public meeting was held on Saturday September 24, 2011, from 2:00 pm to 5:00 pm at the Tilbury Memorial Area, 55 Bond Street, Tilbury, Ontario, with a purpose to:

- provide the community with detailed information about the Project
- answer any questions about the Project
- obtain any comments or concerns with respect to the Project.

A total of 63 people signed in at the public meeting.

Information provided to all attendees at the public meeting included a one-page handout summary and a comment sheet to be completed and returned. Copies of this information can be found in Appendix D. Display boards provided general information on the proponent and Project, including the main concerns noted by attendees at the first public meeting and specific information provided in the Project supporting documents. Copies of the display boards are found in Appendix D.

Questions at the public meeting were answered by representatives from the Proponent, BowArk, Hatch, NRSI and Intrinsik. The Proponent has contracted Intrinsik to provide assistance related to human health issues of wind projects. Eight (8) comment sheets were received during the final public meeting. Project representatives also made notes regarding verbal discussions that were held with attendees at the final public meeting. The summary of the verbal discussions held at the meeting and topics/questions/concerns discussed are paraphrased in Table 2.1. The response from Proponents and the way in which the REA reports or the Project were altered to address the comment (where applicable) are also identified in Table 2.1.

### **2.3.3 Final Public Meeting and Notice - November 12, 2011**

The Notice of Final Public Meeting was published 60 days prior to the event in the *Chatham Daily News* on Saturday September 10, 2011, and again on Saturday October 8, 2011. These notices are included in Appendix B. Notices were sent to stakeholders by regular mail accompanied by a covering letter. The mailing list included any other individuals who provided their mailing information since the first public meeting. A copy of this Notice and a sample letter are provided in Appendix B.

The purpose of this public meeting was to solicit feedback on the content and the findings of the draft supporting documents prepared for the Project. Draft copies of supporting documents that had been revised since the July 26, 2011, were made available for public review, along with the remainder of the Project documents that had been previously provided, on Wednesday September 7, 2011, at the Chatham Kent Civic Centre, Tilbury Library Branch, Blenheim Library Branch and the South Kent Wind Office in Blenheim, and on the Project website. Hard copies were also available for review at this additional final public meeting. The Project documents that were available for review included the (documents that were revised and issued in September 2011 are indicated with an \*):

- \*Executive Summary (including summaries of the following documents)
- Project Description Report

- Construction Plan Report
- \*Design and Operations Report
- Decommissioning Plan Report
- Wind Turbine Specifications Report
- Noise Assessment Study
- Stage 1 Archaeological Assessment Report
- \*Stage 2 Archaeological Assessment Report
- Water Body Assessment Reports (i.e. Water Body Records Review, Water Body Site Investigation and Water Body Environmental Impact Study)
- \*Natural Heritage Assessment Reports (i.e. Natural Heritage Records Review, Natural Heritage Site Investigation, Natural Heritage Evaluation of Significance and Natural Heritage Environmental Impact Study).

A copy of the Notice of Final Public Meeting, drafts of the revised Project supporting documents and summaries were posted on the Project website at the same time as the notice was published.

The public meeting was held on Saturday November 12, 2011, from 2:00 pm to 5:00 pm at the Knights of Columbus Hall, 22 Dupuis Ave., Tilbury, Ontario, with a purpose to:

- provide the community with detailed information about the Project
- answer any questions about the Project
- obtain any comments or concerns with respect to the Project.

A total of 32 people signed in at the public meeting.

Information provided to all attendees at the public meeting included a one-page handout summary and a comment sheet to be completed and returned. Copies of this information can be found in Appendix D. The display boards provided general information on the proponent and Project, including the main concerns noted by attendees at the first public meeting and specific information provided in the Project supporting documents. Copies of the display boards are found in Appendix D.

Questions at the final public meeting were answered by representatives from the Proponent, BowArk, Hatch, NRSI and Intrinsik. Four (4) comment sheets were received during the public meeting. Project representatives also made notes regarding verbal discussions that were held with attendees at the public meeting. The summary of the verbal discussions held at the meeting and topics/questions/concerns discussed are paraphrased in Table 2.1. The response from Proponents and the way in which the REA reports or the Project were altered to address the comment (where applicable) are also identified in Table 2.1.

#### **2.3.4 Public Meeting and Notice – May 12, 2012**

The Notice of Public Meeting was published prior to the event in the *Chatham Daily News* on Saturday April 28, 2012 and again on Saturday May 5, 2012. Notices were sent to stakeholders by regular mail accompanied by a cover letter on April 28, 2012. The mailing list included any other individuals who provided their mailing information since the first public meeting. A copy of this Notice and a sample letter are provided in Appendix B.

The purpose of this public meeting was to provide information on the Project changes. Revised draft copies of supporting documents that had been revised since the September 7, 2011, were made available for public review, on Friday May 4, 2012, at the South Kent Wind Office in Blenheim, and on the Project website. Hard copies were also provided to the Chatham-Kent Civic Centre, Blenheim Public Library and Tilbury Public Library on May 3, 2012 for public review. Additionally, hard copies were also available for review at this public meeting. The Project documents that were available for public review included the:

- Executive Summary (including summaries of the following documents)
- Project Description Report
- Construction Plan Report
- Design and Operations Report
- Decommissioning Plan Report
- Turbine Specification Report
- Noise Assessment Study
- Stage 2 Property Assessment Report (Archaeology))
- Water Body Assessment Reports (i.e., Water Body Records Review, Water Body Site Investigation and Water Body Environmental Impact Study)
- Natural Heritage Assessment Reports (i.e., Natural Heritage Records Review, Natural Heritage Site Investigation, Natural Heritage Evaluation of Significance and Natural Heritage Environmental Impact Study).
- Heritage Assessment Report

The public meeting was held on Saturday May 12, 2012, from 2:00 p.m. to 5:00 p.m. at the Blenheim Golf Club, Chatham Street South, Blenheim, Ontario, with a purpose to:

- provide the community with detailed information about the Project changes
- answer any questions about the Project
- obtain any comments or concerns with respect to the Project.

A total of 87 people signed in at the public meeting.

Information provided to all attendees at the public meeting included a one-page handout summary and a comment sheet to be completed and returned. Copies of this information can be found in

Appendix D. The display boards provided general information on the proponent and Project, including the main concerns noted by attendees at the previous public meetings and specific information provided in the Project supporting documents. Copies of the display boards were provided to the public and are found in Appendix D.

Questions at the final public meeting were answered by representatives from the Proponent, BowArk, Hatch, NRSI and Intrinsik. Five (5) comment sheets were received during the public meeting. Project representatives also made notes regarding verbal discussions that were held with attendees at the public meeting. The summary of the verbal discussions held at the meeting and topics/questions/concerns discussed are paraphrased in Table 2.1. The response from Proponents and the way in which the REA reports or the Project were altered to address the comment (where applicable) are also identified in Table 2.1.

### **2.3.5 Other Public Consultation**

The public was encouraged to communicate with the representatives from the Proponent, BowArk and Hatch outside of the public meetings via any of the following forms of communication:

- individual stakeholder meetings
- group stakeholder meetings
- project booths at community events in the project area
- email correspondence through [southkentwind@patternenergy.com](mailto:southkentwind@patternenergy.com) and through Project representatives
- phone calls directly to the company offices, including toll free line, and directly with Project representatives
- mail.

Numerous emails were received from members of the public asking for wind turbines on their property or potential employment/business opportunities. A total of thirty (30) emails/letters/telephone calls/walk-in questions to the Project Office (in Blenheim) have been received from the public throughout the duration of the consultation process to provide comments/concerns/questions. Letters and telephone calls are contained in Appendix K.

Pattern held two (2) Project landowner dinners (for Project participants) on Monday July 18, 2011 and Tuesday July 19, 2011 to provide an update regarding Project status and to respond to questions. In addition to Project landowners, municipal officials were also invited to attend. A presentation during dinner was followed by an opportunity for questions. Council member Byron Flueker attended the Tilbury event and Tomo Matesic of Chatham-Kent Energy attended both events. Appendix E contains a copy of the presentation.

Table 2.2 provides the details of the additional consultation completed with the public, stakeholders and the community.

**Table 2.1 Additional Consultation Completed**

<b>Date</b>	<b>Meeting Description</b>	<b>Notes/Comments</b>
Tuesday, June 22, 2010	Presentation to community and business leaders in Chatham, arranged by Stuart McFadden with the Economic Development Office	Introduced the project team and gave presentation on the Project
Wednesday, June 23, 2010	Meeting with Executive Director of the Chatham-Kent Chamber of Commerce	
Thursday, June 24, 2010	Meeting with Fannie Vavoulis of the YMCA	
Saturday, January 29, 2011	Heart & Stoke Foundation's Simply Red Gala	Met with event attendees and shared information about the project, listened to opinions about wind energy projects
Tuesday, April 26, 2011	Presentation to Sunrise Rotary Club	
Tuesday, April 26, 2011	Presentation to Tilbury Rotary Club	
Wednesday, April 27, 2011	Meeting with John Lawrence of the YMCA	
Wednesday, April 27, 2011	Meeting with Barry Fraser	Concerned about stray voltage
Tuesday, May 10, 2011	Meeting with the Community Task Force	
Wednesday, May 18, 2011	Presentation to the Chatham Kent Association of Realtors	
Tuesday, June 14, 2011	Presentation to Blenheim Rotary Club	
Wednesday, June 15, 2011	Presentation to the CK Rotary Club	
Wednesday, June 15, 2011	Meeting with the Chair of the St. Joseph Hospital and Executive Director of the St. Andrew's Residence	
June 24 - 26, 2011	Booth at the Tilbury Fun Fest	
July 14-15-16, 2011	Booth at Blenheim Cherry Festival	
Monday, July 18, 2011	Blenheim Project Landowner dinner	
Tuesday, July 19, 2011	Tilbury Project Landowner Dinner	
Wednesday, Sept. 21, 2011	Presentation to the Canadian Association of Farm Advisors	
Wednesday, Sept. 21, 2011	Meeting with the Executive Director of the Chatham Kent Chamber of Commerce	
Friday, Sept. 23, 2011	Chatham Hospice meeting	
Friday, Sept. 23, 2011	Lunch meeting - Tour Ridgeway Medical Centre	

During late Fall 2011, Winter 2012 and early Spring 2012, Project landowners (Project participants) have been consulted on proposed Project modifications related to their property. Discussions have taken place to further explain the reasoning behind the selection of sites for wind turbines and substations as it relates to the requirements of O. Reg 359/09. Furthermore, consultation has been ongoing from the beginning of January 2012. The Project landowners have expressed preferences for the location of the Project components on their property. The consultations have resulted in agreed upon Project modifications.

## **2.4 Public Comments and Concerns**

Comments and/or concerns were obtained from the public (e.g., comment sheets, emails, letters, etc) during the Project consultation process. These letters are contained in Appendix K. The Project has responded to and taken action to concerns in a multitude of ways. The responses are provided in Table 2.1. Where applicable, the Project response also provides reference to where more detail can be found in the Project documents prepared under the REA Process. Additionally, any changes to the Project documents and/or to the Project made in response to public comments/concerns (where applicable) are included in Table 2.1.

During the public meetings, numerous positive and supporting comments were received for the Project. Please see Appendix D which contains the Comment Sheets.

**Table 2.2 Summary of Public Comments and Responses**

Comment or Concern	Response	Amendments to Project or Project Reports
<b>Construction, Decommissioning &amp; Restoration/Re-vegetation</b>		
<u>Comment From September 24, 2011 Final Public Meeting</u> "Poles are a hazard for farm equipment and help (workers). Over head lines we're not used to are a real hazard and danger to people not used to them put there after all these years."	The Proponent is examining putting as much of the collector lines underground as possible. During further detailed design, this will be confirmed.	Possible, to be confirmed at a later date.
<u>Comment prior to September 24, 2011 Final Public Meeting (Expressed at Local Project Office)</u> I can see that it is an overhead collector and I was told that these lines would be buried.	The collector system will be a combination of above ground and buried cables. Segments of the collector system to be buried will be determined during the detailed engineering and design stage of the Project.	n/a
<u>Comment prior to September 24, 2011 Final Public Meeting (Expressed at Local Project Office)</u> There is a collector line going down our road and I have a row of trees. I declined having a turbine and so did both my neighbours. Now you have a line running right down this road. Why were we not informed? The municipality sold us out and there is nothing we can do.	The Municipality of Chatham-Kent will allow collector lines to be routed along public municipal road right of ways. The Draft Site Plan, which includes the proposed routing of the collector system was released to the public on July 26 <sup>th</sup> and can be viewed at <a href="http://www.southkentwind.ca">www.southkentwind.ca</a> .	n/a
<u>Comment prior to September 24, 2011 Final Public Meeting (Expressed at Local Project Office)</u> How wide are these access roads?	During construction, access road width will not exceed 12 meters in order to accommodate delivery of turbines components. During operation, the access roads will not exceed five (5) meters in width.	n/a
<u>Comment prior to September 24, 2011 Final Public Meeting (Expressed at Local Project Office)</u> What is the height and spacing of the poles? There are going to be things in the way like; laneways, old stand trees, drainage ditches.	Collector lines will be located on private land only where the Proponent has consulted with the landowner. All other collector lines will be routed along public municipal road right of ways. The exact routing, height and spacing of the collector system will be finalized during the detailed engineering and design stage. Factors such as road right-of-way width, tiling, drains and vegetation will be considered at this time.	n/a
<u>Comment From May 12, 2012 Public Meeting</u> What is the "Project Area"?	Project area refers to the Project location and areas within 120 m.	n/a
<u>Comment From May 12, 2012 Public Meeting</u> Will they tear them down if they're inefficient? Will they decommission then?	The Project is obligated under its power purchase agreement and Renewable Energy Approval to decommission the turbines at the end of their useful lives. Reference is made to the Decommissioning Report.	

Comment or Concern	Response	Amendments to Project or Project Reports
<b>Groundwater, Surface Water and Drainage</b>		
<u>Comment From November 22, 2010 First Public Meeting:</u> “[impacts] to water quality and quantity or hydrology”	Impacts to water quality and quantity or hydrology is discussed in the Water Body Environmental Impact Study (NRSI, 2011).	n/a
<u>Comment prior to September 24, 2011 Final Public Meeting</u> (Expressed at Local Project Office) What will happen to our drainage tiles during and after construction?  Are they going to build bridges over the drainage ditches?	During detailed design of the Project each site will be examined for potential drainage issues and designed and constructed so that the current drainage will be maintained. Further contact with the properties owners will be maintained to ensure that these requirements are met.	n/a
<u>Comment From September 24, 2011 Final Public Meeting</u> “P121- cutting road will cut off surface and subsurface drainage”  “close to municipal drains”	During detailed design of the Project each site will be examined for potential drainage issues and designed and constructed so that the current drainage will be maintained. Further contact with the properties owners will be maintained to ensure that these requirements are met.	n/a
<u>Comment From September 24, 2011 Final Public Meeting</u> “close to municipal drains”	The Project components are located as far away from municipal drains as possible. Further work is being completed for the crossing of the drains as per Municipality of Chatham Kent requirements.	n/a
<u>Comment From November 12, 2011 Final Public Meeting</u> When does construction start? Where will be the home base?  Comment From May 12, 2012 Public Meeting What is construction schedule?	Project is currently scheduled for start of construction in Spring 2012. The Proponent has opened a Project office in Blenheim, Ontario.	n/a
<u>Comment From May 12, 2012 Final Public Meeting</u> “NRSI has new waterway marked on farm that is not there”	Detailed site visits verified all watercourse based on definition of O.Reg. 359/09. Field verification will take place just prior to construction.	n/a
<b>Health, Safety and Security</b>		
<u>Comment From November 22, 2010 First Public Meeting</u> “What impact do the red lights on the turbines have on the health of individuals since there are studies out that “prove” that red lights at night are detrimental to sleep patterns?”  <u>Comment prior to September 24, 2011 Final Public Meeting</u> (Expressed at Local Project Office) The red lights are blinking and they are so bright you can’t sleep.	Upon a literature search of publications, we have not found any studies related to the impacts of red lights on sleeping patterns. However, the Proponent is investigating methods to reduce the project’s lighting impact, including using lighting shields and radar technology.	n/a

Comment or Concern	Response	Amendments to Project or Project Reports
They are an eyesore to the landscape.		
<p>Comment prior to September 24, 2011 Final Public Meeting (Expressed at Local Project Office)</p> <p>Why aren't you studying the health effects before you subject us to this risk?</p>	<p>The Chief Medical Officer of Health in Ontario released a report in 2010 title The Potential Health Effects of Wind Turbines. The review concludes that "the scientific evidence available to date does not demonstrate a direct causal link between wind turbine noise and adverse health effects". (CMOH, 2010).</p>	n/a
<p>Comment From November 12, 2011 Final Public Meeting</p> <p>We live near another wind Project and believe that there are health impacts from wind turbines. We believe that this may be from the low frequency noise. Our whole family is experiencing vertigo and nausea.</p> <p>Comment From May 12, 2012 Final Public Meeting</p> <p>"What will be the impact of low frequency noise. I am aware of the mitigation that natural gas companies must do at their compressor stations due to low frequency noise. I am also aware of the extent of discomfort coming form low frequency hum of Zug Island. I want the assurance that if I have a concern, I will not have to fight so hard to maintain my right to health as others who live near existing turbine farms"</p>	<p>(The Chief Medical Officer of Health from Ontario (2010) has stated that "Low frequency sound and infrasound from current generation upwind model turbines are well below the pressure sound levels at which known health effects occur". Recently, O'Neal et al. (2010) published a study where low frequency sound was measured outside and inside nearby homes (305 m and 457 m) from the Horse Hollow Wind Farm in Taylor and Nolan Counties, Texas, where two types of turbines are operating: GE 1.5 MW turbines and Siemens 2.3 MW turbines (similar to the models proposed for this project). The authors determined that low frequency sound, and infrasound, at both homes were less than any internally recognized standards and criteria published in the UK, US, and Japan. The authors concluded that no adverse public health effects from low frequency sound or infrasound would be expected from the types of turbines studied at distances greater than 300 m. As well, according to Geoff Leventhall, Ph.D. (an internationally recognized expert in noise vibration and acoustics from the UK), in "Low Frequency Noise from Wind Turbines and Other Sources," broad band infrasound and low frequency noise is not normally a disturbance for people.</p>	n/a

Comment or Concern	Response	Amendments to Project or Project Reports
<b>Noise</b>		
<u>Comment From November 22, 2010 First Public Meeting:</u> consideration of "noise"	A Noise Assessment Study has been completed in accordance with the Ministry of Environment requirements. The Project meets all noise requirements.	n/a
<u>Letter Following First Public Meeting</u> "Our residence on New Scot Line is approximately 300 meters from the Dundee natural gas compressor, collection and purification plant on the corner of McKinley Road and New Scot Line. I request that you consider the impact of sound levels coming from this source in your sound studies if there is to be development in the local area. Sound levels from this source have a local impact."	A Noise Assessment Study has been completed in accordance with the Ministry of Environment requirements. The Project meets all noise requirements.	n/a
<u>Comments Received Prior to September 24, 2011 Final Public Meeting:</u> Section 5 of the Noise report: Please provide an explanation of the variation of the sound level limits for different wind speeds.  What is the meaning of dBA?  What is the difference between sound power and sound pressure.  Can the participant receptors be exposed at more than 40 dBA?	Explained the effect of the background noise and the wind speed at ground level on the perception of sounds from other sources. In Ontario, the wind shear is used to adjust the emissions provided by the manufacturer, and the engineers use the worst case scenario (maximum emissions) combined with the lowest limit for sound pressure level (40 dBA). An explanation regarding how the standards are used to measure the sound emissions from WTG was provided.  Sound pressure/power levels are commonly expressed in dB due to the logarithmic nature of the scales. "A" weighting is a filter that adjusts the levels based on the human response to certain frequencies, and environmental and occupational noise limits are usually based on dBA.  Sound power was the acoustic energy emitted by the turbine, and sound pressure was the pressure perturbation measured at a certain distance from the turbine.  The impact is minimized when possible, but participants are not noise receptors.	n/a

Comment or Concern	Response	Amendments to Project or Project Reports
<p>Comment prior to September 24, 2011 Final Public Meeting (Expressed at Local Project Office)</p> <p>These things are so noisy no one can sleep.</p>	<p>A Noise Assessment Study has been completed in accordance with the Ministry of Environment requirements. The Project meets all noise requirements.</p>	<p>n/a</p>
<p>Comment prior to September 24, 2011 Final Public Meeting (Expressed at Local Project Office)</p> <p>These wind turbines are a blight to our beautiful landscaped and they are so noisy nobody can sleep!</p>	<p>A Noise Assessment Study has been completed in accordance with the Ministry of Environment requirements. The Project meets all noise requirements.</p>	<p>n/a</p>
<p>Comment prior to September 24, 2011 Final Public Meeting:</p> <p>Your project is beyond disgusting. Your noise maps are horrendous. The bird migration will be completely disrupted. There is nothing green about the South Kent wind development. It looks like a war map.</p>	<p>Thank you for your email. Though we are sorry to hear that we do not have your support on our project, we do appreciate your feedback and hope that we can discuss your concerns to your satisfaction.</p> <p>Regarding our noise maps, your reaction is understandable. On the surface, it does appear that the turbines are creating dramatic sound contours within the project area. However, it is important to note that the scale of the contours starts at 40 dBA and does not quantify any sound pressure level below that. The result is a map that embellishes the sound effects of the turbines; it appears that sound levels jump from 0 to 40d dBA instantaneously around our turbines. As you know, this is not the case; there are existing ambient sounds everywhere. It is also important to note that no non-participating receptor lies within 40 dBA of any turbine. This includes vacant lot receptors, which are hypothetical receptors placed on vacant lots to account for future development.</p> <p>Your concern for bird migration is also well warranted, as our project does cover a large area of land. However, as outlined in our Environmental Impact Study, the placement of our turbines does not encroach any overhead animal movement corridor. In fact, as part of this study, we are required to identify and study all corridors within 120m of any piece of project infrastructure (for a total study area 240m wide, plus the width of the infrastructure) and outline our planned mitigation measures. In spite of having no infrastructure within 120m of any overhead animal movement corridor, we still intend to monitor bird deaths for at least 3 years after our project is operational and, if we find that we are disrupting bird migration, we will develop procedures to curtail our production during migration season to minimize our impact.</p>	<p>n/a</p>

Comment or Concern	Response	Amendments to Project or Project Reports
	While we believe that the South Kent Wind Project will contribute lasting environmental benefits for the province of Ontario, we also recognize that, like all other sources of energy, wind power is not zero-impact. As we try to minimize all of these impacts, it is our ultimate goal to be a part of a solid, diversified provincial energy portfolio that can generate sustainable, reliable electricity for years to come.	
<p><u>Comments Received From Telephone Conversation</u> Wanted explanation of the variation of the sound level limits for different wind speeds.</p> <p>What does dBA mean?</p> <p>Why is the distance to some receptors is less than 400 m (the resident is at more than 600m)?</p>	<p>The effect of the background noise and the wind speed at ground level on the perception of sounds from other sources. In Ontario, the wind shear is used to adjust the emissions provided by the manufacturer, and the engineers use the worst case scenario (maximum emissions) combined with the lowest limit for sound pressure level (40 dBA).</p> <p>Sound pressure/power levels are commonly expressed in dB due to the logarithmic nature of the scales. "A" weighting is a filter that adjusts the levels based on the human response to certain frequencies, and environmental and occupational noise limits are usually based on dBA.</p> <p>There are participants and non-participants of which the former can be closer than 550 m and the latter cannot as per O. Reg. 359/09. Appendix C of the Noise Assessment Report, is where MOE requires to show the sound levels at the participating locations. The noise model has more than 4,000 receptors, and these include vacant lots as well as the existing dwellings</p>	n/a
<p><u>Comment From May 12, 2012 Public Meeting</u> <u>Location of vacant lot receptors?</u></p>	Vacant lot receptors were selected as per O. Reg 359/09. The vacant lot receptors are identified in the Project's Noise Assessment Report.	n/a

Comment or Concern	Response	Amendments to Project or Project Reports
<b>Site Selection</b>		
<p><u>Comment From November 22, 2010 First Public Meeting</u> "we believe we are in a prime location"</p> <p><u>Comment From November 23, 2010 First Public Meeting:</u> "Very interested in possibly getting a turbine on our 25 acre farm."</p>	<p>The Proponent agrees this is a prime location for a wind energy project. Those individuals interested in turbines on their properties were contacted directly to determine their property locations and relationship to the Proponent's defined project area.</p>	<p>n/a</p>
<p><u>Comment From November 22, 2010 First Public Meeting:</u> "Why are you looking at prime agricultural land? It makes more sense to move further north so that farmers in the less productive areas of Ontario can benefit, while farmers in this area can grow the crops we need to feed our people. Even though each turbine and access road only takes up a small portion of land, collectively it adds up."</p> <p><u>Comment From November 22, 2010 First Public Meeting:</u> "Chatham/Kent is supposed to be prime farming area – what a waste of soil!"</p> <p>"Chatham Kent has enough of these wind turbines and should share them with other areas. How many are in the Niagara area?"</p>	<p>The quality of the soil varies greatly throughout the project area. Some areas are more productive for farming than others. Agriculture and wind turbines fit well together because wind energy projects only occupy 1 – 2% of the total surface area within a project boundary. In addition, by bringing in extra revenue for local farmers, wind turbines can assist with keeping family farms operational. This can help prevent the farmland from being sold off for other purposes.</p> <p>Comment on using land further north under consideration.</p>	<p>n/a</p>
<p><u>Comment From November 22, 2010 First Public Meeting:</u> "why not use old rail beds?"</p> <p><u>Comment From November 22, 2010 First Public Meeting:</u> "Driveway and turbines should be put down line fences"</p>	<p>The old rail beds are being utilized in the Project to transmit the power to the Chatham Switching Station.</p> <p>Where possible and also preferred, the turbines and, in particular, the access roads are sited down fence lines.</p>	<p>n/a</p>

Comment or Concern	Response	Amendments to Project or Project Reports
<p>Comment From November 22, 2010 First Public Meeting: "Keep the turbines far away from residential areas and the lake front. No turbines in our lakes"</p>	<p>All of the turbines are located away from the lake front. The closest turbine is 740 m from Lake Erie. The turbines are also located away from residential areas as set out by the Ministry of the Environment.</p>	<p>n/a</p>
<p>Comment From November 22, 2010 First Public Meeting: "Where is the transmission line going to be erected and proposed turbines?"</p> <p>Comment From May 12, 2012 Public Meeting Where is the transmission line going? Does it use existing infrastructure.</p>	<p>Please see Draft Site Plan which is located on the Project website (<a href="http://www.southkentwind.ca">www.southkentwind.ca</a>) for the exact location of the transmission line and turbines.</p>	<p>n/a</p>
<p>Comment From September 24, 2011 Final Public Meeting "Proposed above ground line along Mull Road is not feasible. Trees on one side large open drain on the other (trees on private property. Road allowance is maxed out. None of the land along here is signed up for wing project so its useless for future expansion. Large drains (tile) running underground along the road. Could bury cables under the road itself. Prefer you find different route!"</p>	<p>The exact routing of the collector system will be finalized during the detailed engineering and design stage. Factors such as road right-of-way width, tiling, drains and vegetation will be considered at this time.</p>	<p>n/a</p>
<p>Email received following September 24, 2011 Final Public Meeting "I do believe there are better solutions than telling property owners that they will have hydro poles stuck in the end of their land. Our 3 main drains need consideration when you look at this area. You hit these which as farmers we have to pay for out of our own pockets. The Harwich Road has a much wider area and larger poles to handle your project and will land you on the same abandoned railroad as Mull. Poles are a hazard for farmers and their help, especially during spring and fall rush. When these lines haven't been there ,we do get tired and forget to look when they have never been there before.</p>	<p>Collector lines will be located on private land only where the Proponent has consulted with the landowner. All other collector lines will be routed along public municipal road right of ways. The exact routing of the collector system will be finalized during the detailed engineering and design stage. Factors such as road right-of-way width, tiling, drains and vegetation will be considered at this time.</p>	<p>n/a</p>
<p>Comment From November 12, 2011 Final Public Meeting "Too residential of an area and excellent farmland!"</p>	<p>Comment noted.</p>	<p>n/a</p>
<p>Comment From November 12, 2011 Final Public Meeting "I am greatly disappointed with the situation of P079. I don't understand why you couldn't have started on the North side of</p>	<p>Pattern has reviewed this turbine and location and it meets all regulatory setback requirements</p>	<p>n/a</p>

Comment or Concern	Response	Amendments to Project or Project Reports
Davidson Sd. Rd. I feel that you could stay further away from the town. I am not against renewable energy but there should be more consideration to location. This is something that will be around for 20+ years. This could also hamper future development in my area. I would really like to see some consideration in moving this turbine, or eliminating it."		
Comment From May 12, 2012 Public Meeting Watercourse to the west of P078 labelled as watercourse (NRSI) is this a mis-label? Landowner states there is no watercourse there.	Detailed site visits verified all watercourse based on definition of O.Reg. 359/09. Field verification will take place just prior to construction.	n/a
<b>Socio-economic</b>		
<p>Comment From November 22, 2010 First Public Meeting: "I feel I was "suckered" when I signed up. Pattern knew the location of where the turbines were going and I wasn't going to get one. Now I have to look at my neighbours new tower (Mrs. Danforth) and am being compensated only \$10.00/acre this is an insult. You need to pool payments and share more for the neighbours who will have to look at the ugly red lights for the rest of their lives."</p> <p>"You people should not play farmers against each other. A cooperative system in which all affected landowners share the economic resource generated by the wind turbines."</p> <p>Comment From May 12, 2012 Public Meeting Red light flashing</p>	The Proponent did not know the proposed location of the turbines until the permitting studies were completed and it could be determined where turbines fit within the parameters of the required setbacks. The draft layout was not finalized and published until the summer of 2011. The Proponent will be enacting good neighbour agreements to compensate landowners living next to Project turbines and is also investigating options for reducing the impact of the red lights at night.	The Proponent commits to entering into agreements to compensate landowners living next to Project and investigation options for reducing impact of red lights.
Comment From November 22, 2010 First Public Meeting: " I have concerns that many people will profit financially from this and other Projects. Meanwhile, property values can and will be affected. Therefore, many people will continue to pay taxes on property that is devalued. The rural lifestyle changes with previously black skies at night flashing red constantly. There should be some	Recent studies such as, <i>The Impact of Wind Power Projects on Residential Property Values in the United States: A Multi-Site Hedonic Analysis (December 2009)</i> , prepared by the Lawrence Berkley National Laboratory and the <i>Wind Energy Study – Effect on Real Estate Values in the Municipality of Chatham-Kent, Ontario (February 2010)</i> prepared for the Canadian Wind Energy Association, indicate no empirical evidence	n/a

Comment or Concern	Response	Amendments to Project or Project Reports
sort of rural property tax deductions for those not directly profiting.” <u>Comment From November 22, 2010 First Public Meeting:</u> “What effect do these towers have on property values adjacent to them? What recourse is available to a property owner if his property is negatively affected?”  <u>Comment From November 22, 2010 First Public Meeting:</u> “Property Values – the survey I did showed that people do not want to see these wind turbines and would not buy if they had them in their views.”  <u>Comment From May 12, 2012 Final Public Meeting</u> “Upset about property value decreases because of turbine close by”	of decreased property value for residential properties within the viewshed of wind farms. Further a positive net effect is anticipated for the local economy during the construction and operation of the facility, providing income to local businesses, employment and fiscal benefits such as income tax to the project and lease payments to participating landowners.  The project will also pay substantial annual property taxes to the Province and municipality. It is up to the government how the new tax revenue is spent.	n/a
<u>Comment From November 23, 2010 First Public Meeting:</u> “I see that the Lambton Kent School Board will benefit from community revenue. Will the St. Clair Catholic School Board benefit equally?”	The project is located within the Lambton Kent School Board and the St. Clair Catholic School Board. Municipal taxes paid by the project will be distributed between the municipality, and both school boards.	n/a
<u>Comment From November 23, 2010 First Public Meeting:</u> “ I would hope that as many local suppliers will be used as possible. Even though some companies claim to be local, they are based elsewhere.”	Pattern and Samsung will endeavour to use as many local suppliers as possible throughout the Project life. It is anticipated that up to 95% of the workforce during construction will be sourced from the Province.	n/a
<u>Comment prior to September 24, 2011 Final Public Meeting (Expressed at Local Project Office)</u> I want to sell my land and get out of here and I was offered \$45000 less than what it is worth because these things are going to be built near me.	A 2010 study conducted in Chatham-Kent, Ontario, found there was no statistically relevant relationship between the presence of a wind project and negative effects on property values (Canning Consultants Inc. and John Simmons Realty Services Ltd., February 2010)	n/a
<u>Comment From May 12, 2012 Public Meeting</u> Do you need to enter into agreement with other developers?	Agreements with other developers are not required.	n/a
<b>Traffic</b>		
<u>Comment From November 22, 2010 First Public Meeting:</u> consideration of “road traffic and effects”	The Construction Plan Report provides general information on the road traffic impacts and mitigation measures that will be used to minimize the disturbance of traffic caused by the Project.	n/a

Comment or Concern	Response	Amendments to Project or Project Reports
<b>Visual</b>		
<u>Comment From November 22, 2010 First Public Meeting:</u> "I don't won't these monstrosity in my backyard! They will devalue by property! Everyone is making money of this, the farmers, the manufacturers, the installers, the Koreans. I will have my property devalue up to 50%! These will never supply enough power to replace standard production capacity!! Don't put anymore around my house!"	Recent studies, <i>The Impact of Wind Power Projects on Residential Property Values in the United States: A Multi-Site Hedonic Analysis</i> (December 2009), prepared by the Lawrence Berkley National Laboratory and the <i>Wind Energy Study – Effect on Real Estate Values in the Municipality of Chatham-Kent, Ontario</i> (February 2010) prepared for the Canadian Wind Energy Association, indicate no empirical evidence of decreased property value for residential properties within the viewshed of wind farms. Further a positive net effect is anticipated for the local economy during the construction and operation of the facility, providing income to local businesses, employment and fiscal benefits such as income tax to the project and lease payments to participating landowners.	n/a
<u>Comment From November 23, 2010 First Public Meeting:</u> "I don't like the red lights."  <u>Comment From the November 12, 2011 Final Public Meeting</u> The blinking red lights will impact the night view.	Red lights on the top of some of the turbines will be required to maintain aviation safety. However, the Proponent is investigating methods to reduce the project's lighting impact, including using lighting shields and radar technology.	n/a
<u>Comment From the November 12, 2011 Final Public Meeting</u> I feel the Project is an eyesore and there should be a minimum 2 km setback applied.	Comment noted. Current regulations allow for a 550 m setback from non-participating receptors.	n/a
<b>Wildlife, Environment</b>		
<u>Comment From November 22, 2010 First Public Meeting:</u> "impacts on wildlife habitat"	Impacts to wildlife habitat have been addressed in the Natural Heritage Environmental Impact Study.	n/a
<u>Comment From November 22, 2010 First Public Meeting:</u> "In addition, the proposed tower is way to close my 80 honey bee colonies, noise and vibration negatively affect the bees. In addition, will the blades kill the foraging bees?"	To date, we are not aware of any studies having been completed on potential impacts of wind turbines on bee colonies. Casual observations of bees around wind turbines (James, 2008) and limited studies of bee movement around wind turbines (Grealey and Stephenson, 2007) appear to indicate that the wind turbines have little effect on bee movement or individual activity, and are unlikely to be a significant cause of mortality for foraging bees.	n/a

Comment or Concern	Response	Amendments to Project or Project Reports
Comment From November 22, 2010 First Public Meeting: Consideration of "bird mitigation and wetlands – 120 m seems not enough"	The 120m refers to the distance that if the significant natural feature (including wetland) is to a Project component, then an Environmental Impact Study is required. The 120m is not a required setback. Please see Natural Heritage Assessment reports for effects and mitigation.	n/a
Comment From November 22, 2010 First Public Meeting: " I think we should stay clear of natural habitats i.e. watersheds and woodlots. I also feel that some revenue should be spent on improving the natural environment of this area. You say you want to produce "green energy" for the sake of the environment, prove it! Plant trees, clean water, protect the "green"."	None of the turbines are sited in watershed or woodlots. In some cases, the distribution line and/or access road is going through or under a woodlot. All areas disturbed and not used during Project operations will be revegetated and the land will be brought back to its original condition after decommissioning.	n/a
Comment From November 22, 2010 First Public Meeting: " Migration of birds and monarch butterflies – waterfowl and butterflies will be greatly affected by adding MORE wind turbines. This is a flyway"  Comment From September 24, 2011 Final Public Meeting "migration patterns for birds and butterflies"	For information related to the migration patterns for birds and the impact of the migration of birds, please see the Natural Heritage Assessment reports.  A literature review for information relating to potential impacts of wind power facilities on Monarch Butterflies did not identify any significant impacts on the species. Though Monarch Butterflies have been known to be struck on occasion by wind turbines, this does not appear to occur with any great frequency, and the potential impact is much less significant than the numbers presently killed along roadways in any given year (James, 2008). Further, although not directly researched, other studies on butterflies suggest the wind speeds and patterns associated with operating turbines likely will not create a collision issue with butterflies (Grealey and Stephenson, 2007). Finally, a noted expert on butterflies, Dr. Karen Oberhauser of the University of Minnesota, has noted that <i>"In my opinion, harnessing energy from the wind will have a net positive on monarchs and many other species, due to the worse effects of other energy-generating activities."</i> (Journey North, undated)	n/a
Comment Received Following First Public Meeting: Who is responsible for weed control on the Project sites? As ragweed may occur during construction.	Weeds will be controlled in the areas that the Proponent is responsible for.	n/a
Comment prior to September 24, 2011 Final Public Meeting (Expressed at Local Project Office)	Impacts to wildlife habitat have been addressed in the Natural Heritage Environmental Impact Study. The Report can be found at:	n/a

Comment or Concern	Response	Amendments to Project or Project Reports
What about the wildlife? Has anybody done a study to see how the migration route will change when there are so many turbines in one area?	<a href="http://www.southkentwind.com/project_documents.html">http://www.southkentwind.com/project_documents.html</a>	
Comment From September 24, 2011 Final Public Meeting "abundance of small woodlots"	The number of woodlots in the Project area is provided in the Natural Heritage Site Investigation Report. The Project will have minimal effect of the significant woodlands in the area. A total of 6 will be effected with minimal removal of trees for access roads.	n/a
Email Received Following September 24, 2011 Final Public Meeting: "Why do deer and coyotes not want to live close to these windmill sites. I hear people talk that their pets have started acting different since these windmills went up in their areas. I also have not seen the wild turkeys stay in the area either . Do you know about this? I hope this doesn't happen to our pets here."	Impacts to wildlife habitat have been addressed in the Natural Heritage Environmental Impact Study. Report can be found at: <a href="http://www.southkentwind.com/project_documents.html">http://www.southkentwind.com/project_documents.html</a>	n/a
Comment From May 12, 2012 Public Meeting <u>What about the migratory impacts to bats? Migratory corridors?</u>  <u>What about the tundra swans?</u>	Impacts to wildlife habitat have been addressed in the Natural Heritage Environmental Impact Study. Report can be found at: <a href="http://www.southkentwind.com/project_documents.html">http://www.southkentwind.com/project_documents.html</a>	n/a
Comment From May 12, 2012 Public Meeting Are post-construction mortality results (specifically on birds) going to be made public so comparison can be made between South Kent and other projects in the area?	Currently, there are no legislative requirements to make the information public. We will review.	n/a
<b>Setbacks</b>		
Comment From Letter Following First Public Meeting: "I was not clear on the required setback of a turbine from a non-participating receptor. Verbal information at the meeting indicated that the setbacks would not be less that the "set back distance" in these situations. Can you please confirm?  Some of the setbacks outlined such as from the lake, wood lots or wildlife areas should be greater than the minimum requirements. Setbacks from the non-participating property lines should not be less	The setback distances from a non-participating receptor depends on what the Noise Assessment Study reveals in order to meet NPC 232. However, regardless of the Noise Assessment Study the turbine can be no closer than 550m.  The Ministry of Natural Resources can dictate the setback distances from natural features if they are to be greater than the minimum distances set out in O.Reg. 359/09. We are maintaining all setback distances and in many cases we are much further than the required setback distances.	n/a

Comment or Concern	Response	Amendments to Project or Project Reports
than the "set back distance."	Please see the Natural Heritage Assessment studies.	
<p>Comment prior to September 24, 2011 Final Public Meeting (Expressed at Local Project Office)</p> <p>Those drawings show that there is a turbine that is too close to my house. I blew up the area and used that scale that was on the drawing and you can see it is too close.</p>	As per Ontario Regulation 359/09, turbines are required to be setback from non-participating receptors by 550 meters. This setback requirement has been verified by a private survey company engaged by the Proponent for all non participating receptors.	n/a
<p>Comment From September 24, 2011 Final Public Meeting</p> <p>What are the setback requirements from turbines to property lines</p>	<p>As per Ontario Regulation 359/09, turbines are required to be setback at a minimum the hub height from the centre of the turbine to the property line. The turbines can be located as close as the blade length plus 10m from the turbine to the property line as long as a Property Line Setback Assessment is completed.</p> <p>There are several turbines that are within blade length plus 10 m and the Property Line Setback Assessment was completed and is contained the Design and Operations Report.</p>	n/a
<p>Comment From September 24, 2011 Final Public Meeting</p> <p>"If windmills need to be 450 m apart, this setback should be 225 m (450/2) so as not to impact my property. Not fair to build @ 70 m then crystallize area 380 m into my property."</p>	<p>Given the rules regarding setbacks are imposed by the Ministry of Environment, we have included these comments into this Consultation Report for review by the Ministry.</p> <p>As per Ontario Regulation 359/09, turbines are required to be setback at a minimum the hub height from the centre of the turbine to the property line. The turbines can be located as close as the blade length plus 10m from the turbine to the property line as long as a Property Line Setback Assessment is completed.</p> <p>There are several turbines that are within blade length plus 10 m and the Property Line Setback Assessment was completed and is contained the Design and Operations Report.</p>	n/a
<p>Comment from September 24, 2011 Final Public Meeting</p> <p>What are the setbacks of the 230 kV transmission line to a home and cattle farm?</p>	As is stated within The Ontario Transmission Code, the Proponent will follow setback requirements outlined in CSA 22.3 (No. 10), which take into consideration safety and electro-magnetic frequency issues. The specific setback relates to the conductor, in maximum swing-out	n/a

Comment or Concern	Response	Amendments to Project or Project Reports
	condition; as final selection of the conductor is still being completed, the exact setback cannot be identified at this time.	
<p>Comment from September 24, 2011 Final Public Meeting "I did not sign so I want fair setback for myself for future so that I can build my own tower later or sign with another company."</p>	Required noise and property setback limits were included in the Project layout.	n/a
<p>Comment Following September 24, 2011 Final Public Meeting "After September 24/2011 open house at the Tilbury Arena I have thought through some things and talked to my wife. We agree that your company has NO right to CRYSTALIZATION of our property at 11099 Ridge Line for the tower proposed on the farm of Marc Campbell (north west of us). If we had signed a lease with your company then you would have the right to do this. Beings we ARE NOT SIGNED WITH ANYONE you are imposing on our CIVIL RIGHTS of operating our farm the way we wish too. If in the future WE want to sign for a tower or install our own, we would have to go to close to others in order to put it up or not be able too. Therefore the 60 metres your tower is from our property survey stake is too close. The government needs to look at the 400 metres distance from other not signed properties so all other's future are not limited. The government needs to make the companies sit down and consult with those next to their projects so all rules and regulations can be agreed upon ahead of time so these issues don't make life difficult for all involved. In my case maybe some sort of agreement could have been arranged so the email would not have to be made.</p> <p>I have an issue with the blade shadow as well from this tower and the one at Albert Vercoouteren's. I know a family with this matter now and have talked to them. They tell me the shadow of the blade comes in the window and shows up in their living room, driving them crazy. Even heavy curtains will not help. They have had to change their house setup which I am not willing to consider. Your surveyors need to stay on your signed up land ONLY, NOT ON OURS WHICH IS NOT SIGNED. I also know of others this happened to around me and even go through crops not signed but did not go</p>	<p>Given the rules regarding setbacks are imposed by the Ministry of Environment, we have included these comments into this Consultation Report for review by the Ministry.</p> <p>The Proponent is in the process of considering completing a shadow flicker analysis.</p> <p>Our apologies if our Survey company was on your property. The company has been notified to remain solely on signed property.</p>	n/a

Comment or Concern	Response	Amendments to Project or Project Reports
<p>through the crops on signed up land for towers. My winter wheat field and another neighbours were drove through by your surveyors ARGO (a yellow one with a blue dodge smaller pickup pulling the trailer).</p> <p>Now I hope your company sees how come some of us are so ticked off at the windmill projects.</p> <p>These units should have be put on pasture land or none farming areas. We as home owners or tax payers cannot afford \$0.42 /kwh hydro bills.</p> <p>At least the solar units are small enough they are not seen as eye sores, and yes they are also way over paid for them too.</p>		
<p><u>Comments From November 12, 2011 Final Public Meeting and Letters</u></p> <p>"Project does not respect setbacks!"</p> <p>"We own 2 farms adjacent to turbine P149. We feel it does not meet proper setback requirements."</p> <p>"Project does not respect proper setback requirements"</p> <p>"Its clear that if proper setback requirements are adhered to, then P149 cannot be located in its proposed position."</p>	<p>The Project complies with the requirements of Section 53 of Ontario Regulation (O.Reg.) 359/09. In accordance with Section 53(3) of O.Reg. 359/09, where the distance between the centre of the base of the wind turbine and all boundaries of the parcel of land on which the wind turbine is constructed is less than the height of the wind turbine, the wind turbines are located a minimum of the length of any blades plus 10 m, and a written assessment identifying adverse impacts and preventative measures has been prepared. Please refer to Section 7 of the Design and Operations Report for the Property Line Setback Assessment.</p> <p>P149 meets all setback requirements to property lines and non-participating receptors.</p>	n/a
<p><u>Comment from My 12,2012 Final Public Meeting</u></p> <p>"P139 - would like the exact distance to my home" (11049 New Scotland Line</p>	Distance is 799 m.	n/a
<b>Other</b>		
<p><u>Comment Prior to November 22, 2010 First Public Meeting:</u></p> <p>"Your proposal notice with map for Tilbury Your proposal notice with map for Tilbury Ridgetown area does not show enough info. i.e. Four Rod Rd., Bloomfield Rd. etc are not shown on map especially project area which extends down to Lake Erie. I would appreciate detailed map of area.</p>	<p>Thanks for your inquiry. Please refer to our Draft Project Description Report which can be found at: <a href="http://www.southkentwind.ca/project_documents.html">http://www.southkentwind.ca/project_documents.html</a></p> <p>Towards the end you will find detailed maps of the project, which should satisfy your request.</p>	n/a

Comment or Concern	Response	Amendments to Project or Project Reports
<p>Comment Prior to November 22, 2010 First Public Meeting: On your web site I read " We value your opinion and look forward to updating you soon."</p> <p>How much good can the opinion of anyone who opposes the random placement of wind turbines do. You have a business plan that you will execute regardless of any opinions that differ from your own self serving actions.</p> <p>Like most people I would applaud the implementation of green energy but this industrial use of land should be on a wind farm not spread out across the province so that everyone gets to endure the visual pollution of your industrial project.</p> <p>If you wish to harness wind energy then why not purchase a few hundred or a few thousand acres and put all the wind generators in that one place. It's being done elsewhere and it is a much better way to accomplish your goal. Pick a less populated area and put your wind power generators there, clustered together in one spot.</p> <p>Chatham Kent is the furthest south area in Canada. With the baby boomer coming of an age for retirement it is the part of the province with the best weather. New communities should be build and Chatham Kent is the jewel of the province and you are turning it into a wasteland.</p> <p>I know this email will make no difference. But when you're patting yourself on the back and admiring your work, which will proceed regardless of how many people oppose it, remember that many people deplore what you are doing to our province with the help of our provincial government. Having a prominent liberal such as Mike Crawley also becoming the president of AIM PowerGen does little to enforce the notion that the public interest is of any importance. This is all about big business making money.</p>	<p>Thank you for your email. We are sorry that you do not support our project, but appreciate your giving us the opportunity to address some of your concerns.</p> <p>Regarding public opinion, we absolutely take it into account throughout the design and permitting process. Because we cannot accommodate everyone's requests, though, this may not be apparent to all; however, public opinion is something that helps us avoid obstacles and find efficient solutions throughout the process and we are truly open to it.</p> <p>We also appreciate your views on the clustered layout vs. our scattered pattern in the area, and agree that a clustered layout can be much more efficient and have a lower visual impact. The reality, though, is that wind farms are built both in this way and spread over farmland for a few reasons. Firstly, a major underlying driver of a wind farm's location is, not surprisingly, the quality of the wind in an area. In order to take advantage of the highest quality wind, farm layouts must adapt to the available land in that region. Secondly, an advantage of the spread out farm layout is the ability for farmers to continue to farm the land. The footprint of a turbine is relatively small, and farming can occur right up to its base.</p> <p>You also hit on a very interesting point: building in less populated areas. The Catch 22 of doing this is that there is no demand without population. Conversely, in urban areas where demand is highest, there is generally the lowest quality wind (not to mention the lack of available land). Therefore, selecting a project site becomes a compromise between supply (quality wind), demand and a means of delivery, or available transmission. Building in an area of lower population density would certainly make development easier for us! Unfortunately, we would not be able to efficiently deliver our power anywhere.</p> <p>We apologize that you do not like the look of the wind turbines. We also appreciate your comments regarding the building of new communities and believe that our projects align well with your views on municipal expansion and economic development. Indeed, wind farms can bring</p>	<p>n/a</p>

Comment or Concern	Response	Amendments to Project or Project Reports
	many benefits to an area including millions of dollars in tax revenue, which local governments can use to increase public services without raising taxes. Further, the Ontario renewable energy laws ensures that local contractors and businesses are used as much as possible during construction. We believe that the wind farm will deliver a net benefit to the community in a self sustaining manner.	
Comment From November 22, 2010 First Public Meeting: "please host a meeting for only project participants – so we can get more information"	Landowner meetings were held on Monday July 18 and Tuesday, July 19, 2011. Representatives for the Proponent also met individually with participating landowners throughout the past year. The South Kent Wind Office in Blenheim is also used as a resource for landowners to have their questions answered. In addition, prior to the final public meeting on September 24, 2011 from 1:00 pm to 2:00 pm, a landowners meeting open house took place. The landowners were in attendance and were able to ask questions about the Project and their property.	n/a
Comment From November 22, 2010 First Public Meeting: "In media reports explaining how many homes would be powered rather than number of megawatts produced would be more meaningful"	The number of houses that will be powered by 270 MW is approximately 73,000. This figure has been used in project informational materials, including factsheets, presentations, advertisements, the project website and all project related press releases.	n/a
Comment From November 22, 2010 First Public Meeting: "Negative impacts should also be included in your reports"	Negative impacts to the natural and socio-economic environments have been included in the following reports which are available at <a href="http://www.southkentwind.ca">www.southkentwind.ca</a> : <ul style="list-style-type: none"> <li>• Construction Plan Report</li> <li>• Natural Heritage Environmental Impact Study</li> <li>• Water Body Environmental Impact Study</li> </ul>	n/a

Comment or Concern	Response	Amendments to Project or Project Reports
<p>Comment From November 22, 2010 First Public Meeting: Consideration of “opinion of people living in and near Project area”</p>	<p>Through the first and final public meetings, Pattern and Samsung have listened to and obtained comments, opinions and concerns from the local people living in or near the Project area. Pattern and Samsung have also completed other consultation activities and events including providing the names and phone numbers of people to contact throughout the REA process, up to date website where information is posted and comments can be provided. The Proponent also opened an office in the project area to have a venue for learning the opinion of people living in and near the project area and publicized the location and contact information of the office in advertisements, publicly distributed materials, the project website, stakeholder email announcement and on radio. Further, the Proponent had a booth at festivals in the project area – the Blenheim Cherry Festival and Tilbury Fun Fest – and gave presentations to community groups based in the project area in order to obtain feedback and opinions of those living in the project communities.</p>	<p>n/a</p>
<p>Comment From November 12, 2011 Final Public Meeting What is the recyclable content/materials in the wind turbines? What are the turbines (e.g. rotor, blades and tower) made of? How long does each turbine last?</p>	<p>Since the tower is primarily made of steel, yes there would be a portion of recycled steel that in turn after the life of the turbine can be recycled. The blades are primarily made of fiberglass. The rotor is primarily made of metals with some recycled content and is partially recyclable. The life of a turbine is approximately 30 years.</p>	<p>n/a</p>
<p>Comment From November 12, 2011 Final Public Meeting Why is the meeting an open house style public meeting? Why is there not a formal question and answer period?</p>	<p>We have found that meetings with display boards and Project representatives available for discussion allow for dissemination of a large amount of information, as well as an opportunity for in-depth discussions between Project representatives and members of the public in order to ensure that concerns are fully understood and addressed to the best of our ability.</p>	<p>n/a</p>
<p>Comment From November 12, 2011 Final Public Meeting Why does Chatham Kent receive increased taxes?</p>	<p>Change in land use results in a higher taxation rate.</p>	<p>n/a</p>
<p>Comment From November 22, 2010 First Public Meeting: “Over the last 2-3 years several different companies have built turbines and transmission lines close to and through our farms. Obviously, not everyone benefits financially from this, but everyone has to look at and listen to the noise, and the obliteration of AM</p>	<p>We have completed a Noise Assessment Study in order to ensure that all non-participating receptors have a sound level in accordance with the Ministry of Environment requirements. The turbines and substations have been located to ensure that these requirements are met.</p>	<p>n/a</p>

Comment or Concern	Response	Amendments to Project or Project Reports
<p>radio signals on roads with transmission lines along them. I'm concerned about the concentration of turbines and lines in our area reaching the point of saturation. Ontario is a big province. Maybe it's time to let everyone else "enjoy" the view and the noise these machines have created!!"</p> <p><u>Comment From November 22, 2010 First Public Meeting:</u> "We believe in sustainable energy but we already have so many here in South Kent it is no longer sustainable!! No!"</p> <p>"When will be reach the limit? We are already doing the heavy lifting in sustainable energy for the province. Is there a limit on the number of turbines per km?"</p> <p><u>Comment From November 22, 2010 First Public Meeting:</u> "Why do we have to have so many – we have more than we require already"</p>	<p>While the landowners participating in the project do benefit more financially than the general public due to leasing their private property for the location of project infrastructure, the public benefits in general from the generation of increasing property tax revenue from the project. The Proponent is also creating a good neighbour agreement for landowners living next to properties with turbines and will be establishing a South Kent Wind Community Fund, with annual financial contributions from the project that will be used for the benefit of the communities within and near the project area.</p> <p>The Proponent has also supported community causes that benefit the residents not specific to those participating in the project, such as contributing to the Heart and Stroke Foundation, United Way of Chatham-Kent, Children's Treatment Centre, Community Task Force, Bushels of Hope, Chatham YMCA, local youth sports programs and other local causes brought to the attention of the Proponent by residents in the community.</p> <p>There is a limit of turbines that can be sited per kilometre. Assuming there are not any setbacks that prevent turbine siting, the turbines still need to be 3 – 4 rotor diameters apart, which is 300 – 400 meters. Therefore, 2 – 3 turbines will fit per a linear kilometre assuming there are no setback requirements along the route.</p> <p>The Municipality of Chatham-Kent is blessed with a commercially viable wind resource. This can benefit the communities of Chatham-Kent directly through economic development, tax revenue and funding of community benefit programs, while also benefiting the Province as a whole through economic stimulus from manufacturing, energy diversification and offsetting dirty sources with clean, renewable energy sources.</p>	
<p><u>Comment From November 22, 2010 First Public Meeting:</u> "Consultant used very dated landowner information"</p>	<p>Landowner contact information was revised when we were notified of any errors.</p>	<p>n/a</p>

Comment or Concern	Response	Amendments to Project or Project Reports
Comment From November 22, 2010 First Public Meeting: "Erieau and #3 were built before setback rules by Kruger. Will they be moved?"	The Proponent does not have control of the Proponents of wind farms currently operating in the area.	n/a
Comment From November 22, 2010 First Public Meeting: "Have all landowners in the area been contacted regarding leases? Are leases based on total acreage involved? Or are leases based on number of generators? Are lease payments based on any of the above or by KW generated? Under terms of agreement are there restrictions placed on the landowner? What is the commercial municipal assessment on each unit? Are these commercial taxes billed directly to Samsung or the landowner?"	All landowners in the area have been contacted regarding leases.  Details of the lease arrangements are confidential	n/a
Comment From November 22, 2010 First Public Meeting: In the unforeseen case of bankruptcy who is responsible? At the termination date of the lease who is responsible for clean up?"  "Is Samsung covering each tower adequate liability insurance? Is Samsung adequately insured in case of civil action brought forth for health reasons or loss of farm income from these generators?"	Bankruptcy is highly unlikely as Samsung is a very large multinational company that sells and manufactures innumerable items over various sectors, not just wind turbines.  At the termination date of the lease, the Proponent is responsible for ensuring that the entire site be restored to its pre-construction baseline condition, or as desired by the land owners, and meet the requirements of applicable local, provincial and federal legislation. The Proponent is adequately insured.	n/a
Comment From November 22, 2010 First Public Meeting: "Is Samsung covering each tower adequate liability insurance? Is Samsung adequately insured in case of civil action brought forth for health reasons or loss of farm income from these generators?"	The Proponent is adequately insured.	n/a
Comment From November 23, 2010 First Public Meeting: "The maps that your company is using are obsolete. i.e. concerning my property – features such as buildings and watercourses that are no longer present. Would this fact influence a property is or is not considered a potential project location?"	The natural environmental features on properties have been ground-truthed and updated. Please see the Natural Heritage Site Investigation Report and the Water Body Site Investigation Report. Yes, the updated location on features has been used in considering the location of the Project components.	n/a
Comment From November 23, 2010 First Public Meeting: "I support project such as this one, times change, as does technology. I personally do not see many major problems arising from this	We have addressed the disturbance during construction and to the subsurface file drainage systems in the Construction Plan Report. In addition we have addressed the decommissioning of the Project in the	n/a

Comment or Concern	Response	Amendments to Project or Project Reports
project. Temporary inconvenience during the construction phase. Disturbance of subsurface tile drainage systems (agriculture). Decommissioning of the units and removal of foundations. Factors like the above three come to mind. These are things that can be dealt with properly. I'll take wind and solar over a nuke any day!"	Decommissioning Plan Report. Please see these reports.	
<p><u>Comment Prior to September 24, 2011 Final Public Meeting</u> Can you please tell me what the status is of your REA- you mentioned having another meeting soon - we were at your first meeting and found it very informative.</p>	<p>Regarding our REA status, we are waiting for the weather to warm up and the snow to melt so that we can resume our Stage II Archaeological Assessments. As you recall, last fall was not very favourable for our investigations due to the late harvest, rains and snowfall. We are in "standby" mode to mobilize as soon as weather permits.</p> <p>In that regard, we have not yet set the date of our second open house. But we thank you for your interest, and will be sending out notices for it at least 30 days in advance.</p>	n/a
<p><u>Comment Prior to September 24, 2011 Final Public Meeting</u> Yes we are wondering when the next meetings will be held for the project. We were told March or April for further info??</p>	Thanks so much for your interest in the project. Unfortunately, it will be a few more months yet before our second open house. We have received some feedback from the Ministry of Energy that triggered some changes in our proposed plan, which means we have a bit more environmental permitting work to do. We are targeting our next public open house for mid-summer, when we hope to have this work complete.	n/a
<p><u>Comment Prior to September 24, 2011 Final Public Meeting</u> "I have received a notice of a public meeting for November 12, 2011. Is the meeting for this Saturday, September 24 which I have received a notice for earlier still on or is it now rescheduled?"</p>	Both meetings are going to be held as per the meeting notices.	n/a
<p><u>Comment Prior to September 24, 2011 Final Public Meeting</u> "In July we received notice of a meeting to be held at the Tilbury Arena on September 24. We then received a notice dated September 6, 2011 about a meeting to be held on Saturday, November 12 from 2 to 5 pm at Tilbury Knights of Columbus Hall. Does this mean that the September meeting will not be held? Please let us know".</p>	Both meetings are going to be held as per the meeting notices.	n/a
<p><u>Comment from September 24, 2011 Final Public Meeting</u> "Should have been contacted about project so concerns are heard</p>	Notices were sent to all landowners within the Project area and published in the Chatham Daily Times since October 2010.	n/a

Comment or Concern	Response	Amendments to Project or Project Reports
first not us have to try and figure out what is happening."		
<p>Comment from September 24, 2011 Final Public Meeting</p> <p>"Concerned about further connection to transmission line of generation. Concerned about stray voltage if connection are made of our system to distribution system serving customers. Protocol in place to monitor changes in stray current pre and post facility". "We have balanced three phase system that are transmission connected to Chatham SS. We aren't connected to distribution system so we shouldn't contribute to unbalanced currents responsible for stray currents for dist. system."</p>	<p>The majority of causes of "stray voltage" (in excess of 80%) is found to be from on farm sources such as poor or faulty wiring, improper grounding, (particularly in barns), unbalanced farm electrical loading, defective equipment, voltages from improper connection of telephone lines, or gas/water/sewer pipelines used as grounding electrodes. In addition, some causes are from off farm sources such as connection of the rural electrical distribution system neutral to the farm ground system and distribution system faulty components. Therefore, the construction/installation of the connector, distribution and transmission lines will be completed in accordance with provincial requirements and best management practices to eliminate any potential for stray voltage.</p>	n/a
<p>Comment prior to September 24, 2011 Final Public Meeting (Expressed at Local Project Office)</p> <p>How can you invest so much money in something that is only 30% efficient?</p>	<p>Wind Projects are known as an intermittent generating source, which means electricity is generated when there is sufficient wind present. Conversely, generating sources such as Nuclear or Coal are known as base load generators that generate electricity most, if not all of the time.</p> <p>When deciding on new generation to supply the growing need for electricity in Ontario, Wind is extremely competitive with new installations of coal, hydro, and nuclear power, when the cost of health and environmental impacts are considered (Pembina Institute, 2011)</p>	n/a
<p>Comment prior to September 24, 2011 Final Public Meeting (Expressed at Local Project Office)</p> <p>Why didn't they just buy the land and put up their Wind farm instead of paying all these farmers all this money? It isn't fair.</p>	<p>Landowners that sign an agreement to be part of the wind power project benefit by generating a secondary revenue stream off their property while maintaining ownership. This is preferable over the option of buying land outright from farmers.</p>	n/a
<p>Comment prior to September 24, 2011 Final Public Meeting (Expressed at Local Project Office)</p> <p>Why aren't we using solar farms instead of these big eyesores?</p>	<p>Solar farms are also being built in Ontario and form an important part of Ontario's Long Term Energy Plan. See <a href="http://www.mei.gov.on.ca/en/pdf/MEI_LTEP_en.pdf">http://www.mei.gov.on.ca/en/pdf/MEI_LTEP_en.pdf</a> for more information on this Plan.</p>	n/a
<p>Comment prior to September 24, 2011 Final Public Meeting (Expressed at Local Project Office)</p> <p>Why doesn't the government just give us all solar panels for our</p>	<p>The Ontario Power Authority's microFIT allows homeowners, farmers and small business owners the opportunity to develop a very small renewable electricity generation project, such as a solar panel. Please</p>	n/a

Comment or Concern	Response	Amendments to Project or Project Reports
roofs?	see <a href="http://microfit.powerauthority.on.ca/">http://microfit.powerauthority.on.ca/</a> for more information on this program.	
<p><u>Comment prior to September 24, 2011 Final Public Meeting (Expressed at Local Project Office)</u></p> <p>It costs the environment and nobody can claim it has zero effect because they still need to manufacture the steel that goes into those things and those big trucks destroy our roads and they don't run for free so you waste all that fuel getting them here and that fuel pollutes the environment.</p>	<p>Manufacturing, transporting and erecting wind turbines does consume materials and fuel, and produces carbon emissions. Life cycle analysis reports have shown that, compared to other sources of electrical generation (including other low carbon technologies), wind has one of the lowest carbon footprints (Parliamentary Office of Science and Technology, 2006)</p>	n/a
<p><u>Comment prior to September 24, 2011 Final Public Meeting (Expressed at Local Project Office)</u></p> <p>We have plenty of power why do we need more?</p>	<p>According to the Independent Electricity System Operator (IESO)'s <i>10-Year Demand Forecast</i> (July 8, 2005) the province of Ontario "faces a significant electricity shortfall in the next few years as coal plants are retired and some nuclear plants reach the end of their useful life. Demand, meanwhile, is expected to grow at an average annual rate of 0.9% as Ontario's population increases and its economy expands. Meeting this demand is becoming increasingly challenging. Already Ontario's electricity system is showing signs of strain".</p>	n/a
<p><u>Comment prior to September 24, 2011 Final Public Meeting (Expressed at Local Project Office)</u></p> <p>Why, when it is windy, is it that most of the turbines aren't turning?</p>	<p>Some examples of why wind turbines are not generating electricity when it is windy may be:</p> <ul style="list-style-type: none"> <li>Turbines are shut down for schedule maintenance programs</li> <li>Extreme wind events cause turbines to shut down as a protective measure</li> <li>Turbines require a certain velocity of wind (or cut-in wind speed) to begin generating electricity</li> <li>Maintenance on the substation or Hydro One Network transmission system could requires the wind farm to be shut down</li> </ul>	n/a
<p><u>Comment prior to September 24, 2011 Final Public Meeting (Expressed at Local Project Office)</u></p> <p>Who pays the difference in the tax rate when a farmer's field changes from agricultural to industrial?</p>	<p>The Proponent is responsible for any and all addition tax associated with placing improvements on a landowner's property.</p>	n/a

Comment or Concern	Response	Amendments to Project or Project Reports
<u>Comment prior to September 24, 2011 Final Public Meeting (Expressed at Local Project Office)</u> Why don't the neighbours get to have a say in where these things get placed?	Ontario Regulation 359/09 allows for a public review period of all project components.  If the siting of Project components satisfies all municipal, provincial and federal regulations, then one landowner cannot dictate what another landowner can build on his/her private property.	n/a
<u>Comment prior to September 24, 2011 Final Public Meeting (Expressed at Local Project Office)</u> I want to buy a farm in your project area but it is close to a proposed wind turbine. What compensation do I receive.	No compensation is provided by the Proponent to landowners who buy or sell property located near a proposed turbine.	n/a
<u>Comment From May 12, 2012 Public Meeting</u> <u>How did you study my woodland without my permission?</u>	As stated in the Natural Heritage Site Investigation, if land owner permission was not gained, alternative site investigations (e.g road side) were used.	n/a
<u>Comment in Email dated Sunday, May 2012</u> <u>Concern about public voice in the environmental approval process</u>	The Proponent has hosted six open houses, has established and staffed an office in the Project Area, has maintained a website with all of its REA reports. In addition, Proponent continuing to engage with the community.	n/a
<u>Comment From May 12, 2012 Final Public Meeting</u> <u>"My concern has little to do with health or real estate Issues but rather how long we as taxpayers must fit the bill for this rather expensive for of hydro generation. While the wind is free the cost of the power certainly is not"</u>	Noted	n/a
<u>Comment From May 12, 2012 Final Public Meeting</u> <u>"I am the Chair of the Raleigh Neighbourhood Watch, where do I go to discuss support initiatives"</u>	We invite you to stop in at our project office in Blenheim, which is open Tuesday through Thursday during normal business hours, and discuss different support initiatives with our staff member on-site.	n/a
<u>Comment From May 12, 2012 Public Meeting</u> <u>Landowner wants to be part of the Project. Supportive of wind energy and would like to be considered if there is a second phase of the Project</u>	Noted	n/a

### 3. Consultation with Agencies

#### 3.1 Agencies

Consultation with relevant government agencies including provincial ministries, local municipalities and conservation authorities were completed as per O. Reg. 359/09 and MOE's "Guidance for Preparing the Consultation Report". The following agencies were consulted:

- Ministry of the Environment
- Ministry of Natural Resources
- Ministry of Tourism and Culture
- Ministry of Transportation
- Lower Thames Valley Conservation Authority (LTVCA)

The following provides the details of the consultation completed per agency.

##### 3.1.1 *Ontario Ministry of the Environment*

- On August 27, 2010, the Proponent provided the MOE with the draft Project Description Report and requested a list of Aboriginal communities to consult with. This is further described in Section 4.1.
- On October 15, 2010, Hatch sent the Notice of Proposal to Engage in a Renewable Energy Project and Public Meeting to the Ministry of the Environment (Windsor District Office and Environmental Assessment and Approvals Branch (EAAB)).
- On July 21, 2011, Hatch sent the Notice of Final Public Meeting (September 24, 2011) to the Ministry of the Environment (Windsor District Office and Environmental Assessment and Approvals Branch).
- On September 6, 2011, Hatch sent the Notice of Final Public Meeting (November 12, 2011) to the Ministry of the Environment (Windsor District Office and Environmental Assessment and Approvals Branch).
- Periodic verbal communications with members of the MOE EAAB to clarify specific aspects and requirements of the REA Regulation and process. These questions were not specifically related to the South Kent Wind Project, but the answers provided by MOE were used as guidance during the REA process for the Project.
- Regular monthly meetings were held with provincial ministries which included the Ministry of the Environment. These meetings were arranged by the Ministry of Energy.
- On February 21, 2012, MOE was notified of the Project modifications and that updated REA documents would be provided.
- On February 24 and March 3, 2012, MOE was provided with the revised REA documents (Project Description Report, Noise Assessment Report, Construction Plan Report, Design and Operations Report, Decommissioning Report and Wind Turbine Specifications Report).

- On May 7, 2012, a letter and two copies of the revised REA documents were provided to the MOE. The letter is provided in Appendix F
- On May 8, 2012, a letter and copies of the revised Noise Assessment Study were provided to the MOE.

### **3.1.2 Ontario Ministry of Natural Resources**

- Meetings were held with staff from the Ontario Ministry of Natural Resources (MNR) Aylmer District office to discuss the South Kent Wind Project on the following dates: September 10, 2010, November 3, 2010 (all day meeting), March 22, 2011 and April 13, 2011, Numerous conference calls were also held to discuss the Natural Heritage Assessment (NHA) reports.
- In November, 2010, Hatch/NRSI commenced with the submission of the draft NHA documents for the project to MNR, including Natural Heritage Records Review, Site Investigations and Evaluation of Significance Report, and Environmental Impact Study for the Project (as required by Sections 25, 26, 27, and 38 of O. Reg 359/09).
- MNR commenced with providing comments on the draft NHA documents in November, 2010 (as provided in Appendix F). Hatch/NRSI revised the NHA reports as appropriate to address MNR's comments and sent revised versions for additional review commencing in December 2010.
- Due to Project changes, submission of the revised reports were provided to MNR in May and June 2011. Additional comments from MNR (as provided in Appendix F) and submission of revisions from Hatch/NRSI continued in July and August 2011.
- MNR provided their Confirmation Letter confirming that the NHA reports meet the REA Regulation requirements on September 2, 2011 (as provided in Appendix F).
- On February 13, 2012, MNR was contacted and notified of Project modifications and that updated NHA reports would be provided.
- On February 24, 2012, MNR was provided with the revised NHA reports.

### **3.1.3 Ontario Ministry of Tourism, Culture and Sport**

- ASI submitted an Archaeological Assessment Report entitled '*Stage 1 Archaeological Assessment (Background Study and Property Inspection) South Kent Wind Project, Municipality of Chatham Kent, Ontario*', prepared by Archaeological Services Inc. to the Ontario Ministry of Tourism and Culture (MTC) on January 31, 2011.
- ASI submitted an Archaeological Assessment Report entitled '*Stage 2 Property Assessment, South Kent Wind Project, Municipality of Chatham Kent, Ontario*,' prepared by Archaeological Services Inc. to the Ontario Ministry of Tourism and Culture (MTC) on February 17, 2011. Due to Project changes, the revised Stage 2 report was submitted to MTC on August 17, 2011.
- On August 25, 2011, the MTC responded that the archaeological assessment undertaken for the Project complies with the *Ontario Heritage Act's* licensing requirements, including the license terms and conditions and the Ministry's 1993 Archaeological Assessment Technical Guidelines. This comment letter is included in Appendix F.

- In February, 2012, MTCS was contacted and notified of Project modifications and that an updated Stage 1 and 2 Archaeological Assessment report would be provided.
- On February 27, 2012, MTCS was provided with the revised Stage 1 and 2 Archaeological Assessment Report.

### **3.1.4 Ontario Ministry of Transportation**

- On December 13, 2011, Pattern met with the Ontario Ministry of Transportation (MTO) at their offices in London, ON, to discuss the Project. At the meeting the setback requirement for wind turbines from provincial highways was confirmed at turbine height plus one blade length.
- On January 16, 2012, Hatch spoke with John Morrissey of the MTO Corridor Management Group in London, ON. Mr. Morrissey confirmed that a meeting was held in December 2011 with Pattern where it was confirmed that the MTO has no concern with turbine setbacks from their roadways.

### **3.1.5 Lower Thames Valley Conservation Authority**

- On October 14, 2010, Natural Resource Solution Inc. (NRSI) (acting on behalf of Hatch) sent an email to LTVCA requesting existing information regarding natural heritage and water body features within the South Kent Wind Project location area. LTVCA responded though no further information was provided information then what NRSI was previously known (e.g., flood hazard, erosion hazard, meander belt and 120-m buffers from wetlands).
- An email from LTVCA was received on October 28, 2010 requesting that we consider whether the area may be impacted by future Source Protection Plans.
- On November 18, 2011, an email from the Lower Thames Conservation Authority was received which provided information related to the location of seasonal campers at the C.M. Wilson Conservation Area. Additional receptors were then added and included in the noise modelling which resulted in Turbine P162 to not be noise compliant. Turbine P162 was then moved 354 m south so that these and all other receptors met noise level standards.

## 4. Municipality of Chatham Kent

- The Proponent attended several meetings with the Municipality of Chatham Kent. The following provides a summary for each meeting including those from the Municipality in attendance:
  - June 8, 2010: Mayor Randy Hope. Purpose/Results of Meeting: Discuss Project
  - June 22, 2010: Presentation to community and business leaders in Chatham, arranged by Stuart McFadden with the Economic Development Office. Municipal councilors were invited. Purpose/Results of Meeting: Introduced the project team and gave presentation on the project
  - August 3, 2010: Mayor Randy Hope. Purpose/Results of Meeting: Discuss Project
  - August 3, 2010: Chatham Kent Energy. Purpose/Results of Meeting: Discuss Project
  - November 23, 2010: South Kent Councillors Art Stirling and Karen Herman. Purpose/Results of Meeting: Discuss Project and environmental/social areas of concern
  - November 23, 2010: Mayor Randy Hope. Purpose/Results of Meeting: Recommended opening a local Project office
  - February 24, 2011: Mayor Randy Hope. Purpose/Results of Meeting: Recommended creating information displays
  - February 24, 2011: Chatham Kent Energy. Purpose/Results of Meeting: Discuss Project
  - March 24, 2011: Councillor Art Stirling. Purpose/Results of Meeting: Recommended outreach opportunities and charity opportunities.
  - March 24, 2011: Councillor Bryon Fluker. Purpose/Results of Meeting: Recommended outreach opportunities.
  - March 25, 2011: Stuart McFadden and Geoff Wright, Chatham-Kent Economic Development Office. Purpose/Results of Meeting: Recommended opening a local office, and other outreach opportunities
  - April 28, 2011: Councillor Karen Herman. Purpose/Results of Meeting: Recommended outreach opportunities and requested visual simulations.
  - March 25, 2011: Stuart McFadden, Chatham-Kent Economic Development Office. Purpose/Results of Meeting: Discuss Project
  - May 18, 2011: Councillor Karen Herman. Purpose/Results of Meeting: Discuss Project.
  - July 26, 2011: Mayor Randy Hope. Purpose/Results of Meeting: Discuss Project
  - September 23, 2011: Mayor Randy Hope. Purpose/Results of Meeting: Discuss Project
  - September 23, 2011: Paul Lacina, Director of Building Services Purpose/Results of Meeting: Obtain the Municipal Consultation Form

- The Municipal Consultation Form, as per O.Reg 359/09 Sec 18(1), with Section A completed by Hatch, and requested the Municipality of Chatham Kent to complete Section B of the Form. This Form was initially provided on which is more than 90 days prior to the final public meeting.
- On October 15, 2010, Hatch sent the Notice of Proposal to Engage in a Renewable Energy Project and Public Meeting to the Municipality of Chatham-Kent (Clerk Department).
- On July 21, 2011, various Project reports were submitted to the Municipality of Chatham-Kent (Clerks Department) for their review and consideration. This letter is included in Appendix G.
- On September 6, 2011, revised copies of the Executive Summary, Design and Operations Report, Stage 2 Archaeological Assessment, Natural Heritage Records Review Report, Natural Heritage Site Investigation Report, Natural Heritage Evaluation of Significance Report, and Natural Heritage Environmental Impact Study. This letter is found in Appendix G.
- August to September 2011, various conversations with representatives of the Municipality about the Project reports and status of the Municipal Consultation Form.
- Paul Lacina, Director of Building Services of the Municipality of Chatham-Kent provided the Municipal Consultation Form on September 23, 2011 during a meeting with the Proponent.
- Throughout late Fall, 2011 and early Winter, 2012, the Municipality of Chatham-Kent were notified on Project modifications. Throughout late Fall, 2011 and early Winter, 2012, the Municipality of Chatham-Kent were notified on Project modifications.
- On April 28, 2012, a letter notifying of an upcoming public meeting on May 12, 2012 was provided to the Clerk of Chatham Kent.
- On May 3, 2012, a letter and revised REA documents were provided to the Clerk of Chatham Kent. The letter is available in Appendix G.

#### 4.1.1.1 *Municipal Consultation Form*

As previously stated, the Municipal Consultation Form from the Municipality of Chatham-Kent was provided on September 23, 2011. A copy of the Form is contained in Appendix G. With the exception of one item, for all of the consultation items, the Municipality has stated “see attached”. The exception is the requirement to “identify an issues and recommendations related to the identification of any archaeological or heritage resources” in which the Municipality’s response was “none”. As provided by the Municipality the “attached” are the Municipality of Chatham-Kent Green Energy Development Submissions Guidelines. Much of the information requirements in the Guidelines are provided in the Project reports; however, the Proponent is committed to providing the additional information requirements which are related to the detailed design of the Project. Amendments to the Project or the Project reports have not occurred as a result of the Municipal Consultation Form.

## 5. Consultation with Aboriginal Communities

It is the Crown's fiduciary obligation to conduct meaningful consultation in good faith with First Nation and Aboriginal communities. The Crown has delegated some of the consultation to the proponent of renewable energy projects as per O. Reg. 359/09. Pursuant to O. Reg. 359/09, Project proponents are required to engage meaningfully with Aboriginal groups regarding traditional ecological knowledge, traditional land use, land claims and other interests and issues with respect to the development of the Project.

The technical bulletin titled *"Draft Aboriginal Consultation Guide for preparing an Renewable Energy Approval (REA) Application"* (MOE, 2011) provided additional information and guidance on First Nation consultation. The information presented in this guide is incorporated into this report, where required.

The following provides information related to the Aboriginal consultation completed for the Project.

### 5.1 Aboriginal Communities Consultation List

On August 27, 2010, the Proponent provided the MOE with the draft Project Description Report and requested a list of Aboriginal communities to consult with. A letter was included in the draft Project Description Report, and is included in Appendix F. As per O. Reg. 359/09, the submission of the Project Description Report is required in order for the MOE to provide a list of the Aboriginal communities that the Proponent is to consult with.

On September 23, 2010, MOE provided the list of Aboriginal communities to Hatch, and this list is contained in Appendix H.

#### 5.1.1 Summary of Aboriginal Communities Consulted

A summary of Aboriginal communities consulted, and the distribution of Project Reports and Notices are contained in Table 5.1.

Even though the Métis Nation of Ontario (MNO) were not on the MOE Aboriginal community list, the MNO was added to the list.

**Table 5.1 Summary of Aboriginal Communities Consulted**

Aboriginal Communities Identified by MOE	Notice of Proposal and First Public Meeting	Summaries and Project Reports/ Notice of Final Public Meeting (September 24, 2011)	Revised Project Reports/ Notice of Final Public Meeting (November 12, 2011)	Revised Project Reports/ Notice of Public Meeting (May 12, 2012)

## 5.2 Consultation Activities

### 5.2.1 First Public Meeting and Notice

The combined Notice of Proposal to Engage in a Renewable Energy Project and Notice of Public Meeting was sent to the Aboriginal communities on the list as identified in Table 5.1 on October 15, 2010. With the Notice, a letter was included which, as per O. Reg. 359/09, requested written information regarding any potential impacts and possible mitigating measures for any potentially impacted treaty or constitutional protected lands. Appendix I contains copies of the letters that were sent to each Aboriginal community.

The combined Notice of Proposal to Engage in a Renewable Energy Project and Notice of Public Meeting was placed in the *Turtle Island News* on Wednesday October 20, 2010 and Wednesday October 27, 2010 (Appendix B). This newspaper has circulation within the Six Nations of the Grand and has a weekly circulation of around 20,000.

The combined Notice of Proposal to Engage in a Renewable Energy Project and Notice of Public Meeting was also placed in the *Akwesasne Indian Notes and Times* on Thursday October 21, 2010 and Thursday October 28, 2010 (Appendix B). This newspaper has circulation within the Mohawks of Akwesasne territories.

Section 2.3.1 above provides information on the first public meeting. No individuals identified themselves at the first public meeting as being from an Aboriginal community.

#### **5.2.2 Final Public Meeting and Notice - September 24, 2011**

On July 21, 2011, after all Project documents were drafted, Aboriginal communities on the list as identified in Table 5.1 were provided summaries of all reports and copies of all draft REA supporting documents. Copies of the letters sent to each community are contained in Appendix I. This letter also included the Notice of Final Public Meeting sent on July 26, 2011. Appendix B contains a copy of the Notice.

In August and September 2011, Hatch phoned all Aboriginal communities that were sent copies of the draft REA supporting documents for review to confirm receipt of the documents, identify if there were any questions that could be answered and confirm if the Aboriginal community planned on submitting comments regarding the Project. Results of those discussions are described in Table 5.2.

Section 2.3.2 above provides the details of the public meeting. No individuals who attended or signed in at the meeting identified themselves as being from an Aboriginal community.

#### **5.2.3 Final Public Meeting and Notice - November 12, 2011**

The Notice of Final Public Meeting was published in the *Turtle Island News* on Wednesday September 14, 2011, and again on Wednesday October 19, 2011. It was also published in the *Akwesasne Notes & Indian Times* on Thursday September 15, 2011 and again on Thursday October 20, 2011. Appendix B contains copies of the tear sheets.

A copy of the revised reports was sent on September 6, 2011 to each of the First Nation communities. It was noticed that a copy of the Notice of Final Public Meeting was not present with the original courier packages sent on September 6, 2011, therefore an additional courier package was sent on September 9, 2011. Copies of these letters are found in Appendix I.

Section 2.3.3 above provides the details of the public meeting. No individuals who attended or signed in at the meeting identified themselves as being from an Aboriginal community.

#### **5.2.4 Public Meeting and Notice – May 12, 2012**

The Notice of Public Meeting was published in the *Chatham Daily* on Saturday April 28, 2012 and again on Saturday May 5, 2012.

On April 28, 2012 the Notice of Public Meeting, along with a letter indicating revised copies of the REA documents will be provided was sent to all First Nation communities. A copy of the revised

reports were sent on May 3, 2012 to each of the First Nation communities. Copies of these letters are found in Appendix I.

Section 2.3.4 above provides the details of the public meeting. No individuals who attended or signed in at the meeting identified themselves as being from an Aboriginal community.

### 5.2.5 Other Consultation

Table 5.2 summarizes the additional consultation activities completed for the Aboriginal communities.

**Table 5.2 Details of Consultation Activities**

Community / Group	Details of Additional Consultation Activities
Caldwell First Nations	<p>Hatch left a voicemail message on September 6, 2011. No response was received.</p> <p>On October 27, 2011, a member from Caldwell First Nation visited the Project office in Blenheim to ask whether a meeting had been set up with Chief and Council. At that time, no meeting had been scheduled.</p> <p>Correspondence was sent on January 19, 2012 to determine whether there were any outstanding comments or concerns regarding the Project. Hatch spoke to Donna Dodge, Administration on January 26, 2012 who stated that Chief and Council have not reviewed the information, and they would respond with any comments or concerns should they have any.</p> <p>On March 1, 2012, Pattern left a message with the Chief Hiller to set up a meeting to discuss the Project. No response as of the date of this report.</p> <p>On May 14, 2012, further discussions continued to agree upon a date for a meeting. Appendix J contains further communications.</p>
Oneida Nation of the Thames	<p>Hatch left a voicemail message on September 6, 2011. No response was received. Correspondence was sent on January 19, 2012 to determine whether there were any outstanding comments or concerns regarding the Project. Hatch spoke with April Varewyck, Environmental Coordinator on January 26, 2012. She stated that the consultation person has not looked at the information, but they would respond with any comments or concerns should they have any.</p>
Six Nations of the Grand River	<p>Hatch left a voicemail message for the Chief's assistant on September 6, 2011. No response has been received to date. Correspondence was sent on January 31, 2012 to determine whether there were any outstanding comments or concerns regarding the Project. Hatch spoke with Paul General, Wildlife Eco-Centre Manager, on February 8, 2012. He stated that he would be looking at the information and would contact us with any comments or questions should he have any.</p>
Six Nations of the Grand River Haudenosaunee Confederacy Council	<p>Hatch left a voicemail message on September 6, 2011. No response has been received to date.</p>

Community / Group	Details of Additional Consultation Activities
Bkejwanong Territory Walpole Island First Nation	<p>The Proponent met with the Walpole Island First Nations on June 15th, 2011. The Proponent provided a description of the Project, update and timeline. The representative of the Walpole Island First Nation commented that his group had interest in assisting with archaeology support.</p> <p>Hatch left a voicemail message on September 6, 2011. No response was received. Correspondence was sent on January 19, 2012 to determine whether there were any outstanding comments or concerns regarding the Project. Hatch left a voicemail to follow-up with the Chief's Executive Assistant on January 26, 2012, who returned the call on January 27, 2012 and referred Hatch to Dean Jacobs, Management Consultant at the Heritage Centre who reviews consultation material for the community. Hatch left a voicemail for Dean Jacobs on January 27, 2012, who returned the call on January 31, 2012. Mr. Jacobs stated a concern regarding the need to assess cumulative effects and specifically the effects to hunting waterfowl in the community's traditional area. He has requested a meeting with the proponent and Hatch to discuss issues such as these. The proponent is currently working with Mr. Jacobs to arrange a meeting and consultation remains ongoing. In the interim, Mr. Jacobs plans to review the REA documents and respond with any additional concerns.</p> <p>Pattern met with WIFN on March 6, 2012 to discuss the Project and any concerns WIFN may have. Key discussion points were: the archaeological studies being completed on site, artefact identification and ownership; Master Plan of Aboriginal activity in the area; watershed management project; and migratory bird routes. The discussions resulted in the planning of an artefact information night, provision of information related to artefact ownership from Walpole Island First Nation, information from Walpole Island in what is required for the Master plan of Aboriginal activity, information from Walpole Island First Nation on the location of the watershed in relation to the SKWP and prioritizing and collecting information related to the migratory birds by Walpole Island First Nation. Consultation with Walpole Island First Nation on these issues will continue.</p>
Chippewas of the Thames First Nation	<p>Hatch left a voicemail message on September 6, 2011. No response was received. Correspondence was sent on January 19, 2012 to determine whether there were any outstanding comments or concerns regarding the Project. Hatch left a voicemail to follow-up with Candice Deleary, Chief's Assistant on January 26, 2012.</p> <p>On March 16, 2012 a letter dated February 6, 2012, was received stating they would like to discuss the potential impacts of the Project</p> <p>On April 24, 2012, a meeting took place discussing the Project and the concerns of the community.</p> <p>A letter, dated April 27, 2012, further articulates the concerns.</p> <p>A response, dated May 14, 2012, was provided to First Nation.</p>

Community / Group	Details of Additional Consultation Activities
Chippewas of Kettle and Stony Point First Nation	Hatch spoke with Administration on September 6, 2011, who indicated that they would be calling with comments in the following week. No response was received. Correspondence was sent on January 19, 2012 to determine whether there were any outstanding comments or concerns regarding the Project. Hatch left a voicemail to follow-up with Sue Bazette, Communications Relations Officer on January 26, 2012. Hatch spoke to Ms. Bazette on February 8, 2012, who stated that she was preparing a response to acknowledge receipt of our correspondence as well as any comments or concerns the community may have with the proposed Project.
Munsee-Delaware Nation	Hatch spoke with Administration on September 6, 2011 who confirmed that the REA documents had been received and that they would call with any questions. Correspondence was sent on January 19, 2012 to determine whether there were any outstanding comments or concerns regarding the Project. Hatch left a voicemail to follow-up with the Chief on January 26, 2012. No response has been received.
Aamjiwnaang First Nation	On March 24, 2011 a letter was sent to Hatch stating the information has been logged and will be sent to Chief and Council for review. On July 25, 2011 following the submission of the REA supporting documents, further correspondence was received indicating the information has been logged and will be sent to the Health and Environment Committee and then on to Chief and Council. Hatch sent additional correspondence on January 19, 2012 to determine whether there were any outstanding comments or concerns regarding the Project. Hatch left a voicemail to follow-up with Sharilyn Johnston, Environmental Officer on January 26, 2012. No response has been received.
Wahta First Nation	Hatch spoke to the Council Assistant on September 6, 2011 who indicated that they would confirm receipt of the REA documents and respond. No response has been received to date. Correspondence was sent again on January 19, 2012 to determine whether there were any outstanding comments or concerns regarding the Project. Hatch left a voicemail to follow-up with Sandra, the Administrator on January 26, 2012 offering to discuss any comments or concerns that they may have with the Project. Sandra responded stating that the community would not be providing any comments or questions on the documents provided as the community lacks sufficient resources to review the Project.
Mohawks of the Bay of Quinte	Hatch left a voicemail message on September 6, 2011. No response has been received to date. Correspondence was sent on January 19, 2012 to determine whether there were any outstanding comments or concerns regarding the Project. Hatch left a voicemail to follow-up with Kristen Maracle, Environmental Officer on January 26, 2012. No response has been received.
Mohawks of Akwesasne	On November 3, 2010 a letter was sent to Hatch expressing an interest in any archaeological findings in the area. The complete Stage 1 and Stage 2 archaeological assessments for the Project were provided on July 25, 2011, with updated reports provided on September 6, 2011. Additionally, ASI has conducted additional consultation with Aboriginal communities around the archaeological assessments (see information below this table). Further correspondence was sent on January 19, 2012 to determine whether there were any outstanding comments or concerns regarding the Project. Hatch left a voicemail to follow-up with Bridget Philips on January 26, 2012. No response has been received.

Community / Group	Details of Additional Consultation Activities
Delaware Nation (Moravian of the Thames)	<p>Hatch left a voicemail message on September 6, 2011. No response has been received to date. Correspondence was sent on January 19, 2012 to determine whether there were any outstanding comments or concerns regarding the Project. Hatch spoke with Colleen of the Administration on January 26, 2012 who stated that the Chief was reviewing the information and would respond with any comments or concerns should they have any.</p> <p>On March 1, 2012, Pattern left a message with the Chief of the Delaware Nation to set up a meeting to discuss the Project. No response as of the date of this report.</p>
Métis Nation of Ontario, Consultation Unit and Windsor-Essex Métis Council	<p>In May 2011, the MNR contacted Hatch to request a meeting. On September 13, 2011, a meeting was held in Windsor with representatives from MNR and the Proponent. The main items discussed were:</p> <ul style="list-style-type: none"> <li>• Métis support of the Project</li> <li>• History of Metes in the province</li> <li>• Consultation process with the Métis</li> <li>• Cumulative effects on geese</li> <li>• Location on cold water streams in the area (information provided subsequent to the meeting)</li> <li>• Employment opportunities on the Project for the Métis</li> <li>• Métis would like a general relationship agreement with Samsung</li> <li>• Areas where Pattern could assist with the Métis community in particular on cultural activities and educational activities</li> <li>• Letter is to be provided by the Métis.</li> </ul> <p>There are no outstanding issues with respect to the items discussed at the September 13, 2011 meeting. Amendments to the Project or the Project reports did not occur as a result of the meeting. Correspondence was sent on January 19, 2012 to determine whether there were any outstanding comments or concerns regarding the Project. Hatch left a voicemail for James Wagar on January 26, 2012 as a follow up to the January 19, 2012 correspondence. No response has been received to date.</p>

In addition to the consultation efforts detailed above, Archaeological Services Inc. (ASI) initiated engagement with those potentially interested Aboriginal communities listed in Table 5.1 to solicit comments and input regarding potential Aboriginal concerns with regard to the Stage 3 archaeological assessments and Stage 4 mitigations as recommended in the Stage 2 Archaeological Assessment.

The Aboriginal communities were invited by ASI to participate at a meeting on December 1, 2011 at 57 Talbot St. W, Blenheim, Ontario, from 1 to 3 pm to initiate the discussions. In addition to ASI staff, this meeting was attended by representatives of BowArk, Pattern Energy Group and Walpole Island First Nation (WIFN). Some key issues discussed at this meeting included the possibility of WIFN members being hired as field archaeologists; a plain-language presentation about the Project (focused on the archaeology component) to the WIFN community; and determining the cumulative effect of the project on the WIFN community.

An additional meeting with Six Nations of the Grand River took place on December 21, 2011 and was attended by representatives of Pattern Energy Group in addition to ASI staff. Some key issues discussed included interest in having Six Nation archaeological monitors present on site and an inquiry as to whether there were any issues raised by MNR.

Copies of other correspondence as described within this Section can be found in Appendix J.

### 5.3 Aboriginal Comments and Concerns

The Proponent supports the use of traditional Aboriginal knowledge and through this consultation process aims to provide a method to incorporate this knowledge and to address any comments or concerns about the Project from the Aboriginal perspective.

Table 5.3 provides the comments/concerns from the Aboriginal communities, the Proponent response and if or how the Project was altered in response to the comments/concerns. There are no comments that remain outstanding.

**Table 5.3 Summary of Aboriginal Comments and Responses**

<b>Comment or Concern</b>	<b>Response</b>	<b>Amendments to Project or Project Reports</b>
<u>Metis Nation of Ontario</u> <u>Comment Received During Meeting</u> <u>on September 13, 2011</u> <i>And</i> <u>Walpole Island First Nation Comment</u> <u>Received During Conversation on</u> <u>January 31, 2012</u> Concerned about the cumulative effects of all the wind projects in the area to geese/waterfowl.	To our knowledge, no studies have been completed on the cumulative effects to geese/waterfowl from multiple wind power Projects. Since cumulative effects is not a requirement under the REA process, it was suggested that they contact the Ministry of Natural Resources.	n/a
<u>Metis Nation of Ontario</u> <u>Comment Received During Meeting</u> <u>on September 13, 2011</u> Where are the cold water streams located on the Project.	Since the answer was not known at the time of the meeting, a subsequent email with the answer was provided. The answer is: there are no cold water streams on the streams with the Project area.	n/a
<u>Six Nations of the Grand River</u> <u>Comment Received During Meeting</u> <u>on December 21, 2011</u> Did the MNR raise any issues with the Project?	The Project has received confirmation from the Ministry of Natural Resources that it has addressed the requirements of the Natural Heritage Assessment.	n/a
<u>Chippewas of the Thames First Nation</u> <u>Concerned about Aboriginal rights</u>	Comments and requests are noted. With respect to your land claim, we would note we are siting our Project on private lands and settlement claims are a matter for the Crown.	n/a
<u>Chippewas of the Thames First Nation</u> <u>Concern about the impact on the</u> <u>potential for hunting and fishing,</u> <u>specially the impact on avian</u> <u>populations.</u>	The effects to significant bird and bird habitats is discussed in Sections 4.4.3 of the Natural Heritage Environmental Impact Assessment report, as stipulated by provincial regulations. Additional	n/a

Comment or Concern	Response	Amendments to Project or Project Reports
	<p>assessment (effects and proposed mitigation) of generalized bird and bird habitats is discussed in Section 4.6 of the Construction Plan Report and the proposed monitoring plan is provided in Section 5 of the Design and Operations Report. With respect to wetlands and woodlots in the Point Pelee and Rondeau, the Project will have no impact in these areas as the Project footprint does not go into these two areas. With respect to your concern on the term wildlife avoidance, the use of this term avoidance is to imply that wildlife would avoid or move away from the immediate area where construction and operations are taking place. As shown by Kingsley and Whittam 2005, birds for example have a learned avoidance of turbines. This item is further discussed in Section 5 of the Design and Operation Report. Wildlife avoidance did not mean that wildlife would experience mortality, expiration or extinction from the Project. In regards to your concern regarding synonymous monitoring for migratory birds and breeding birds, there are two different monitoring programs as described in Section 5 of the Design and Operations Report. Migratory bird monitoring is to take place for up to 3 years following construction, from May 1 to October 31, and an additional month, November, for raptor bird species as explained in the Design and Operation Report. The Natural Heritage Environmental Impact Study provides the information in regards to the breeding bird studies, which are to take place in June and July of 2012 to confirm the significance of each habitat and determine the species composition. Avian monitoring was undertaken for the Project and has been identified in the Natural Heritage Site Investigation Report. Avian modelling was not undertaken for the Project, as it has not been required by the government authorities.</p>	
Chippewas of the Thames First Nation	As a part of the significant wildlife habitat,	n/a

Comment or Concern	Response	Amendments to Project or Project Reports
<u>Concern for the impact on bee colonies and butterflies as this could impact plant harvests.</u>	migratory butterfly stopover areas are considered in the Natural Heritage Site Investigation Report, as a part of Seasonal Concentration Areas. According to guidelines outlined in the Significant Wildlife Technical Guideline, the Project area does not meet the criteria for migratory butterfly stopover area and therefore an assessment of the impacts was not required. With respect to bees, upon a literature search, there was no information related to the impact of bees by wind turbines.	
<u>Chippewas of the Thames First Nation Concern for decommissioning of access road and potential impact on soils. When will snowing clearing and/or use of salt of the access roads occur?</u>	With respect to decommissioning of access roads, as mentioned in the Decommissioning Plan Report, this will be completed in accordance with the landowner's requirements. If the landowner wishes to maintain the improved access road, that access road will be maintained. If the access road is to be decommissioned, aggregate will be sent to an approved recycling facility in Ontario. Any contamination of the aggregate or otherwise will be cleaned up by Pattern during decommissioning. Testing will occur if there is evidence of contamination (e.g. staining of soil or aggregate by petroleum hydrocarbons). If contaminated, the material will be managed in accordance with provincial legislation and requirements. With respect to maintenance of access roads, since the turbines will be accessed approximately once per month, snow ploughing will occur on an intermittent basis and there is no intent of salting.	n/a
<u>Chippewas of the Thames First Nation Concern for the impact of seismic activity on individual turbines and the cumulative impact on turbines.</u>	According to Natural Resources Canada, the area of the Project has relatively low potential for seismic interruptions.	n/a
<u>Chippewas of the Thames First Nation Expressed a desire to see the plan for the disposal of waste from component updates and from decommissioning</u>	The plan for the disposal of waste materials is discussed in the Decommissioning Plan Report. The report states that the generator, tower, electrical appurtenances and wiring will be sold for scrap value while the blades, if economically feasible will be recycled or	n/a

Comment or Concern	Response	Amendments to Project or Project Reports
	otherwise, sent to an approved waste facility.	
<u>Chippewas of the Thames First Nation Concern about the loss of farmland in South Ontario. Provide suggestions for compensating by using under-utilized First Nation farm land.</u>	With wind turbine projects and as is the case for the South Kent Wind Project, cultivation can and does occur around the turbines. Typically, access roads are located on the edge of the land and therefore have little impact on the use of agricultural land. In most cases the landowner has requested that the access roads be located in an area so that loss of agricultural land does not occur.	n/a
<u>Chippewas of the Thames First Nation Concerned about the loss of woodlands and wetlands. Provide suggestions for compensation by using First Nation land.</u>	Based on the revised Natural Heritage Environmental Impact Assessment report, there is no loss of woodlots or wetlands or impact to critical root structure of trees as a result of the South Kent Wind Project; however there will be some minor tree removal within a select few woodlots.	n/a
<u>Chippewas of the Thames First Nation Concerned about dust during operations.</u>	Access roads will be composed of gravel roads, and will only be used for maintenance activities. As such, the amount of dust anticipated to be generated is minor and the use of dust controlling measures will not be necessary.	n/a

## 6. Conclusions

Since August 2010, the stakeholder engagement program for the South Kent Wind Project has been active. There has been open dialogue with the public, agencies, Aboriginal groups and the local municipality regarding the Project. In addition to communications via letters, meetings, email and phone calls, there were public meetings hosted by the Proponent to further encourage discussion and comment on the Project. The purpose of this Consultation Report is to ensure a transparent and meaningful consultation process for all participants with an interest in the Project, where all comments and questions received are documented, reviewed and addressed.

As a result of these opportunities for comment, several issues were raised that have been considered as part of the Project assessment, and provided additional guidance towards the scope of the studies. These issues were considered and incorporated into the REA application documents, as appropriate.

### *Notices and Sample Letters*

October 15, 2010

«Property\_Owner\_Name\_»  
«Address\_Including\_PO\_Box»  
«City\_», «Province\_»  
«Postal\_Code\_»

Dear «Property\_Owner\_Name\_»:

**Subject: Notice of a Proposal and Notice of Public Meeting  
Samsung Renewable Energy Inc. and Pattern Energy – South Kent Wind Project**

Samsung Renewable Energy Inc. and Pattern Energy (hereinafter referred to as the “Proponent”) are proposing to construct a wind project in the Municipality of Chatham Kent, south of Highway 401, between the towns of Tilbury and Ridgetown. The proposed project is named the South Kent Wind Project (the “Project”) and will have an installed nominal capacity of 270 MW.

This proposed Project requires a Renewable Energy Approval (REA) issued in accordance with the provisions of the Ontario Environmental Protection Act Part V.0.1 and Ontario Regulation 359/09. Hatch Ltd. (Hatch) has been retained to assist the Proponent in meeting the REA requirements.

The Proponent is undertaking a public consultation program in support of the Project and we would like to invite you to the upcoming Public Meeting. Please find attached a “Notice of a Proposal to Engage in a Renewable Energy Project and Notice of Public Meeting”, which details the time and date of the planned meeting. This Notice will be published in the Chatham Daily News on October 21, 2010 and October 28, 2010. The Public Meeting will provide the public with an opportunity to learn more about the proposed Project and the Proponent.

In accordance with Section 16 (3) of Ontario Regulation 359/09, a “Draft Project Description Report” and associated information pertaining to this Project and the Proponent may be found online at: [www.southkentwind.ca](http://www.southkentwind.ca). Additionally, a copy of the “Draft Project Description Report” is available at the Chatham-Kent municipal office for your review. We would appreciate any comments, queries or information you may have that are relevant to the proposed Project.

# NOTICE OF A PROPOSAL AND NOTICE OF A PUBLIC MEETING

By Samsung Renewable Energy Inc. and Pattern Energy  
to Engage in a Renewable Energy Project

**Project Name:** South Kent Wind Project

**Project Location:** The Project is located in the Municipality of Chatham-Kent, south of Highway 401 between the communities of Tilbury and Ridgeway.

**Dated at the Municipality of Chatham-Kent this the 21st of October 2010**

Samsung Renewable Energy Inc. and Pattern Energy are planning to engage in a renewable energy project in respect of which the issuance of a renewable energy approval is required. The distribution of this notice of a proposal to engage in this renewable energy project and the project itself are subject to the provisions of the *Environmental Protection Act (Act) Part V.0.1* and Ontario Regulation 359/09 (Regulation). This notice must be distributed in accordance with section 15 of the Regulation prior to an application being submitted and assessed for completeness by the Ministry of Environment.

## Meeting Locations:

**Date:** Monday, November 22, 2010

**Time:** 5:00 pm to 9:00 pm

**Place:** Blenheim Golf Club, 439 Chatham Street South,  
Blenheim, ON

---

**Date:** Tuesday, November 23, 2010

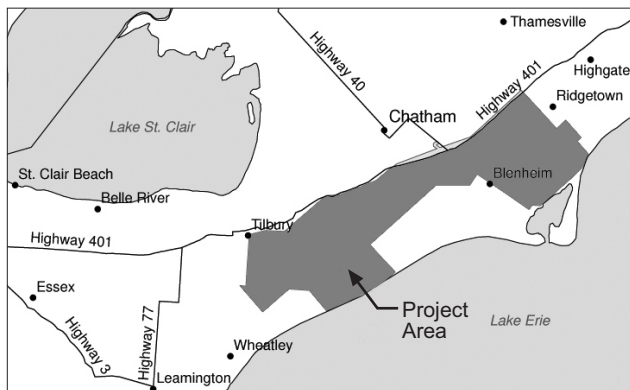

**Time:** 5:00 pm to 9:00 pm

**Place:** Tilbury Arena, Ryder Hall, 55 Bond Street, Tilbury, ON

## Project Description:

Pursuant to the Act and Regulation, the facility, in respect of which the project is to be engaged in, is considered to be a Class 4 wind facility. If approved, this facility would have a total maximum name plate capacity of up to 270 MW.

The Project area is shown in the map below:

This project is being proposed in accordance with the requirements of the Act and Regulation. The Draft Project Description Report for the *South Kent Wind Project* describes the facility as a Class 4 wind facility with a name plate capacity of up to 270 MW anticipated to consist of Siemens 101 (2.221 MW) turbines to generate electricity. A collector system, consisting of above and below ground cables, will connect each wind turbine to three (3) substations which will house transformers to step-up the voltage from 34.5 kV to 115 kV or 230 kV for transmission to the Chatham TS. A written copy of the Draft Project Description Report for the South Kent Wind Project is being made available for public inspection at [www.southkentwind.ca](http://www.southkentwind.ca) and at your local municipal office.

## Man charged in assault on boy

Brantford Police received a complaint that a 12-year-old male had been sexual assaulted at a residence in the City of Brantford. Members of the Brantford Police

Service Vice Unit conducted an investigation into the allegations made by the victim who was known to the accused. As a result, Scouter Ronald Ernest

WARD (64 years) of Marlborough Street, Brantford has been charged with one count of Sexual Assault and one count of Sexual Interference. He will appear in a

Brantford court in November for his first appearance.

## Six Nations Native Pageant Hold Spaghetti Dinner Fundraiser

By Dakota Brant  
Writer

Last Friday had an aroma of good eats and fun atmosphere at the Six Nations Vets hall, as the Six Nations Native Pageant (SNNP) committee held its Spaghetti lunch and dinner fundraiser.

The SNNP did the fundraiser to secure funds to maintain the Six Nations Forest Theatre pageant grounds on Seneca Road through-

out the winter months. "Were not for profit" said SNNP President Cam Staats, "We depend on sponsors to keep us going."

SNNP committee members and supporters filled the Vets' Hall kitchen with spaghetti dinners for both dine-in and take out.

The SNNP has a busy autumn ahead of them. They will be hosting their popular annual Haunted Hayride October 27-30 at 6-9pm at the Pageant grounds. They are

also looking for vendors interested and inviting everyone to take part in their Christmas Bazaar at the Six Nations Community Hall on November 6th. All of their fundraising efforts are working toward maintaining a 63 year tradition of teaching Six Nations history through theatre.

"Emily C. General founded the pageant because she realized that a lot of our people did not know our own history," said Staats as

he handed out plates of spaghetti. General, an educator in the Six Nations community, began the Pageant with the help of the Indian Defense League of America. It was through the original efforts of the IDLA that the theatre began its mandate to portray Six Nations' history from a local and accurate perspective.

"We take a moment of Six Nations' history, a person or an event or story and portray it

though live theatre," Staats continued. "We are an oral people and theatre is our portrayal of that history, that storytelling."

The SNNP production is going onto its 63rd year. The SNNP is currently seeking community members to submit a play that they would like to see produced and is looking for a director.

All community members are welcome to join the SNNP at their weekly meetings Mondays at 7pm at the Social Services boardroom.

## Six Nations Mourns loss of Jake Tekaronian:ken Swamp

By Dakota Brant  
Writer

Jacob Tekaronian:ken Swamp, a Mohawk Wolf clan citizen of Akwesasne and revered elder of the Six Nations Haudenosaunee Confederacy, sadly passed away last Thursday. He took his place among his ancestors after losing a battle with pneumonia.

Tekaronian:ken (Mohawk meaning "Where two skies come together") was born 1941 and raised on the Akwesasne Mohawk Nation Territory. His unwavering faith in the Haudenosaunee people helped him serve as a Mohawk sub-chief for over 30 years. He was a fluent Mohawk speaker and a valued and committed member of the long-

house ceremonial community.

His responsibilities to the Mohawk Nation prepared him for a political life, as he became a public defender of the Rights and Freedoms of the Indigenous Peoples of the Americas. He frequented Geneva, Switzerland and the United Nations in New York City as an official delegate of the Haudenosaunee Six Nations Confederacy. He participated as a young man in the 1969 blockade of the International Seaway Bridge. He was part of a contingent involved with negotiations

after the Wounded Knee occupation. Swamp was a participant in the Longest Walk, and defended Mohawk Lands during the reclamation of Ganienkeh.

To his own Nation Jake served as a source of pride, inspiring entire generations of Mohawk citizens. He was instrumental in the creation of the Akwesasne Freedom School, was Director of the Environmental Education project that introduced aqua-culture to the Akwesasne community. He also managed C.K.O.N, the Akwesasne radio station and developed Mo-

hawk language programming that inspired listeners and redefined Mohawk language use and identity for the entire community. He was a crusader for the healing and welfare of our men, having worked with men on domestic violence issues and facilitated the "Men for Change" program at the Iethinisténha Family Violence Shelter in Akwesasne.

Perhaps his most cherished contribution to the world was the founding of the Tree of Peace society. Since 1982, Jake had served as President of the Tree of Peace Society, and planted White Pine trees the world over. These trees symbolized the establishment of Peace in all directions, reminiscent of the formation of the Haudenosaunee Six Nations Confederacy and the Great Law of Peace.

Jake, with his loving wife Judy, travelled the world, doing tree planting ceremonies in places such as Israel, Australia, South America, England, Belgium, Holland, Switzerland, Italy, Morocco, Japan, Thailand, France, Germany and Sweden. He has also planted trees at over 20 colleges and universities in the United States and Canada. It is estimated that some 200 million trees have been planted around the world, inspired by his efforts.

Jake lived his life and passed on the Akwesasne Mohawk Nation. Along with his beloved wife Judy, they are the proud parents of seven children, 23 grandchildren and 13 great grandchildren.

Jacob Tekaronian:ken Swamp was laid to rest at the Mohawk Nation Longhouse this past Monday. His funeral was witnessed by hundreds from all corners of the Haudenosaunee Confederacy and around the world.

### NOTICE OF A PROPOSAL AND NOTICE OF A PUBLIC MEETING

By Samsung Renewable Energy Inc. and Pattern Energy  
to Engage in a Renewable Energy Project

**Project Name:** South Kent Wind Project

**Project Location:** The Project is located in the Municipality of Chatham-Kent, south of Highway 401 between the communities of Tilbury and Ridgeway.

**Dated at the Municipality of Chatham-Kent this the 21st of October 2010**

Samsung Renewable Energy Inc. and Pattern Energy are planning to engage in a renewable energy project in respect of which the issuance of a renewable energy approval is required. The distribution of this notice of a proposal to engage in this renewable energy project and the project itself are subject to the provisions of the *Environmental Protection Act (Act) Part V.0.1* and Ontario Regulation 359/09 (Regulation). This notice must be distributed in accordance with section 15 of the Regulation prior to an application being submitted and assessed for completeness by the Ministry of Environment.

#### Meeting Locations:

**Date:** Monday, November 22, 2010

**Time:** 5:00 pm to 9:00 pm

**Place:** Blenheim Golf Club, 439 Chatham Street South, Blenheim, ON

**Date:** Tuesday, November 23, 2010

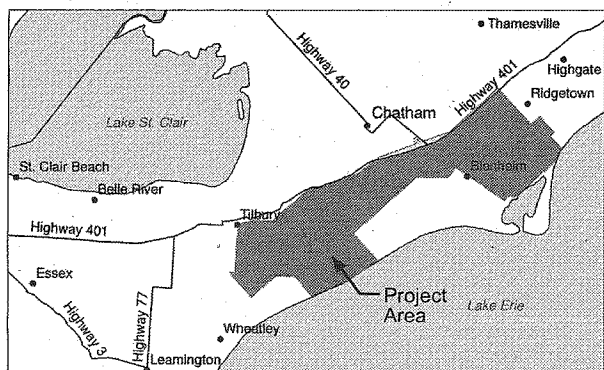

**Time:** 5:00 pm to 9:00 pm

**Place:** Tilbury Arena, Ryder Hall, 55 Bond Street, Tilbury, ON

#### Project Description:

Pursuant to the Act and Regulation, the facility, in respect of which the project is to be engaged in, is considered to be a Class 4 wind facility. If approved, this facility would have a total maximum name plate capacity of up to 270 MW.

The Project area is shown in the map below:

This project is being proposed in accordance with the requirements of the Act and Regulation. The Draft Project Description Report for the South Kent Wind Project describes the facility as a Class 4 wind facility with a name plate capacity of up to 270 MW anticipated to consist of Siemens 101 (2.221 MW) turbines to generate electricity. A collector system, consisting of above and below ground cables, will connect each wind turbine to three (3) substations which will house transformers to step-up the voltage from 34.5 kV to 115 kV or 230 kV for transmission to the Chatham TS. A written copy of the Draft Project Description Report for the South Kent Wind Project is being made available for public inspection at [www.southkentwind.ca](http://www.southkentwind.ca) and at your local municipal office.

## NOTICE OF A PROPOSAL AND NOTICE OF A PUBLIC MEETING

By Samsung Renewable Energy Inc. and Pattern Energy  
to Engage in a Renewable Energy Project

**Project Name:** South Kent Wind Project  
**Project Location:** The Project is located in the Municipality of Chatham-Kent, south of Highway 401 between the communities of Tilbury and Ridgeway.  
**Dated at the Municipality of Chatham-Kent this the 21st of October 2010**

Samsung Renewable Energy Inc. and Pattern Energy are planning to engage in a renewable energy project in respect of which the issuance of a renewable energy approval is required. The distribution of this notice of a proposal to engage in this renewable energy project and the project itself are subject to the provisions of the *Environmental Protection Act (Act) Part V.0.1* and Ontario Regulation 359/09 (Regulation). This notice must be distributed in accordance with section 15 of the Regulation prior to an application being submitted and assessed for completeness by the Ministry of Environment.

### Meeting Locations:

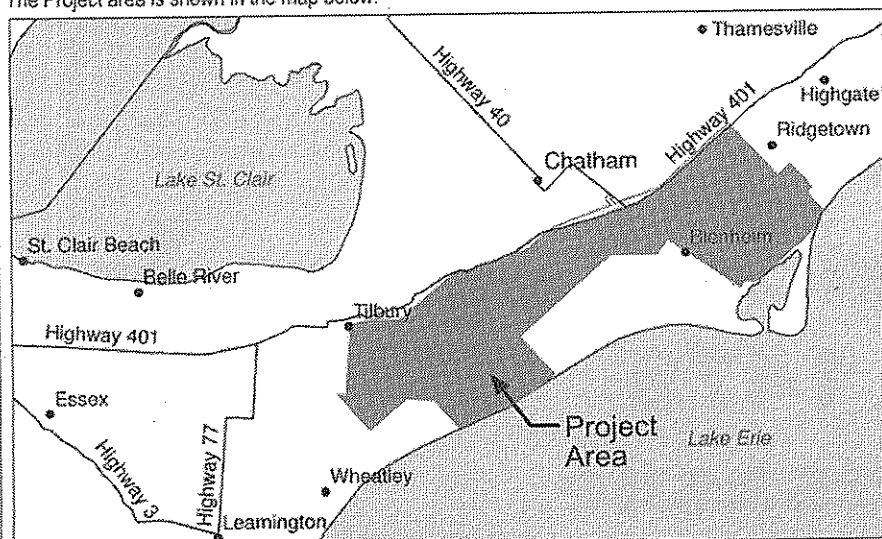

**Date:** Monday, November 22, 2010  
**Time:** 5:00 pm to 9:00 pm  
**Place:** Blenheim Golf Club, 439 Chatham Street South,  
Blenheim, ON

**Date:** Tuesday, November 23, 2010  
**Time:** 5:00 pm to 9:00 pm  
**Place:** Tilbury Arena, Ryder Hall,  
55 Bond Street, Tilbury, ON

### Project Description:

Pursuant to the Act and Regulation, the facility, in respect of which the project is to be engaged in, is considered to be a Class 4 wind facility. If approved, this facility would have a total maximum name plate capacity of up to 270 MW.

The Project area is shown in the map below:

This project is being proposed in accordance with the requirements of the Act and Regulation. The Draft Project Description Report for the *South Kent Wind Project* describes the facility as a Class 4 wind facility with a name plate capacity of up to 270 MW anticipated to consist of Siemens 101 (2.221 MW) turbines to generate electricity. A collector system, consisting of above and below ground cables, will connect each wind turbine to three (3) substations which will house transformers to step-up the voltage from 34.5 kV to 115 kV or 230 kV for transmission to the Chatham TS. A written copy of the Draft Project Description Report for the South Kent Wind Project is being made available for public inspection at [www.southkentwind.ca](http://www.southkentwind.ca) and at your local municipal office.

## NOTICE OF PUBLIC MEETING

By EffiSolar Energy Corporation to Engage in a Renewable Energy Project

**Project Name:** Cornwall A Solar Project

**Project Location:** The Project is located north of County Road 19, 0.7 km west of Cashions Glen.

**Dated at Township of South Glengarry this the 20th of October, 2010**

EffiSolar Energy Corporation is planning to engage in a renewable energy project in respect of which the issuance of a renewable energy approval is required. The proposal to engage in the project and the project itself are subject to the provisions of the *Environmental Protection Act (Act) Part V.0.1* and Ontario Regulation 359/09 (Regulation). This notice must be distributed in accordance with section 15 of the Regulation prior to an application being submitted and assessed for completeness by the Ministry of Environment. The meeting will be an open house format. Another public meeting will be held later in the process to provide more detailed information on the proposed Project.

This Public Meeting is being held to provide information on the proposed Project.

### Meeting Location:

**Date:** Monday, November 22, 2010

**Time:** 6:00 pm to 9:00 pm

**Place:** Char-Lan Recreation Centre, Community Hall, 19740 John Street, Williamstown, ON

### Project Description:

Pursuant to the Act and Regulation, the facility, in respect of which this project is to be engaged in, is a Class 3 Solar facility. If approved, this facility would have a total maximum name plate capacity of 10 MW. The Project location is described in the map below.

The Draft Project Description Report, titled *Site 9-Cornwall Solar Farm A* describes the Project as ground mounted solar collection array consisting of photovoltaic (PV) panels installed on fixed racking structures. The solar energy collected by the panels will be connected to a series of inverters and transformers and uploaded to the local electrical grid to provide Ontario consumers with clean energy from a totally renewable source. A written copy of the Draft Project Description Report was made available for public inspection on April 12, 2010 at [www.mannengineering.com](http://www.mannengineering.com).

### Project Contacts and Information:

## Cupcake Decorating

Wednesday, October 27th

The St. Regis Recreation will be  
hosting a Halloween-themed cup-  
cake decorating class for children of  
all ages. Cupcakes will be provided  
and Susie Jacobs will help families  
get creative and festive with their  
decorating. The event will take  
place from 6-8 p.m. Everyone is  
welcome and everyone will leave  
with their creation. Contact the St.  
Regis Recreation for more informa-  
tion at 575-2700.

## Annual Food & Craft Sale & Coat Giveaway

Sat. Nov. 6 at the Hogansburg United  
Methodist Church basement  
St. Regis Road, Hogansburg  
Our fund-raiser will begin at 10:00 am  
to 3:00 pm.

There will be craft tables with great  
ideas for Xmas gifts.

The menu will include: corn soup,  
fried bread, meat pies, fruit pies, mac.  
salad, baked goods, soda, coffee, water.

EVERYONE IS WELCOME.

For more info. please contact Dan  
Cook after 4:00 pm at 518-358-2665.

## Sewing Bee

On Saturday, October 30, 2010 the  
Akwasasne Cancer Support Group  
will be holding a sewing bee to make  
hats for cancer patients from 9 - 5 at  
the Senior Citizen's Building in Ho-  
gansburg.

Anyone interested in participating,  
we're looking for people with sewing  
machines to come out and join us.  
We also need people to help with set-  
ting and cutting out patterns.

Were looking for volunteers to come  
out and help us, for a good cause.

Anyone interested please call Char-  
lene Cole 358-3678, Delores Thomp-  
son 613-933-8938, or Edith Adams  
613-575-2871.

## St. Regis Recreation's Halloween Party

Come one, come all, to the St. Re-  
gis Recreation's annual Halloween  
Party and Costume Contest. Food  
and games will be provided and over  
\$500 in prizes will be awarded to  
those with the scariest, funniest and  
most original costumes in several  
age categories. Parents, don't forget  
to dress yourselves up, we have a  
Mommies and Daddies category too!

The party will be held Saturday,  
Oct. 30 from 2-5 p.m. This is a free  
event and everyone is welcome. For  
more information contact the St. Re-  
gis Rec at 575-2700.

**Subject: Notice of Final Public Meeting  
Samsung Renewable Energy Inc and Pattern Energy: South Kent Wind Project**

Samsung Renewable Energy Inc and Pattern Energy (hereinafter referred to as the "Proponent"), are proposing to construct a wind project within the Municipality of Chatham-Kent. The proposed project is named the South Kent Wind Project (the "Project") and will have an installed nominal capacity of 270 MW. This Project requires a Renewable Energy Approval (REA) issued in accordance with the provisions of the Ontario *Environmental Protection Act*, Part V.0.1 and Ontario Regulation 359/09. Hatch Ltd. (Hatch) has been retained to assist in meeting the REA requirements.

The Proponent is providing you with this notice to make you aware of the upcoming Public Meeting where you can learn more about this Project and the Proponents.

In accordance with Section 15 of O. Reg. 359/09, a Notice of Public Meeting has been prepared and a copy is enclosed. The Notice will be posted in *The Chatham Daily* on Monday, July 25, 2011 and again on Monday, August 22, 2011.

As per Section 17 (1) of O. Reg. 359/09, the draft copies of the supporting documents for the Project, including the Natural Heritage Assessment Reports, Water Body Assessment Reports, Construction Plan Report, Design and Operations Report, Decommissioning Plan Report, Noise Assessment Study, Wind Turbine Specifications Report and Stage 1 and 2 Archaeology Assessment Report are available for public review on-line at: [www.southkentwind.com](http://www.southkentwind.com). Hardcopies of the supporting documents for the Project are also available at:

Tilbury Library  
2 Queen Street  
Tilbury ON

Blenheim Library  
16 George Street  
Blenheim ON

Municipality of Chatham-Kent Civic Centre  
315 King Street West,  
Chatham, ON

The information provided in these reports will be discussed during the Final Public Meeting on Saturday September 24, 2011 at Tilbury Memorial Arena, Ryder Hall, 55 Bond Street, Tilbury, Ontario. Your comments, queries or information relevant to the proposed Project would be greatly appreciated. Comments will be accepted until Saturday, September 24, 2011.

Correspondence should be directed to:

Attachment – Notice of Final Public Meeting – South Kent Wind Project

# Notice of Final Public Meeting to be held by Samsung Renewable Energy Inc. and Pattern Energy Regarding a Proposal to Engage in a Renewable Energy Approval

**Project Name:** South Kent Wind Project  
**Project Applicant:** Samsung Renewable Energy Inc. and Pattern Energy  
**Project Location:** The Project is located south of Highway 401 between the Towns of Tilbury and Ridgetown (refer to draft site plan figure below) to the west and east, respectively, within the Municipality of Chatham-Kent in southwestern Ontario.  
**Dated At:** The Municipality of Chatham-Kent this the 26th of July, 2011

Samsung Renewable Energy Inc. and Pattern Energy (hereinafter referred to as the “Proponent”) are planning to engage in a renewable energy project in respect of which the issuance of a Renewable Energy Approval (REA) is required. The proposal to engage in the project and the project itself is subject to the provisions of the Environmental Protection Act (Act) Part V.0.1 and Ontario Regulation 359/09 (O. Reg. 359/09as amended under O. Reg. 521/10 (January 2011)). The notice must be distributed in accordance with section 15 of the Regulation prior to an application being submitted and assessed for completeness by the Ministry of the Environment.

The Final Public Meeting is being held to provide information on the proposed project. The Public Meeting will be an open house format.

**Meeting Location:**  
**Date:** Saturday September 24, 2011  
**Time:** 2:00 pm to 5:00 pm  
**Place:** Tilbury Memorial Arena, Ryder Hall, 55 Bond Street, Tilbury, ON

**Project Description:**  
Pursuant to the Act and Regulation, the facility, in respect of which this project is to be engaged in, is a Class 4 Wind Facility. If approved, this facility would have a total maximum nameplate capacity of up to 270 MW. The project location is shown in the map below.

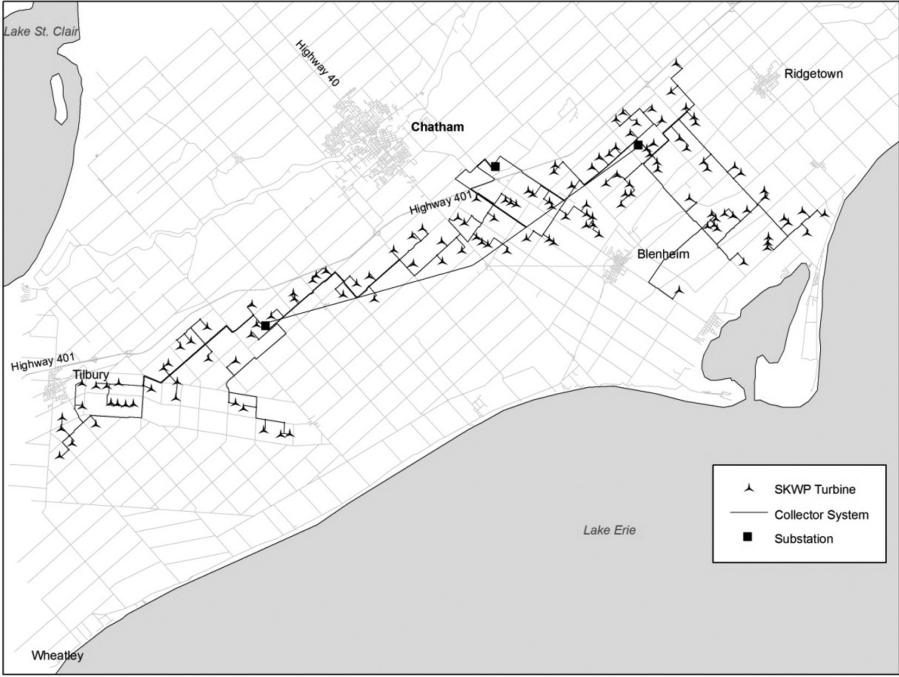

The Draft Project Description Report titled *Draft Project Description Report* describes the Project as a Class 4 Wind facility with a nameplate capacity of up to 270 MW consisting of approximately 130 wind turbines, as well as supporting infrastructure, including access roads, buried cables and overhead collector lines to generate electricity. A 34.1 km 230 kV transmission line and two (2) substations are required to step the voltage from 34.5kV to 230 kV to enable connection to the Chatham Switching Station (SS). A written copy of the Draft Project Description Report was made available for public inspection on October 21, 2010 at [www.southkentwind.com](http://www.southkentwind.com) and at the local municipal office. Further the applicant has prepared supporting documents as per Ontario Regulation 359/09.

Written copies of the draft supporting documents will also be made available for the public inspection on Tuesday July 26, 2011 at [www.southkentwind.com](http://www.southkentwind.com) and at the following locations:

# The Chatham Daily News

## ASSISTANT MANAGING EDITOR

The Chatham Daily News has an immediate opening for an assistant managing editor. The successful candidate will report directly to the managing editor and oversee a reporting/photography staff of six.

As a key member of the editorial team, the assistant managing editor is responsible for developing and distributing daily assignments, long-range planning for enterprise and feature projects across a multimedia platform, proofreading the bulk of locally generated content, helping to keep our website and social media sites updated, some video and photo editing, liaising with the public and will be heavily involved on decisions regarding story and photo positioning in the next day's print edition.

The position requires the ability to take direction and work well within a team atmosphere as well as work independently and develop assignments.

Organization and an attention to detail are vital.

### Qualifications:

Strong proofreading skills, knowledge of CP and Sun style, Adobe Photoshop, word processing and the ability to work in a team atmosphere are essential. Knowledge of Final Cut Express would be a bonus.

The candidate should have previous management experience in a newsroom, possess a degree or diploma in journalism and must be willing to relocate to Chatham-Kent.

### Hours of work:

This is an afternoon/evening position. Interested candidates should send their resumes no later than end of business September 2, 2011 to the attention of:

**Bruce Corcoran**  
Managing Editor  
Chatham Daily News  
bcorcoran@chathamdailynews.ca

We thank in advance all applicants for their interest. Only those candidates under consideration will be contacted. No phone calls or agencies please.

## Notice of Final Public Meeting to be held by Samsung Renewable Energy Inc. and Pattern Energy Regarding a Proposal to Engage in a Renewable Energy Approval

**Project Name:** South Kent Wind Project

**Project Applicant:** Samsung Renewable Energy Inc. and Pattern Energy

**Project Location:** The Project is located south of Highway 401 between the Towns of Tilbury and Ridgeway (refer to draft site plan figure below) to the west and east, respectively, within the Municipality of Chatham-Kent in southwestern Ontario.

**Dated At:** The Municipality of Chatham-Kent this the 26th of July, 2011

Samsung Renewable Energy Inc. and Pattern Energy (hereinafter referred to as the "Proponent") are planning to engage in a renewable energy project in respect of which the issuance of a Renewable Energy Approval (REA) is required. The proposal to engage in the project and the project itself is subject to the provisions of the Environmental Protection Act (Act) Part V0.1 and Ontario Regulation 359/09 (O. Reg. 359/09) amended under O. Reg. 521/10 (January 2011). The notice must be distributed in accordance with section 15 of the Regulation prior to an application being submitted and assessed for completeness by the Ministry of the Environment.

The Final Public Meeting is being held to provide information on the proposed project. The Public Meeting will be an open house format.

### Meeting Location:

Date: Saturday September 24, 2011

Time: 2:00 pm to 5:00 pm

Place: Tilbury Memorial Arena, Ryder Hall, 55 Bond Street, Tilbury, ON

### Project Description:

Pursuant to the Act and Regulation, the facility, in respect of which this project is to be engaged in, is a Class 4 Wind Facility. If approved, this facility would have a total maximum nameplate capacity of up to 270 MW. The project location is shown in the map below.

The Draft Project Description Report titled *Draft Project Description Report* describes the Project as a Class 4 Wind facility with a nameplate capacity of up to 270 MW consisting of approximately 130 wind turbines, as well as supporting infrastructure, including access roads, buried cables and overhead collector lines to generate electricity. A 34.1 km 230 kV transmission line and two (2) substations are required to step the voltage from 34.5 kV to 230 kV to enable connection to the Chatham Switching Station (SS). A written copy of the Draft Project Description Report was made available for public inspection on October 21, 2010 at [www.southkentwind.com](http://www.southkentwind.com) and at the local municipal office. Further the applicant has prepared supporting documents as per Ontario Regulation 359/09.

Written copies of the draft supporting documents will also be made available for the public inspection on Tuesday July 26, 2011 at [www.southkentwind.com](http://www.southkentwind.com) and at the following locations:

Municipality of Chatham-Kent, Civic Centre  
315 King Street West  
Chatham, ON

Flower Bearers were Colleen McDonald, Corne Fletcher, Christa Wils, Candy Taylor, Isabella Ivson, Adeline Ivson and Julia Cudney.

There is an open gate at the end of the road,  
Through which each one must go alone;  
And there is a light we cannot see  
Our Father claims His own.  
Beyond the gate, our loved ones  
Find happiness and rest,  
And there is comfort in the thought  
That a loving God knows best.

To Property Owner

**Subject: Notice of Public Meeting  
Samsung Renewable Energy Inc and Pattern Energy: South Kent Wind Project**

Samsung Renewable Energy Inc and Pattern Energy (hereinafter referred to as the "Proponent"), are proposing to construct a wind project within the Municipality of Chatham-Kent. The proposed project is named the South Kent Wind Project (the "Project") and will have an installed nominal capacity of 270 MW. This Project requires a Renewable Energy Approval (REA) issued in accordance with the provisions of the Ontario *Environmental Protection Act*, Part V.0.1 and Ontario Regulation 359/09. Hatch Ltd. (Hatch) has been retained to assist in meeting the REA requirements.

The Proponent is providing you with this notice to make you aware of the upcoming Public Meeting where you can learn more about this Project and the Proponents.

In accordance with Section 15 of O. Reg. 359/09, a Notice of Public Meeting has been prepared and a copy is enclosed. The Notice will be posted in *The Chatham Daily* on Saturday, September 10, 2011 and again on Saturday, October 8, 2011.

As per Section 17 (1) of O. Reg. 359/09, the draft copies of the supporting documents for the Project are available for public review on-line at: [www.southkentwind.com](http://www.southkentwind.com). Please note that the following documents have been revised: Executive Summary, Design and Operations Report, Stage 2 Archaeological Assessment, Natural Heritage Records Review Report, Natural Heritage Site Investigation Report, Natural Heritage Evaluation of Significance Report, and Natural Heritage Environmental Impact Study.

Please also find enclosed a Notice of Draft Site Plan as per Section 54.1 of Ontario Regulation 359/09. The Draft Site Plan provides the locations (including coordinates) of all the turbine locations.

Hardcopies of all the supporting documents for the Project are also available at:

Tilbury Library  
2 Queen Street  
Tilbury ON

Blenheim Library  
16 George Street  
Blenheim ON

Municipality of Chatham-Kent Civic Centre  
315 King Street West,  
Chatham, ON

The information provided in these reports will be discussed during the Public Meeting on Saturday November 12, 2011 at the Tilbury Knights of Columbus Hall, 22 Dupuis Ave., Tilbury, Ontario. Your comments, queries or information relevant to the proposed Project would be greatly appreciated.

Notice of Final Public Meeting – South Kent Wind Project  
Notice of Draft Site Plan – South Kent Wind Project

# Notice of Public Meeting to be held by Samsung Renewable Energy Inc. and Pattern Energy Regarding a Proposal to Engage in a Renewable Energy Approval

**Project Name:** South Kent Wind Project

**Project Applicant:** Samsung Renewable Energy Inc. and Pattern Energy

**Project Location:** The Project is located south of Highway 401 between the Towns of Tilbury and Ridgetown (refer to draft site plan figure below) to the west and east, respectively, within the Municipality of Chatham-Kent in southwestern Ontario.

**Dated At:** The Municipality of Chatham-Kent this the 10th of September, 2011

Samsung Renewable Energy Inc. and Pattern Energy (hereinafter referred to as the "Proponent") are planning to engage in a renewable energy project in respect of which the issuance of a Renewable Energy Approval (REA) is required. The proposal to engage in the project and the project itself is subject to the provisions of the Environmental Protection Act (Act) Part V.0.1 and Ontario Regulation 359/09 (O. Reg. 359/09 as amended under O. Reg. 521/10 (January 2011)). The notice must be distributed in accordance with section 15 of the Regulation prior to an application being submitted and assessed for completeness by the Ministry of the Environment.

A Public Meeting is being held to provide information on the proposed project. The Public Meeting will be an open house format.

## Meeting Location:

Date: Saturday, November 12, 2011

Time: 2:00 pm to 5:00 pm

Place: Tilbury Knights of Columbus Hall, 22 Dupuis Ave., Tilbury, Ontario

## Project Description:

Pursuant to the Act and Regulation, the facility, in respect of which this project is to be engaged in, is a Class 4 Wind Facility. If approved, this facility would have a total maximum nameplate capacity of up to 270 MW. The project location is shown in the map below.

The Draft Project Description Report titled Draft Project Description Report describes the Project as a Class 4 Wind facility with a nameplate capacity of up to 270 MW consisting of approximately 130 wind turbines, as well as supporting infrastructure, including access roads, buried cables and overhead collector lines to generate electricity. An approximately 34.1 km 230 kV transmission line and two (2) substations are required to step the voltage from 34.5kV to 230 kV to enable connection to the Chatham Switching Station (SS). A written copy of the Draft Project Description Report was made available for public inspection on October 21, 2010 at [www.southkentwind.com](http://www.southkentwind.com) and at the local municipal office. Further the applicant has prepared supporting documents as per Ontario Regulation 359/09.

Written copies of the draft supporting documents are available for the public inspection at [www.southkentwind.com](http://www.southkentwind.com) and at the following locations on Monday September 12, 2011:

Municipality of Chatham-Kent, Civic Centre  
315 King Street West  
Chatham, ON

South Kent Wind Project Office,  
c/o Pattern Energy PO Box 1630  
57 Talbot St. W, Blenheim, ON N0P 1A0

Blenheim Library  
16 George Street  
Blenheim ON

Tilbury Library  
2 Queen Street  
Tilbury ON

### CENTRAL AMBULANCE COMMUNICATION CENTRE WALLACEBURG

Position: Ambulance Communications Officer  
Duration: Permanent Part Time/Casual  
Location: 150 Dora Drive, Wallaceburg N8A 0A9  
Wage: As per Collective Agreement \$27.01 - \$32.06

A challenging opportunity exists in the Central Ambulance Communications Centre  
Wallaceburg. We are seeking dedicated individuals to: work rotating shifts in a 24/7  
environment; process 9-1-1 emergency and non emergency requests for ambulance and  
fire service; direct and coordinate ambulance/fire movements; provide pre-arrival  
instructions; communicate with individuals under stress and operate complex computer-  
aided telecommunications equipment.

Requires working on an as-needed basis with no guarantee of number of hours worked.

Qualifications: Strong multi-tasking, organizational and memory recall skills; ability to  
maintain control under pressure and use professional judgment; excellent critical thinking,  
decision making and problem solving skills; skill in handling situations in a professional  
manner; excellent leadership, customer service; interpersonal, verbal and written  
communication skills; proficiency in computer software and computer based  
telecommunications applications; good understanding of spatial concepts (e.g. reading  
maps, calculating time, distance and movement); demonstrated ability to interpret and  
apply policies, procedures and information; typing at 35 wpm with 90% accuracy.

Only candidates who clearly identify they meet these qualifications will be considered. Job  
offer conditional upon: satisfactory criminal record check; valid standard first-aid and  
targeted responder CPR certificate, successful completion of computer-based training  
followed by Ambulance Communications Officer Provincial Certification, Restricted Radio  
Operator Certification and successful completion of on-the-job-training.

Closing Date: October 28th, 2011  
Send application: CACC Wallaceburg

### Notice of Public Meeting to be held by Samsung Renewable Energy Inc. and Pattern Energy Regarding a Proposal to Engage in a Renewable Energy Approval

**Project Name:** South Kent Wind Project  
**Project Applicant:** Samsung Renewable Energy Inc. and Pattern Energy  
**Project Location:** The Project is located south of Highway 401 between the Towns of Tilbury and  
Ridgetown (refer to draft site plan figure below) to the west and east, respectively, within the  
Municipality of Chatham-Kent in southwestern Ontario.  
**Dated At:** The Municipality of Chatham-Kent this the 10th of September, 2011

Samsung Renewable Energy Inc. and Pattern Energy (hereinafter referred to as the "Proponent") are  
planning to engage in a renewable energy project in respect of which the issuance of a Renewable  
Energy Approval (REA) is required. The proposal to engage in the project and the project itself is  
subject to the provisions of the Environmental Protection Act (Act) Part V.0.1 and Ontario Regulation  
359/09 (O. Reg. 359/09 as amended under O. Reg. 521/10 (January 2011)). The notice must be  
distributed in accordance with section 15 of the Regulation prior to an application being submitted and  
assessed for completeness by the Ministry of the Environment.

A Public Meeting is being held to provide information on the proposed project. The Public Meeting will  
be an open house format.

Meeting Location:  
Date: Saturday, November 12, 2011  
Time: 2:00 pm to 5:00 pm  
Place: Tilbury Knights of Columbus Hall, 22 Dupuis Ave., Tilbury, Ontario

**Project Description:**  
Pursuant to the Act and Regulation, the facility, in respect of which this project is to be engaged in, is  
a Class 4 Wind Facility. If approved, this facility would have a total maximum nameplate capacity of  
up to 270 MW. The project location is shown in the map below.

The Draft Project Description Report titled Draft Project Description Report describes the Project  
as a Class 4 Wind facility with a nameplate capacity of up to 270 MW consisting of approximately  
130 wind turbines, as well as supporting infrastructure, including access roads, buried cables and  
overhead collector lines to generate electricity. An approximately 34.1 km 230 kV transmission line  
and two (2) substations are required to step the voltage from 34.5kV to 230 kV to enable connection  
to the Chatham Switching Station (SS). A written copy of the Draft Project Description Report was  
made available for public inspection on October 21, 2010 at [www.southkentwind.com](http://www.southkentwind.com) and at the local  
municipal office. Further the applicant has prepared supporting documents as per Ontario Regulation  
359/09.

Written copies of the draft supporting documents are available for the public inspection at  
[www.southkentwind.com](http://www.southkentwind.com) and at the following locations on Monday September 12, 2011:

Municipality of Chatham-Kent, Civic Centre  
315 King Street West

**Project Location:** The Project is located south of Highway 401 between the Towns of Tilbury and Ridgeway (refer to draft site plan figure below) to the west and east, respectively, within the Municipality of Chatham-Kent in southwestern Ontario.  
**Dated At:** The Municipality of Chatham-Kent, on this, the 10th of September, 2011

Samsung Renewable Energy Inc. and Pattern Energy (hereinafter referred to as the "Proponent") are planning to engage in a renewable energy project in respect of which the issuance of a Renewable Energy Approval (REA) is required. The distribution of this Notice of Draft Site Plan and the project itself are subject to the provisions of the Environmental Protection Act (Act), Part V.0.1. and amended Ontario Regulation (Regulation) 359/09. This notice must be distributed in accordance with section 54.1 of the amended Regulation prior to a REA application being submitted and assessed for completeness by the Ministry of Environment (MOE). A Project Description Report and Notice of Proposal (dated October 21, 2010) were prepared in accordance with O. Reg. 359/09 and with Technical Bulletin One – Guidance for Preparing the Project Description Report (MOE 2010) and presented for public review and comment. The Project Description Report and Notice of Proposal can be viewed at [www.southkentwind.ca](http://www.southkentwind.ca).

The legal effect of the publishing of this notice is such that pursuant to section 54(1.2) of the Regulation, Samsung Renewable Energy Inc. and Pattern Energy does not have to take into account a noise receptor, as defined by the Regulation, that did not exist as of the day before Samsung Renewable Energy Inc. and Pattern Energy published this Notice of Draft Site Plan in accordance with 54.1(c)(i) or (ii).

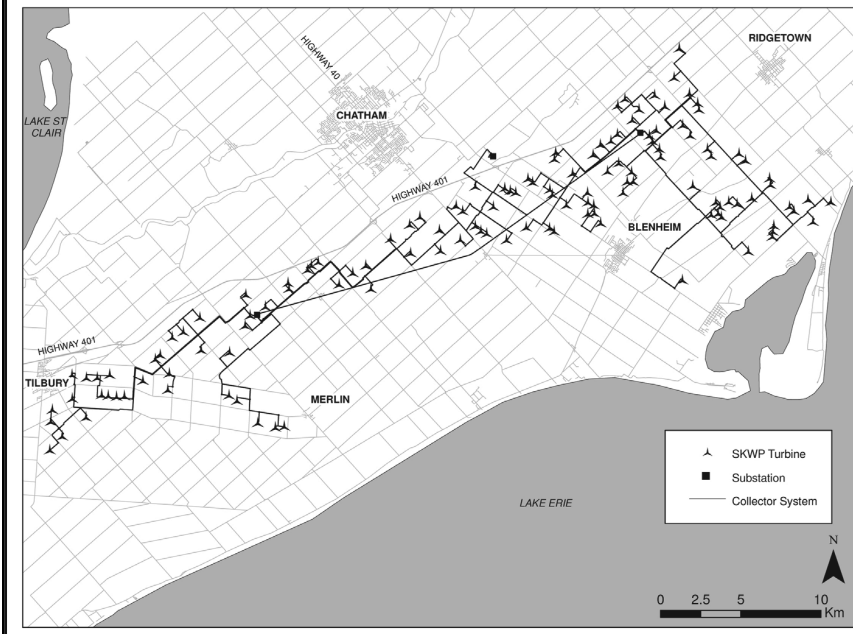

**Project Description**  
The Proponent is proposing to develop the South Kent Wind Project (hereinafter referred to as the "Project"), a Class 4 wind facility, pursuant to the Act and Regulation. If approved, the facility will have a nameplate capacity of 270 MW consisting of approximately 130 wind turbines, as well as supporting infrastructure, including access roads, buried cables and overhead collector lines to generate electricity. An approximately 34.1 km 230 kV transmission line and two (2) substations are required to step the voltage from 34.5kV to 230 kV to enable connection to the Chatham Switching Station (SS).

A copy of the Draft Site Plan for the Project is available for public inspection at [www.southkentwind.ca](http://www.southkentwind.ca) and at the following locations:

Tilbury Library 2 Queen Street Tilbury ON	Blenheim Library 16 George Street Blenheim ON
Municipality of Chatham-Kent, Civic Centre 315 King Street West, Chatham, ON	South Kent Wind Project Office, 57 Talbot St. W, Blenheim, ON N0P 1A0

## Notice of Public Meeting to be held by Samsung Renewable Energy Inc. and Pattern Energy Regarding a Proposal to Engage in a Renewable Energy Approval

**Project Name:** South Kent Wind Project  
**Project Applicant:** Samsung Renewable Energy Inc. and Pattern Energy  
**Project Location:** The Project is located south of Highway 401 between the Towns of Tilbury and Ridgeway (refer to draft site plan figure below) to the west and east, respectively, within the Municipality of Chatham-Kent in southwestern Ontario.  
**Dated At:** The Municipality of Chatham-Kent this the 10th of September, 2011

Samsung Renewable Energy Inc. and Pattern Energy (hereinafter referred to as the "Proponent") are planning to engage in a renewable energy project in respect of which the issuance of a Renewable Energy Approval (REA) is required. The proposal to engage in the project and the project itself is subject to the provisions of the Environmental Protection Act (Act) Part V.0.1 and Ontario Regulation 359/09 (O. Reg. 359/09 as amended under O. Reg. 521/10 (January 2011)). The notice must be distributed in accordance with section 15 of the Regulation prior to an application being submitted and assessed for completeness by the Ministry of the Environment.

A Public Meeting is being held to provide information on the proposed project. The Public Meeting will be an open house format.

**Meeting Location:**  
Date: Saturday, November 12, 2011  
Time: 2:00 pm to 5:00 pm  
Place: Tilbury Knights of Columbus Hall, 22 Dupuis Ave., Tilbury, Ontario

**Project Description:**  
Pursuant to the Act and Regulation, the facility, in respect of which this project is to be engaged in, is a Class 4 Wind Facility. If approved, this facility would have a total maximum nameplate capacity of up to 270 MW. The project location is shown in the map below.

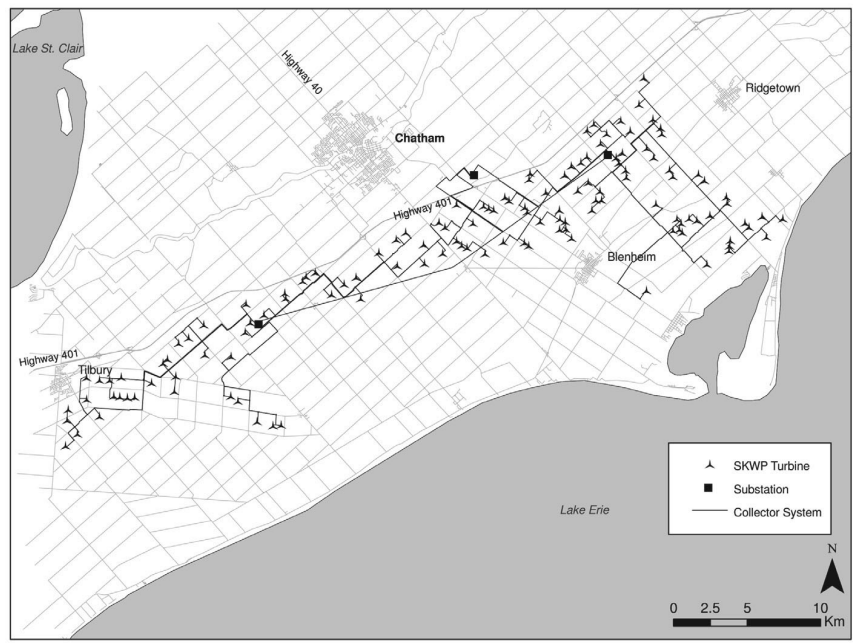

The Draft Project Description Report titled Draft Project Description Report describes the Project as a Class 4 Wind facility with a nameplate capacity of up to 270 MW consisting of approximately 130 wind turbines, as well as supporting infrastructure, including access roads, buried cables and overhead collector lines to generate electricity. An approximately 34.1 km 230 kV transmission line and two (2) substations are required to step the voltage from 34.5kV to 230 kV to enable connection to the Chatham Switching Station (SS). A written copy of the Draft Project Description Report was made available for public inspection on October 21, 2010 at [www.southkentwind.com](http://www.southkentwind.com) and at the local municipal office. Further the applicant has prepared supporting documents as per Ontario Regulation 359/09.

Written copies of the draft supporting documents are available for the public inspection at [www.southkentwind.com](http://www.southkentwind.com) and at the following locations on Monday September 12, 2011:

Municipality of Chatham-Kent, Civic Centre 315 King Street West Chatham, ON	South Kent Wind Project Office, c/o Pattern Energy PO Box 1630 57 Talbot St. W, Blenheim, ON N0P 1A0

## Notice of Draft Site Plan for the South Kent Wind Energy Project By Samsung Renewable Energy Inc. and Pattern Energy

**Project Name:** South Kent Wind Project  
**Project Location:** The Project is located south of Highway 401 between the Towns of Tilbury and Ridgeway (refer to draft site plan figure below) to the west and east, respectively, within the Municipality of Chatham-Kent in southwestern Ontario.  
**Dated At:** The Municipality of Chatham-Kent, on this, the 10th of September, 2011

Samsung Renewable Energy Inc. and Pattern Energy (hereinafter referred to as the "Proponent") are planning to engage in a renewable energy project in respect of which the issuance of a Renewable Energy Approval (REA) is required. The distribution of this Notice of Draft Site Plan and the project itself are subject to the provisions of the Environmental Protection Act (Act), Part V.0.1. and amended Ontario Regulation (Regulation) 359/09. This notice must be distributed in accordance with section 54.1 of the amended Regulation prior to a REA application being submitted and assessed for completeness by the Ministry of Environment (MOE). A Project Description Report and Notice of Proposal (dated October 21, 2010) were prepared in accordance with O. Reg. 359/09 and with Technical Bulletin One – Guidance for Preparing the Project Description Report (MOE 2010) and presented for public review and comment. The Project Description Report and Notice of Proposal can be viewed at [www.southkentwind.ca](http://www.southkentwind.ca).

The legal effect of the publishing of this notice is such that pursuant to section 54(1.2) of the Regulation, Samsung Renewable Energy Inc. and Pattern Energy does not have to take into account a noise receptor, as defined by the Regulation, that did not exist as of the day before Samsung Renewable Energy Inc. and Pattern Energy published this Notice of Draft Site Plan in accordance with 54.1(c)(i) or (ii).

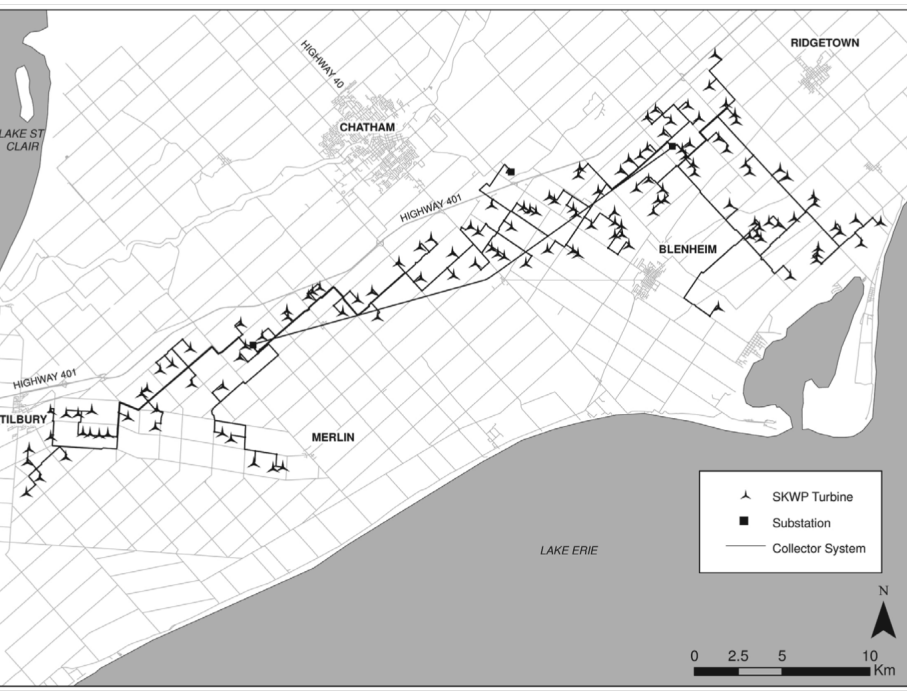

**Project Description**  
The Proponent is proposing to develop the South Kent Wind Project (hereinafter referred to as the "Project"), a Class 4 wind facility, pursuant to the Act and Regulation. If approved, the facility will have a nameplate capacity of 270 MW consisting of approximately 130 wind turbines, as well as supporting infrastructure, including access roads, buried cables and overhead collector lines to generate electricity. An approximately 34.1 km 230 kV transmission line and two (2) substations are required to step the voltage from 34.5kV to 230 kV to enable connection to the Chatham Switching Station (SS).

---	---

# Getting your home ready for fall

Inside:

- \* Turning over your mattress and washing all of your bedding, including comforters and blankets.
- \* Getting your carpets professionally cleaned. Think of all the sand and grass clippings that have been walked in on your flip-flops this summer.
- \* Cleaning your windows, inside and out, including in between the sills.
- \* Cleaning your house from top to bottom, focusing on public rooms such as the living room, family room, entryway and kitchen.
- \* Get out the vacuum. Vacuum the drapes, window treatments, baseboards and in the corners. Move furniture and vacuum beneath and behind it. Vacuum upholstered furniture, or have professionally cleaned if needed. Pull the refrigerator away from the wall, and vacuum the condenser coils. For bottom-mounted coils, use a long,

- narrow brush to clean coils of dust and debris.
- \* Make sure your furnace is tuned up for the winter and change the filter. Homeowners with a fireplace should check the flue and have the fireplace cleaned if it is wood burning.
- \* Fall is also a good time to have your air ducts cleaned.
- \* Clean your home's gutters. If you don't clean out your gutters, you run the risk of water building up in them during cold weather. This can cause ice damming that will ruin a roof.
- \* Install gutter protectors that keep falling leaves out of the gutters.
- \* Examining your chimney for any damage.
- \* Covering up your air conditioning unit to protect it from ice and snow.
- \* Draining and storing garden hoses. Install insulating covers on exterior spigots.

Colin Sunday, a young and upcoming musician, performed on August 20th at the PICEI Annex building dedication to Jean Tewatenihneh Herne.

His specialty is the acustic guitar.  
He is the son of Norma and Ron Sunday and brother to Mallory.

## Notice of Public Meeting to be held by Samsung Renewable Energy Inc. and Pattern Energy Regarding a Proposal to Engage in a Renewable Energy Approval

**Project Name:** South Kent Wind Project  
**Project Applicant:** Samsung Renewable Energy Inc. and Pattern Energy  
**Project Location:** The Project is located south of Highway 401 between the Towns of Tilbury and Ridgetown (refer to draft site plan figure below) to the west and east, respectively, within the Municipality of Chatham-Kent in southwestern Ontario.  
**Dated At:** The Municipality of Chatham-Kent this the 10th of September, 2011

Samsung Renewable Energy Inc. and Pattern Energy (hereinafter referred to as the "Proponent") are planning to engage in a renewable energy project in respect of which the issuance of a Renewable Energy Approval (REA) is required. The proposal to engage in the project and the project itself is subject to the provisions of the Environmental Protection Act (Act) Part V.0.1 and Ontario Regulation 359/09 (O. Reg. 359/09 as amended under O. Reg. 521/10 (January 2011)). The notice must be distributed in accordance with section 15 of the Regulation prior to an application being submitted and assessed for completeness by the Ministry of the Environment.

A Public Meeting is being held to provide information on the proposed project. The Public Meeting will be an open house format.

**Meeting Location:**  
Date: Saturday, November 12, 2011  
Time: 2:00 pm to 5:00 pm  
Place: Tilbury Knights of Columbus Hall, 22 Dupuis Ave., Tilbury, Ontario

**Project Description:**  
Pursuant to the Act and Regulation, the facility, in respect of which this project is to be engaged in, is a Class 4 Wind Facility. If approved, this facility would have a total maximum nameplate capacity of up to 270 MW. The project location is shown in the map below.

The Draft Project Description Report titled Draft Project Description Report describes the Project as a Class 4 Wind facility with a nameplate capacity of up to 270 MW consisting of approximately 130 wind turbines, as well as supporting infrastructure, including access roads, buried cables and overhead collector lines to generate electricity. An approximately 34.1 km 230 kV transmission line and two (2) substations are required to step the voltage from 34.5kV to 230 kV to enable connection to the Chatham Switching Station (SS). A written copy of the Draft Project Description Report was made available for public inspection on October 21, 2010 at [www.southkentwind.com](http://www.southkentwind.com) and at the local municipal office. Further the applicant has prepared supporting documents as per Ontario Regulation 359/09.

Written copies of the draft supporting documents are available for the public inspection at [www.southkentwind.com](http://www.southkentwind.com) and at the following locations on Monday September 12, 2011:

Municipality of Chatham-Kent, Civic Centre  
315 King Street West  
Chatham, ON

South Kent Wind Project Office,  
c/o Pattern Energy PO Box 1630  
57 Talbot St. W, Blenheim, ON N0P 1A0

Blenheim Library  
16 George Street  
Blenheim ON

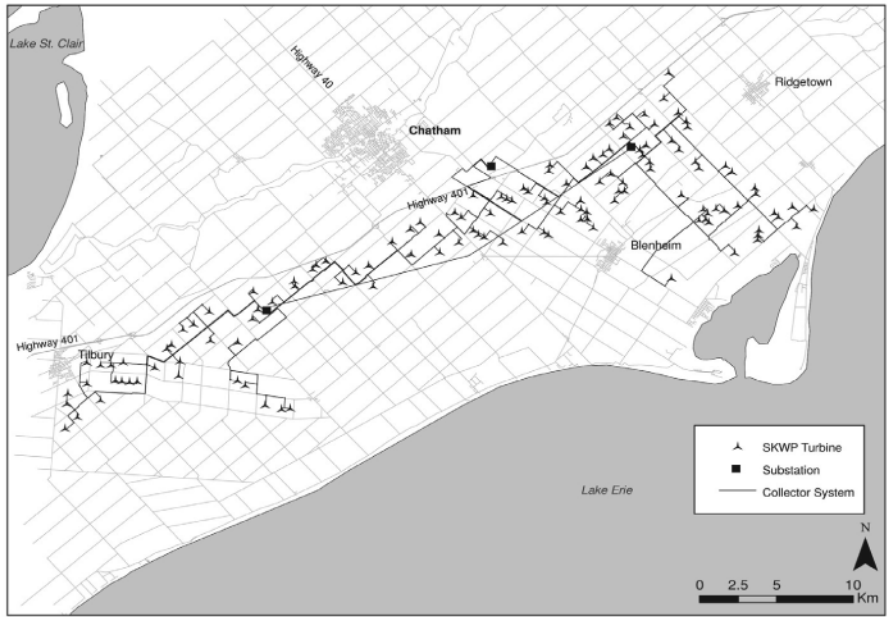

Tilbury Library  
2 Queen Street  
Tilbury ON

## Notice of Draft Site Plan for the South Kent Wind Energy Project By Samsung Renewable Energy Inc. and Pattern Energy

**Project Name:** South Kent Wind Project  
**Project Location:** The Project is located south of Highway 401 between the Towns of Tilbury and Ridgetown (refer to draft site plan figure below) to the west and east, respectively, within the Municipality of Chatham-Kent in southwestern Ontario.  
**Dated At:** The Municipality of Chatham-Kent, on this, the 10th of September, 2011

Samsung Renewable Energy Inc. and Pattern Energy (hereinafter referred to as the "Proponent") are planning to engage in a renewable energy project in respect of which the issuance of a Renewable Energy Approval (REA) is required. The distribution of this Notice of Draft Site Plan and the project itself are subject to the provisions of the Environmental Protection Act (Act), Part V.0.1. and amended Ontario Regulation (Regulation) 359/09. This notice must be distributed in accordance with section 54.1 of the amended Regulation prior to a REA application being submitted and assessed for completeness by the Ministry of Environment (MOE). A Project Description Report and Notice of Proposal (dated October 21, 2010) were prepared in accordance with O. Reg. 359/09 and with Technical Bulletin One – Guidance for Preparing the Project Description Report (MOE 2010) and presented for public review and comment. The Project Description Report and Notice of Proposal can be viewed at [www.southkentwind.ca](http://www.southkentwind.ca).

The legal effect of the publishing of this notice is such that pursuant to section 54(1.2) of the Regulation, Samsung Renewable Energy Inc. and Pattern Energy does not have to take into account a noise receptor, as defined by the Regulation, that did not exist as of the day before Samsung Renewable Energy Inc. and Pattern Energy published this Notice of Draft Site Plan in accordance with 54.1(c)(i) or (ii).

### Project Description

The Proponent is proposing to develop the South Kent Wind Project (hereinafter referred to as the "Project"), a Class 4 wind facility, pursuant to the Act and Regulation. If approved, the facility will have a nameplate capacity of 270 MW consisting of approximately 130 wind turbines, as well as supporting infrastructure, including access roads, buried cables and overhead collector lines to generate electricity. An approximately 34.1 km 230 kV transmission line and two (2) substations are required to step the voltage from 34.5kV to 230 kV to enable connection to the Chatham Switching Station (SS).

A copy of the Draft Site Plan for the Project is available for public inspection at [www.southkentwind.ca](http://www.southkentwind.ca) and at the following locations:

Tilbury Library  
2 Queen Street  
Tilbury ON

Blenheim Library  
16 George Street  
Blenheim ON

Municipality of Chatham-Kent, Civic Centre  
315 King Street West, Chatham, ON

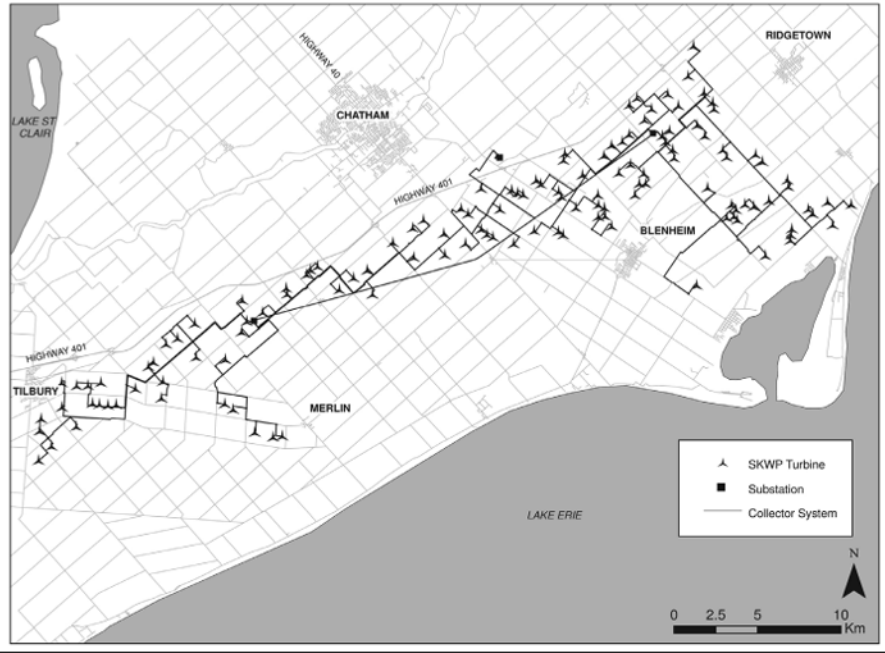

South Kent Wind Project Office,  
57 Talbot St. W, Blenheim, ON N0P 1A0

## CONSUMER CORNER

The Consumer Corner is presented with you, the reader, at the forefront. We want to share information that will help you purchase the best product, to save money, how to buy and what to look for and to provide information (ideas) for all phases of your family.

With that being said, this week's article is about how your child (ren) can get better grades. The students have completed almost eight weeks of school and the first marking period is just around the bend.

Here are some helpful hints on how your child (ren) can get better grades.

All children and everyone else for that matter need to eat healthy. The easiest way to supercharge your child (rens) focus, decision-making and much more is: pumpkin seeds.

Pumpkin seeds improve memory. All you need is a handful and your child will receive the required amount of zinc per day and zinc helps with memory.

Another easy food source – salads. Salads help kids to think faster, the lettuce, spinach, radishes and beets provide brain boosters that provide blood flow to the brain.

### Make homework easier:

Before sitting down to do homework, have your child (ren) go for a short walk or ride their bikes. This activity revs up their brain's action levels. The level remains high for at least 2 hours. Time enough to finish homework.

How about some cocoa? Make some hot cocoa for your child. The cocoa

has an immediate energizing effect on the brain. It works as a British study showed on students taking a math test. Those who drank a cup of hot chocolate scored higher and had less brain drain than those students who did not drink the hot chocolate. It's an inexpensive booster.

### Tutoring:

Find free tutoring in the community. If your child (ren) need extra help then check with your child's school. There may be after school opportunities to get help in the subject area required.

If your child is a member of the Akwesasne Boys and Girls Club they have a tutoring program with Clarkson College. Students travel to Clarkson on Thursday evenings for at least one and a half hours. Call 518-358-9911 for more information.

The Boys and Girls Club as part of their program, have the students do their homework as soon as they get off the bus. The club has some mentors to help the students; however, to meet the demands of the large club membership more mentors are needed. If you can give one or more hours per week to our kids, please call 518-358-9911 and ask for Nikky.

The Akwesasne Library does provide computer access for your child. Call 518-358-2240 for the library's hours.

Wanting your child to get good grades and succeed in school can happen when you ask for help. Start with the school and move out from there. Good luck to you all.

## WE LOVE VISITORS!

Indian Time is lucky to receive many visitors every week. Whether it's a parent bringing in a new baby for a photograph or an elder who wants us to look at photos with him, our doors are always open and we love our visitors. We love them so much we want to share them with you. Our new "We Love Visitors" series is simply a way to share members of the community

with you. So, don't be scared to come and visit us (we'll only photograph those willing) but if you have something special you want to show us, tell us, or share with our readers, stop in anytime.

Our offices are located in the village of St. Regis, on Hilltop Drive, in the same building as CKON 97.3 studios.

We hope to see you soon!

Visitors l-r: Terrill Hooper O'Brien, their Aunt Leona Cook and Jeffra Hooper Montroy stopped in to say sekona at Indian Time on Tuesday. Terrill and Jeffra are in town to share their skills of creating beaded bags at the Akwesasne Museum this week. Come back and visit us anytime.

### Notice of Public Meeting to be held by Samsung Renewable Energy Inc. and Pattern Energy Regarding a Proposal to Engage in a Renewable Energy Approval

**Project Name:** South Kent Wind Project

**Project Applicant:** Samsung Renewable Energy Inc. and Pattern Energy

**Project Location:** The Project is located south of Highway 401 between the Towns of Tilbury and Ridgeway (refer to draft site plan figure below) to the west and east, respectively, within the Municipality of Chatham-Kent in southwestern Ontario.

**Dated At:** The Municipality of Chatham-Kent this the 10th of September, 2011

Samsung Renewable Energy Inc. and Pattern Energy (hereinafter referred to as the "Proponent") are planning to engage in a renewable energy project in respect of which the issuance of a Renewable Energy Approval (REA) is required. The proposal to engage in the project and the project itself is subject to the provisions of the Environmental Protection Act (Act) Part V.0.1 and Ontario Regulation 359/09 (O. Reg. 359/09 as amended under O. Reg. 521/10 (January 2011)). The notice must be distributed in accordance with section 15 of the Regulation prior to an application being submitted and assessed for completeness by the Ministry of the Environment.

A Public Meeting is being held to provide information on the proposed project. The Public Meeting will be an open house format.

**Meeting Location:**

Date: Saturday, November 12, 2011

Time: 2:00 pm to 5:00 pm

Place: Tilbury Knights of Columbus Hall, 22 Dupuis Ave., Tilbury, Ontario

### Project Description:

Pursuant to the Act and Regulation, the facility, in respect of which this project is to be engaged in, is a Class 4 Wind Facility. If approved, this facility would have a total maximum nameplate capacity of up to 270 MW. The project location is shown in the map below.

The Draft Project Description Report titled Draft Project Description Report describes the Project as a Class 4 Wind facility with a nameplate capacity of up to 270 MW consisting of approximately 130 wind turbines, as well as supporting infrastructure, including access roads, buried cables and overhead collector lines to generate electricity. An approximately 34.1 km 230 kV transmission line and two (2) substations are required to step the voltage from 34.5kV to 230 kV to enable connection to the Chatham Switching Station (SS). A written copy of the Draft Project Description Report was made available for public inspection on October 21, 2010 at [www.southkentwind.com](http://www.southkentwind.com) and at the local municipal office. Further the applicant has prepared supporting documents as per Ontario Regulation 359/09.

Written copies of the draft supporting documents are available for the public inspection at [www.southkentwind.com](http://www.southkentwind.com) and at the following locations on Monday September 12, 2011:

Municipality of Chatham-Kent, Civic Centre  
315 King Street West

April 28, 2012

To Property Owner:

**Subject: Notice of Public Meeting  
Samsung Renewable Energy Inc and Pattern Energy: South Kent Wind Project**

As you are aware, Samsung Renewable Energy Inc and Pattern Energy (hereinafter referred to as the "Proponent"), are proposing to construct a wind project within the Municipality of Chatham-Kent. The proposed project is named the South Kent Wind Project (the "Project") and will have an installed nominal capacity of 270 MW. This Project requires a Renewable Energy Approval (REA) issued in accordance with the provisions of the Ontario Environmental Protection Act, Part V.0.1 and Ontario Regulation 359/09. Hatch Ltd. (Hatch) has been retained to assist in meeting the REA requirements.

Due to changes in the Project layout, the Proponent is providing you with this notice to make you aware of the upcoming Public Meeting where you can learn more about this Project layout. In accordance with Section 15 of O. Reg. 359/09, a Notice of Public Meeting has been prepared and a copy is enclosed. The Notice will be posted in The Chatham Daily on Saturday April 28, 2012 and again on Saturday May 5, 2012.

As per Section 17 (1) of O. Reg. 359/09, the draft copies of the revised supporting documents for the Project are available for public review on-line at: [www.southkentwind.com](http://www.southkentwind.com).

Hardcopies of all the supporting documents for the Project will also be available by May 4, 2012 at:

South Kent Wind Project Office,  
c/o Pattern Energy PO Box 1630  
57 Talbot St. W, Blenheim, On N0P 1A0

The information provided in these reports will be discussed during the Public Meeting on May 12, 2012 at the Blenheim Golf Club, Blenheim, Ontario. Your comments, queries or information relevant to the proposed Project would be greatly appreciated.  
Correspondence should be directed to:

# Notice of Public Meeting

to be held by Samsung Renewable Energy Inc. and Pattern Energy  
Regarding a Proposal to Engage in a Renewable Energy Approval

**Project Name:** South Kent Wind Project

**Project Applicant:** Samsung Renewable Energy Inc. and Pattern Energy

**Project Location:** The Project is located south of Highway 401 between the Towns of Tilbury and Ridgely (refer to draft site plan figure below) to the west and east, respectively, within the Municipality of Chatham-Kent in southwestern Ontario.

**Dated At:** The Municipality of Chatham-Kent this the 28th of April, 2012

Samsung Renewable Energy Inc. and Pattern Energy (hereinafter referred to as the "Proponent") are planning to engage in a renewable energy project in respect of which the issuance of a Renewable Energy Approval (REA) is required. The proposal to engage in the project and the project itself is subject to the provisions of the Environmental Protection Act (Act) Part V.0.1 and Ontario Regulation 359/09 (O. Reg. 359/09 as amended under O. Reg. 521/10 (January 2011)).

Due to changes in the project layout, including the locations of some turbines and access roads, a Public Meeting is being held to provide information on the project. The Public Meeting will be an open house format.

## Meeting Location:

**Date:** May 12, 2012

**Time:** 2:00 pm to 5:00 pm

**Place:** Blenheim Golf Club, 439 Chatham Street S., Blenheim, Ontario

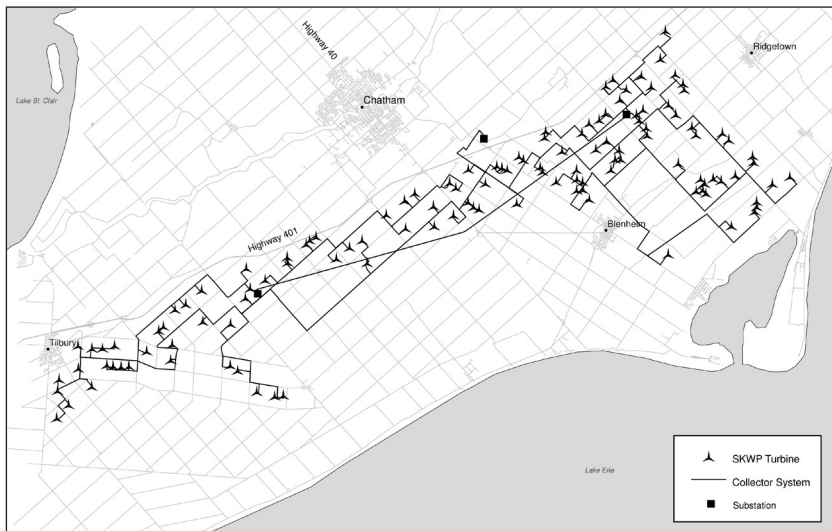

## Project Description:

Pursuant to the Act and Regulation, the facility, in respect of which this project is to be engaged in, is a Class 4 Wind Facility. If approved, this facility would have a total maximum nameplate capacity of up to 270 MW. The project location is shown in the map below.

The Draft Project Description Report titled Draft Project Description Report describes the Project as a Class 4 Wind facility with a nameplate capacity of up to 270 MW consisting of approximately 124 wind turbines, as well as supporting infrastructure, including roads, construction and turnaround areas, and buried and/or overhead collection/transmission lines to generate electricity. A 34.1 km 230 kV transmission line and two (2) substations are required to step the voltage from 34.5kV to 230 kV to enable connection to the Chatham Switching Station (SS). A written copy of the Draft Project Description Report was made available for public inspection on October 21, 2010 at [www.southkentwind.com](http://www.southkentwind.com) and at the local municipal office. Further the applicant has revised supporting documents as per Ontario Regulation 359/09.

Updated versions of the draft supporting documents are available for public inspection at [www.southkentwind.com](http://www.southkentwind.com) and at the following location by May 4, 2012:

South Kent Wind Project Office,  
c/o Pattern Energy PO Box 1630  
57 Talbot St. W, Blenheim, On N0P 1A0

439 Chatham Street South  
Blenheim, ON

# Your Comments Are Important

---

If you would like to be included on the Project's mailing list to receive project information and updates:

*Please Sign In and/or  
Complete a Comment Sheet*

## ■ Purpose of this First Public Meeting

This public meeting is an important aspect of the South Kent Wind Project. The purpose of this first public meeting is to:

- Introduce the South Kent Wind Project and the Proponent (Pattern Energy and Samsung Renewable Energy)
- Provide information on the Renewable Energy Approval (REA) Process
- Provide the public with an opportunity to identify any concerns or issues they may have regarding the proposed South Kent Wind Project

## ■ Pattern Energy Group

Pattern Energy Group is one of North America's leading independent wind and transmission companies. Our mission is to provide our customers with clean, renewable energy, which we seek to achieve by developing, constructing, owning and operating projects that are built for lasting success.

*Commitment to community is one of Pattern's core values. We are dedicated to building strong relationships with our landowners, communities, business partners, and customers. We are also committed to the environment, and we make the effort and take the time to understand and minimize our projects' impact on local habitat and wildlife.*

We work with landowners to help them transform their land's renewable resource into a steady revenue stream. We are strong supporters of the local communities we work in, and strive to be a good corporate citizen and neighbor. Skilled contractors and vendors help to build our projects, and we frequently join together with local development partners who bring expertise and knowledge of the area. At the end of this process are the customers who purchase the energy we produce. All are critical partners in our mission to provide consumers with clean, renewable energy.

## ■ Bowark

Pattern Energy and BowArk Energy have a long history of developing projects together in Canada. BowArk Energy has been developing Projects for the past 8 years, and is currently acting as a development partner with Pattern on the South Kent Wind Project. BowArk is assisting in permitting activities and landowner relations as it relates to the Renewable Energy Approval Process.

Pattern Energy and Samsung Renewable Energy have retained Hatch Ltd. to undertake the REA process. Hatch is an Ontario-based consulting, engineering, environmental and management company with operations worldwide and a reputation for excellence acquired over 80 years of continuous service to its clients.

## Samsung

Since the company began in 1938, we have brought advanced technology and product excellence to fields as diverse as resource development, textiles, plastics, finance, construction – even fashion. Increasingly, we have shifted our focus to alternative energy in line with global aspirations for a greener world. Samsung is embracing the green-growth paradigm by focusing on energy and the environment, natural resources, and industrial material.

Samsung is comprised of many companies, one of which is Samsung C&T. It is Samsung C&T's two business divisions – Trading & Investment Group and Engineering and Construction Group with its partners – that will be building and operating the Wind and Solar Power Projects here in Ontario. Samsung has logged many milestones over the years in preparation for such an opportunity. Among them, launching Korea's first solar energy project.

In a changing world, our company mission remains constant:

*To create superior products and services, thereby contributing to a better global society.*

This vision has helped Samsung C&T emerge as a leading player in the new and alternative energy sector, offering solutions to customers worldwide through a network of over 100 offices in 44 countries.

## KEPCO

Kepeco (Korea Electric Power Corporation) is South Korea's sole vertically integrated power utility, handling generation, transmission, distribution, and sales. It operates a total of 10 subsidiaries, six of which are directly involved in power generation. The company has a generation capacity of 64,500MW, making it one of the world's top power utilities. Kepeco aims to lead the industry in low-carbon generation, high-efficiency transmission and distribution, and other green technologies. Kepeco is building a global business infrastructure encompassing nuclear, hydro, renewable energy, and resource development as it pursues business opportunities around the world.

# South Kent Wind Project

## ■ Project Location

- The proposed Project area extends between the communities of Tilbury and Ridgetown, south of Highway 401
- The proposed Project is located within the single tier Municipality of Chatham-Kent
- If approved, the proposed Project will be constructed on privately owned lands
- Once the layout is complete, it will be available on the Project website:  
**[www.southkentwind.ca](http://www.southkentwind.ca)**

# South Kent Wind Project

## ■ Project Overview

- The project will be co-developed by Pattern Energy, Samsung and KEPCO
- Approximately 126 wind turbines with a nameplate capacity of up to 270 MW
- The project will use Siemens 2.221 MW and 2.126 MW, each with a rotor diameter of 101m
- Each turbine will include a transformer at its base, located outside of the tower
- The turbines have a blade length of 49.2m and a tower height of 99.5m
- Turbines will be located a minimum of 550m from non participating receptors
- Project will include 34.5 kV electrical collection system (overhead and underground), this system will be collected into two substations, in both the eastern and western zones of the project area
- A 115 kV or 230 kV transmission line will connect the two substations to the Chatham Transformer Station via a third substation
- Several different route options are still being assessed for the transmission line

## ■ Project Schedule

Submission of Project Description to Ministry of the Environment August 27, 2010

First Public Meeting November 22 and 23, 2010

Second Public Meeting March 1, 2011 - Tentative

REA Application Submission March 31, 2011

REA Received June 2011

Start of Construction August 2011

Commercial Operation Date December 2012

*Further information is available in the Project Description Report, available on line at [www.southkentwind.ca](http://www.southkentwind.ca)*

## ■ Why Renewable Energy

The Green Energy and Green Economy Act (GEA) received Royal Assent in the Ontario Legislature on May 14, 2009. According to the Government of Ontario, this legislation is part of Ontario's plan to become a leading green economy in North America.

A component of GEA is the Feed-in-Tariff (FIT) program which was launched in Ontario on October 1, 2009. The purpose of the FIT program was to encourage use of renewable energy sources, and promote growth within the environmental industry. The intent of the FIT program is to:

- Create new jobs
- Boost economic activity and
- Further the development of renewable energy technology and expertise in Ontario, while helping to phase out coal-fired electricity generation by 2014

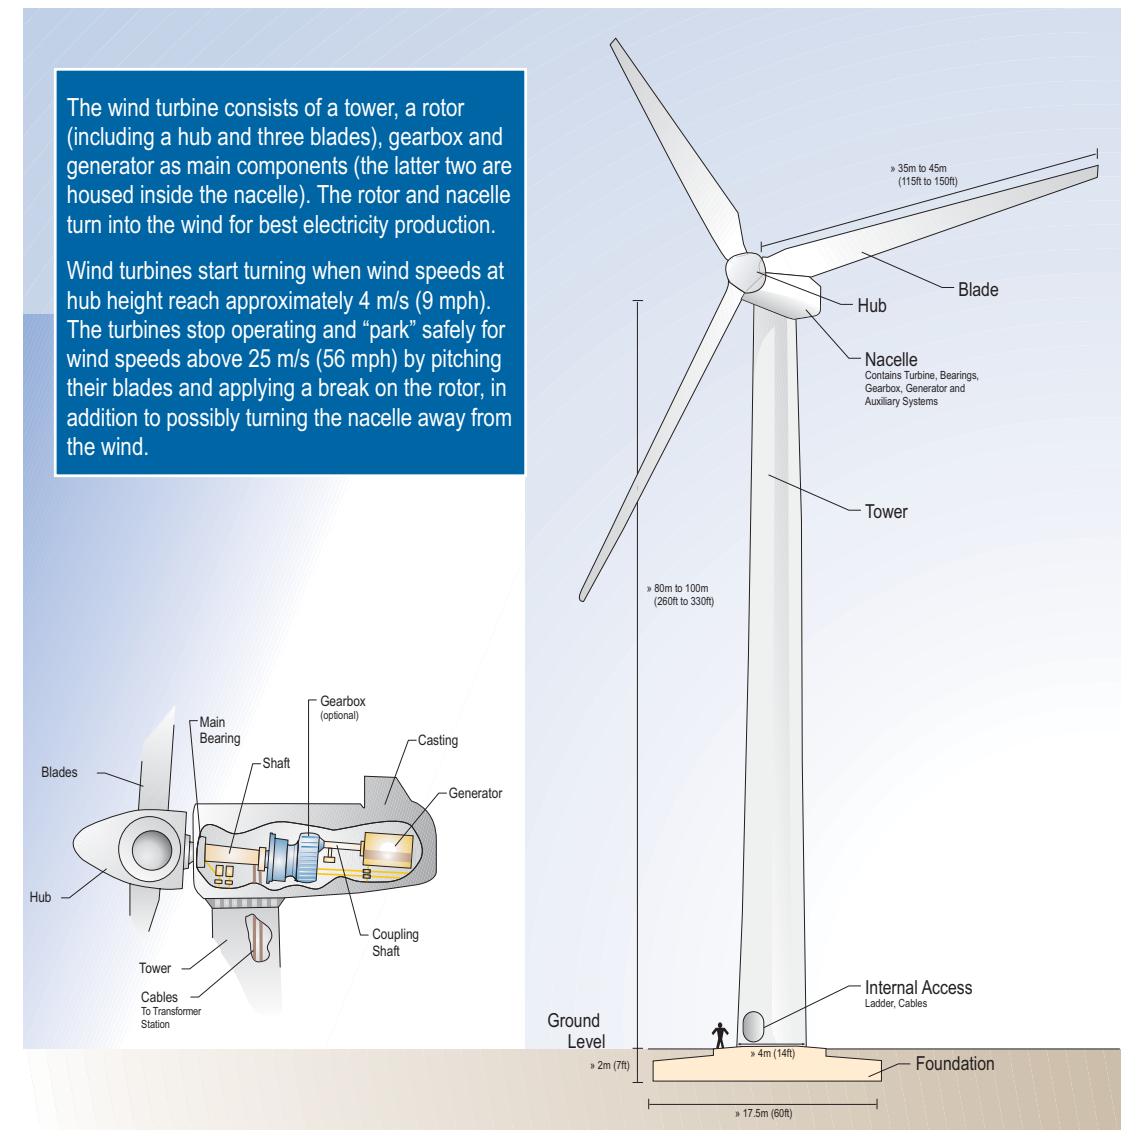

Pattern Energy, Samsung Renewable Energy and KEPCO are developing the South Kent Wind Project in response to the initiatives established in GEA.

## ■ Advantages of Wind

There are numerous advantages to wind. These advantages include:

- Wind is an inexhaustible resource
- Turbines are quick to install and are low maintenance once in place
- Benefits the environment by reducing dependence on fossil fuel based power generation
- Is compatible with mixed land use; grazing, agriculture and hunting
- Provides a steady income to farmers and property owners
- Strengthens the local tax base, helping to improve municipal services, including; schools, police and fire departments
- Produces energy with stable production costs, offering a hedge against other energy sources with volatile fuel markets

## ■ Wind Technology: How it Works

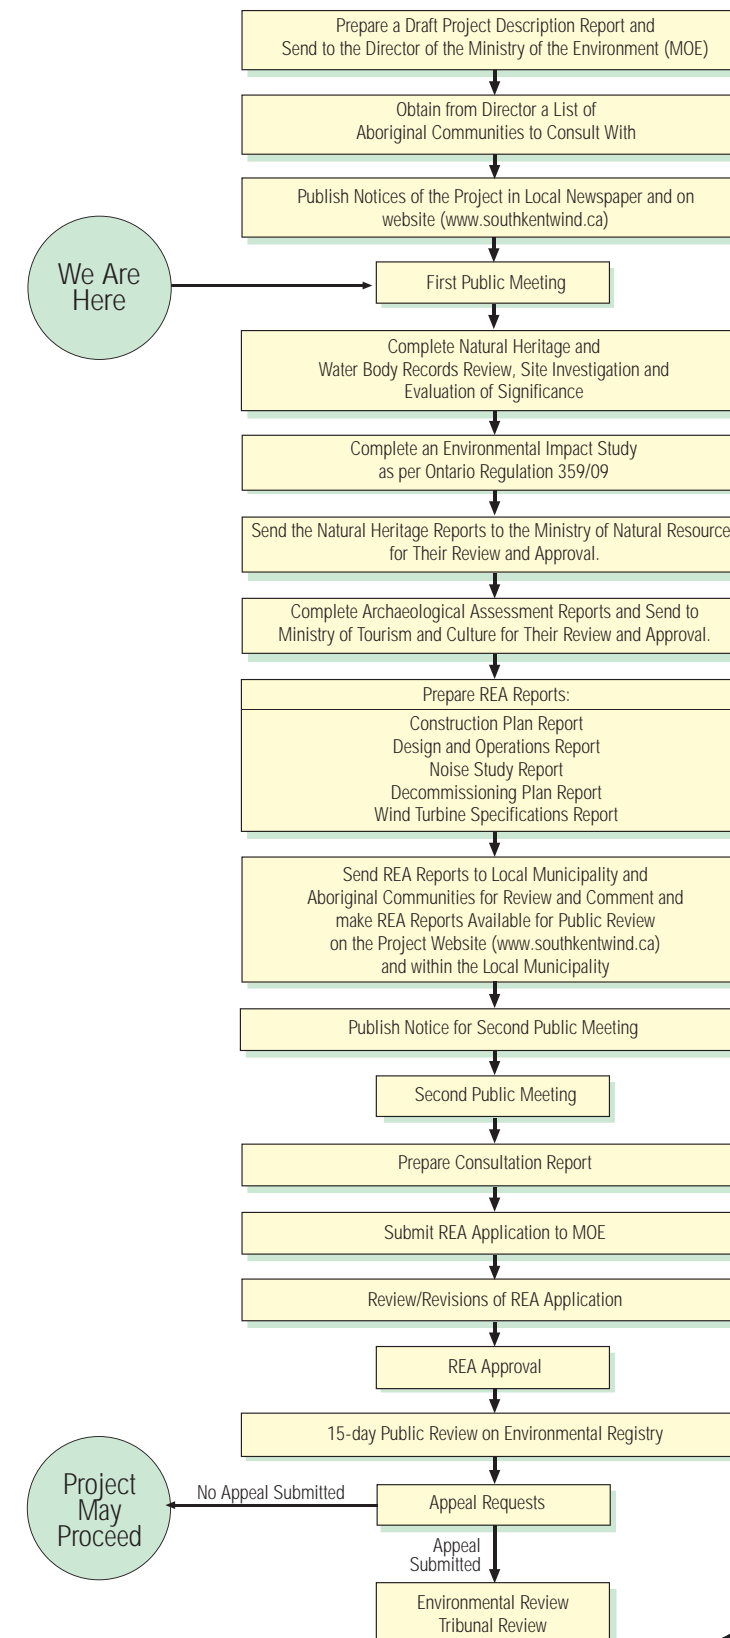

Wind, like water, can be harnessed to transform the kinetic energy into electrical energy. Wind turbines do this by having blades mounted on towers which are turned by the wind, causing them to turn a shaft that's attached to a generator. This creates an electrical current that is carried by cables to the power grid, which, in turn, transmits electricity to your home.

## Renewable Energy Approval (REA) Process

### REA Process Overview

- The REA is issued under Ontario Regulation 359/09 (Renewable Energy Approvals under Part V.0.1 of the Act) under the Environmental Protection Act
- The REA process is a stringent environmental approvals process that Pattern/Samsung needs to satisfy before building the project
- The REA approval will specify how the project will be designed, built, operated and decommissioned so that the local community and environment are protected
- The proposed South Kent Wind Project is considered to be a Class 4 wind facility, as defined under Ontario Regulation 359/09
- Class 4 wind facilities are defined as have a name plate capacity of 50kW or greater which are not in direct contact with surface water, other than a wetland
- The Class of the project determines the study and information requirements under the REA process
- Additional approval and permitting requirements from agencies such as the Ministry of Natural Resources, Ministry of Tourism and Culture and the Lower Thames Valley Conservation Authority will also be addressed as part of the REA application
- Permits and plans (e.g., Building Permit, Entrance Permit) will also be sought from the Municipality of Chatham Kent prior to Project construction

## Setbacks

A key component of the REA process is the establishment of common setbacks for all renewable energy facilities in the Province

If Project related infrastructure (turbines, access roads, collector's system etc) is located within the setback distances, additional analysis (i.e. Environmental Impact Study) will be provided in the REA application and summarized in the final Project Description.

Key Setbacks which will be applied throughout the design of the Project are described in the table to the right.

Feature	Setback Distance	Study Alternative When Within Setback
Non-participating receptor	550 m (from turbine base)	An Environmental Noise Impact Assessment will be completed for the Project according to MOE Noise Guidelines.
Public road right-of-way and railway right-of-way	Turbine blade length + 10 m (from turbine base)	N/A
Property line	Turbine height (excluding blades) (from turbine base)	Does not apply to parcels of land if the abutting parcel of land is a participant in the Project or if it is demonstrated that the wind turbine will not result in adverse impacts on nearby business, infrastructure, properties or land use activities.
	Turbine height (with blade) – MNR requirement for Crown Land	
Provincially significant southern wetland	120 m	Development not permitted within feature. Development and site alteration may be possible within setback area; EIS required.
Provincially significant ANSI (Earth Science)	50 m	Development and site alteration may be possible within natural feature and setback area; EIS required.
Provincially significant ANSI (Life Science)	120 m	
Significant valleyland	120 m	
Significant woodland	120 m	
Significant wildlife habitat	120 m	Development and site alteration may be possible within setback area; additional report required. No turbine or transformer located within a lake or within 30 m of the average annual high water mark.
Lake	120 m from the average annual high water mark	
Permanent or intermittent stream	120 m from the average annual high water mark	Development and site alteration may be possible within setback area; additional report required. No turbine or transformer located within a permanent or intermittent stream or within 30 m of the average annual high water mark.
Seepage area	120 m	Development and site alteration may be possible within setback area; additional report required. No turbine or transformer located within 30 m of a seepage area.

## ■ Required Studies

Prior to submission of an application for a Renewable Energy Approval, the Proponent must prepare the following reports:

- Project Description Report
- Construction Plan Report
- Design and Operations Report
- Decommissioning Plan Report
- Natural Heritage Assessment Reports
- Water Body Assessment Reports
- Archaeological Assessment Reports
- Wind Turbine Specifications Report
- Noise Study Report

These reports will be made available on the Project's website ([www.southkentwind.ca](http://www.southkentwind.ca)) and at the local municipal office for a 60-day public review period.

After the 60 day review period a second Public Information Session will be held for the project. At this Public Information Session the results of our studies and the project layout will be presented for public comment.

## ■ Noise Study

A Noise Study will be completed for the Project to ensure it complies with the Ontario Ministry of the Environment's strict regulatory requirements.

Ontario uses the most conservative sound modelling available nationally and internationally, which is supported by experiences in the province and in other jurisdictions (The Potential Health Impact of Wind Turbines - Chief Medical Officer of Health Report, Dr. Arlene King May 2010).

The Noise Study will consider other operational and proposed wind facilities within a 5 km radius of noise receptors. This will ensure a conservative (cautious) approach is being used which considers cumulative noise effects.

The maximum limit allowed by the Ontario Ministry of the Environment is 40 dBA for rural areas and the Project will be designed to meet this requirement.

## ■ Additional Technical Studies

As per Ontario Regulation 359/09, a Natural Heritage Assessment, consisting of site visits, records review and evaluation of significance will be conducted in order to identify environmental features of the Project locations and surrounding area. A variety of features were identified and considered during this process, including but not limited to the following:

- Wildlife/Wildlife habitat
- Vegetation communities, including wooded areas and wetlands
- Species at risk
- Valleylands
- Waterbodies
- Areas of Scientific and Natural Interest

Environmental studies are being completed to fully understand the local environment and will be utilized in the development of the Project design.

## Community Benefits

### Community Benefits

Supports the local economy by:

- Purchasing good and services during construction and operation
- Significantly increasing revenue for all service businesses, i.e. local restaurants and hotels during construction and operations

Significantly contributes to the tax base annually with approximately \$800,000/year, benefiting:

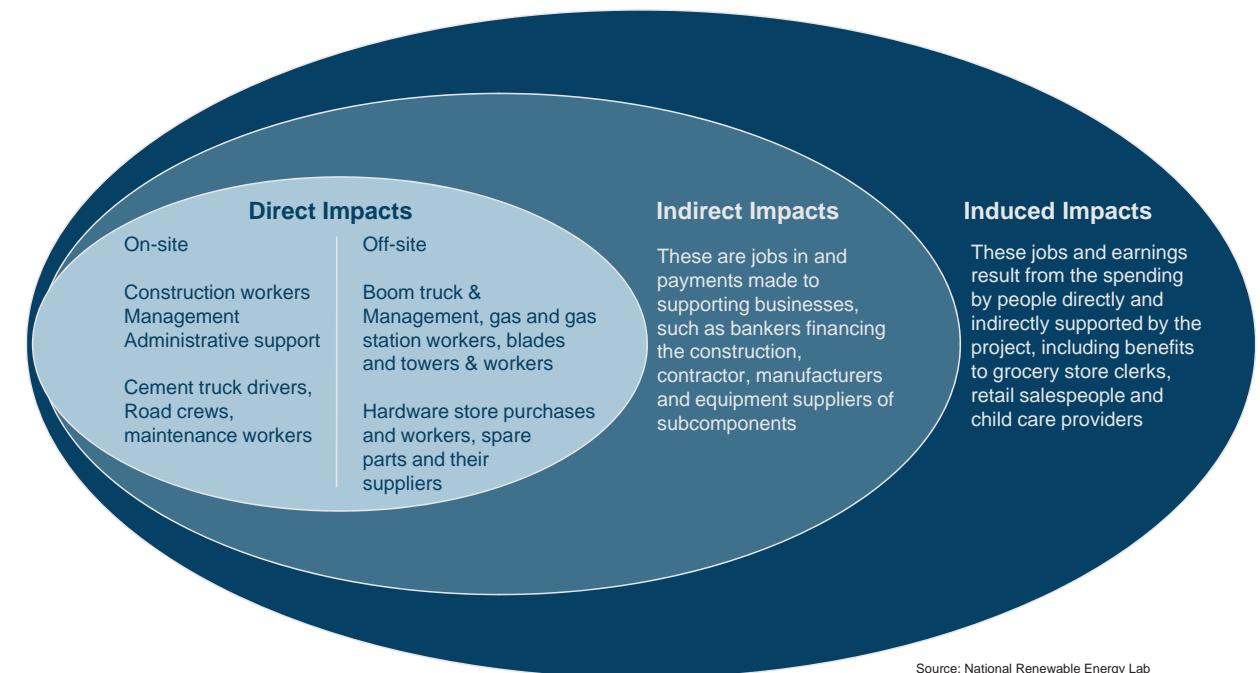

- Local Government and Related Services
- Lambton Kent School District

Through land lease agreements with landowners, the Project will provide additional income for farmers

### Job Creation

- Construction
  - Job opportunities for local residents, approximately 250-300 jobs:
    - Subcontractors experienced in civil work (grading, excavation, and concrete), electrical work, and mechanical assembly
    - Construction managers, electricians, heavy equipment operators and general labourers for assembly & civil work
- Operation
  - Maintenance personnel proficient in mechanics or electrical/electronic technicians
- Manufacturing
  - This project is part of the Samsung Green Energy Investment Agreement, which is committed to the establishment of four manufacturing facilities in the Province of Ontario. The manufacturing facilities will create:
    - 900 or more jobs (from 4 manufacturing facilities)
    - 550 or more (steel industry etc.) (excluding construction, operation & maintenance jobs)

## Wind Energy's Economic Ripple Effect

## ■ Public Health and Safety

Public health and safety will be considered during all stages of the Project (i.e. construction, operation and decommissioning).

To date, much study has been done on the effects of environmental noise on human health.

A recent summary of scientific literature related to wind turbines and public health, as compiled by Ontario's Chief Medical Officer of Health, revealed the following:

"...while some people living near wind turbines report symptoms such as dizziness, headaches, and sleep disturbance, the scientific evidence available to date does not demonstrate a direct causal link between wind turbine noise and adverse health effects. The sound level from wind turbines at common residential setbacks is not sufficient to cause hearing impairment or other direct health effects, although some people may find it annoying".

*The Potential Health Impact of Wind Turbines - Chief Medical Officer of Health Report, Dr. Arlene King May 2010*

Additional information from the report includes:

- The report includes an assessment of sound/noise, low frequency sound, infrasound, vibration, electric and magnetic fields, shadow flicker, ice throw and ice shed, and structural hazards
- Ontario used the most conservative sound modelling available nationally and internationally, which is supported by experiences in the province and in other jurisdictions
- Low frequency sound and infrasound from current generation upwind model turbines are well below the pressure sound levels at which known health effects occur. Further, there is no scientific evidence to date that vibration from low frequency wind turbine noise causes adverse health effects

With regards to vibrations from wind turbines the Wind Turbine Sound and Health Effects, An Expert Panel Review states: "The ground-borne vibrations from wind turbines are too weak to be detected by, or to affect, humans". It also states "there is nothing unique about the sounds or vibrations emitted by wind turbines.

*(W. David Colby, M.D., Robert Dobie, M.D., Geoff Leventhall, Ph.D., David M. Lipscomb, Ph.D., Robert J. McCunney, M.D., Michael T. Seilo, Ph.D., Bo Søndergaard, M.Sc.)*

## ■ Property Values

"In the study area, where wind farms were clearly visible, there was no empirical evidence to indicate that rural residential properties realized lower sale prices than similar residential properties within the same area that were outside of the viewshed of a wind turbine."

*Canning, G., and L. J. Simmons. (February 2010). Wind Energy Study Effect of Real Estate Values in the Municipality of Chatham-Kent. Canning Consultants Inc. & John Simmons Realty Services Ltd. Prepared for the Canadian Wind Energy Association.*

"Research collected data on almost 7,500 sales of single family homes situated within 10 miles of 24 existing wind facilities in nine different U.S. states. The conclusions of the study are drawn from eight different hedonic pricing models, as well as both repeat sales and sales volume models".

The various analyses are strongly consistent in that none of the models uncovers conclusive evidence of the existence of any widespread property value impacts that might be present in communities surrounding wind energy facilities. Specifically, neither the view of the wind facilities nor the distance of the home to those facilities is found to have any consistent, measureable, and statistically significant effect on home sales prices.

Although the analysis cannot dismiss the possibility that individual homes or small numbers of homes have been or could be negatively impacted, it finds that if these impacts do exist, they are either too small and/or too infrequent to result in any widespread, statistically observable impact."

*Hoen, B., Wiser, R., Cappers, P., Thayer, M., and G. Sethi. (December 2009). The Impact of Wind Power Projects on Residential Property Values in the United States: A Multi-Hedonic Analysis. Ernest Orlando Lawrence Berkeley National Laboratory. Prepared for the Office of Energy Efficiency and Renewable Energy.*

## ■ Environmental Benefits of 270 MW Wind Energy Compared to Coal-Fired Generation

### Carbon Dioxide Emissions Reduced

877,077 tonnes/year

157,172 car equivalent

### Coal

409,491 tonnes/year

### Sulfur Dioxide

3,940 tonnes/year

### Nitrogen Oxides

1,331 tonnes/year

### Freshwater Conserved

1,840,610,359 litres/year

5,042,768 litres/day

56,031 people each day

Sources: Based on information from the Energy Information Administration, National Energy Technology Laboratory, and U.S. Geological Survey. Freshwater based on 2005 Freshwater Consumption and Withdrawal Average for all Thermoelectric Generation, National Energy Technology Laboratory. \*Estimating Freshwater Needs to Meet Future Thermoelectric Generation Requirements\* 2007. Natural gas, coal, carbon dioxide figures based on figures from NYSEERDA. Based on USGS estimation of 80-100 gallons/day per capita water consumption, U.S. Geological Survey. \*Water Q & A: Water use at home. <http://ga.water.usgs.gov/edu/qahome.html>.

## ■ Your Comments

Comments or concerns can be provided in the following ways:

1. Completion of a comment sheet. Please deposit the completed sheet in the Comments Box provided at this meeting or complete at home and fax/e-mail. If you wish to receive future Project mailings, please ensure your complete mailing address is provided.
2. Identification of comments or concerns to any Pattern Energy, Samsung Renewable Energy, Bowark or Hatch representatives present at this Public Meeting.
3. Contact the representatives for the Project at the addresses provided below:

**Kimberley Arnold**, BSc, MES

Manager – Environmental Services

Hatch Ltd.

4342 Queen St., Suite 500, Niagara Falls, Ontario, L2E 7J7

Phone: 905-374-0701 Ext.5318 Fax: 03-261-1708

karnold@hatch.ca

**Keith Knudsen**

Project Manager

BowArk Energy Ltd.

915, 530 8th Avenue SW, Calgary, Alberta T2P 3S8

Phone: 403-264-2259 Fax: 905-374-1157

## South Kent Wind Project

### Comment Sheet

First Public Meeting: Tuesday November 23, 2010

(PLEASE USE BLOCK LETTERS)

1. Please describe where you reside in relation to the Project area? THE SOUTH-  
EASTERN AREA OF THE PROJECT AREA.  
ADJACENT TO THE MORPETH/TALBOT WIND  
PROJECT

2. Please provide any relevant information related to the Project area which, in your opinion, should be considered in assessing the potential effects of the Project?

THE MAPS THAT YOUR COMPANY IS  
USING ARE OBSOLETE. I.E., CONCERNING MY  
PROPERTY. - FEATURES SUCH AS BUILDINGS AND  
WATER COURSES THAT ARE NO LONGER PRESENT.  
WOULD THIS FACT INFLUENCE WHETHER A PROPERTY  
IS OR IS NOT CONSIDERED AS A POTENTIAL PROJECT  
LOCATION?

3. Please provide any comments, questions or concerns related to the Project.

I SUPPORT PROJECTS SUCH AS THIS ONE, TIMES CHANGE,  
AS DOES TECHNOLOGY. I PERSONALLY DO NOT SEE  
MANY MAJOR PROBLEMS ARISING FROM THIS PROJECT.  
- TEMPORARY INCONVENIENCE DURING THE CONSTRUCTION PHASE,  
- DISTURBANCE OF SUBSURFACE TILE DRAINAGE SYSTEMS (AGRICULTURE)  
- DECOMMISSIONING OF UNITS AND REMOVAL OF FOUNDATIONS  
FACTORS LIKE THE ABOVE THREE COME TO MIND.  
THESE ARE THINGS THAT CAN BE DEALT WITH PROPERLY.  
I'LL TAKE WIND & SOLAR OVER A NUKE ANY DAY!

If you would you like to be included on the Project mailing list, please provide your name and full mailing address below:

Name:

Sherwood Ashton

Mailing Address:

11778 New Scotland Line  
R.R.1, Morpeth, Ont. N0P1X0.  
ashton@netrouver.com

WE WELCOME YOUR INPUT. PLEASE COMPLETE AND SUBMIT THIS COMMENT SHEET BEFORE LEAVING - THANK YOU

Alternatively, if you prefer to mail/fax your response, please do so within 30 days to:

Kimberly Arnold, Manager – Environmental Services, Renewable Power

4342 Queen St, Suite 500, Niagara Falls, Ontario, L2E 7J7

Phone: 905-374-5200 Fax: 905-374-1157

Phone: 905-374-5200 Fax: 905-374-1157

## South Kent Wind Project

### Comment Sheet

First Public Meeting: Monday November 22, 2010

(PLEASE USE BLOCK LETTERS)

1. Please describe where you reside in relation to the Project area? \_\_\_\_\_

In Blenheim proper.

2. Please provide any relevant information related to the Project area which, in your opinion, should be considered in assessing the potential effects of the Project?

What impact do the red lights on the turbines have on the health of individuals since there are studies out that "prove" red lights at night are detrimental to sleep patterns?

Why are you ~~not~~ looking at prime agricultural land? It would make more sense to move further north so that farmers in the less productive areas of Ontario can benefit, while farmers in this area can continue to grow the crops we need to feed our people. Even though each turbine <sup>access road</sup> takes only a small portion of land, collectively it mounts up.

3. Please provide any comments, questions or concerns related to the Project.

In media reports explaining how many homes would be powered rather than number of megawatts produced would be more meaningful.

Negative impacts should also be included in your reports.

If you would you like to be included on the Project mailing list, please provide your name and full mailing address below:

Name:

Jane Cartier

Mailing Address:

Box 1812

Blenheim Ont. N0P 1A0

WE WELCOME YOUR INPUT. PLEASE COMPLETE AND SUBMIT THIS COMMENT SHEET BEFORE LEAVING - THANK YOU

Alternatively, if you prefer to mail/fax your response, please do so within 30 days to:

Kimberly Arnold, Manager – Environmental Services, Renewable Power

4342 Queen St, Suite 500, Niagara Falls, Ontario, L2E 7J7

## South Kent Wind Project

### Comment Sheet

First Public Meeting: Monday November 22, 2010

(PLEASE USE BLOCK LETTERS)

1. Please describe where you reside in relation to the Project area? \_\_\_\_\_

3 miles SW of Merlin 2 1/2 Miles N of  
Port Alma

2. Please provide any relevant information related to the Project area which, in your opinion, should be considered in assessing the potential effects of the Project?

Over the last 2-3 years several different companies have built turbines and transmission lines close to and through our farms. Obviously not everyone benefits financially from this, but everyone has to look at and listen to the noise, and the obliteration of AM radio signals on roads with transmission lines along them. I'm concerned about the concentration of turbines and lines in our area reaching the point of saturation. Ontario is a big province. Maybe it is time to let everyone <sup>else</sup> "enjoy" the view and the noise these machines have created!!

3. Please provide any comments, questions or concerns related to the Project.

### Comment Sheet

First Public Meeting: Monday November 22, 2010

(PLEASE USE BLOCK LETTERS)

1. Please describe where you reside in relation to the Project area? \_\_\_\_\_

We live in the north end of  
this mega project - we've had  
too many & we're surrounded!

2. Please provide any relevant information related to the Project area which, in your opinion, should be considered in assessing the potential effects of the Project?

We believe in sustainable energy  
but we already have so many  
here in South Kent it is no  
longer sustainable!! No!

Erieau + #3 were built before  
Setback rules by Kruger. Will  
they be moved?

3. Please provide any comments, questions or concerns related to the Project.

When will we reach the  
limit? We are already doing the  
heavy lifting in sustainable energy  
for the province. Is there a  
limit on the number of turbines  
per km?

If you would you like to be included on the Project mailing list, please provide your name and full mailing address below:

(PLEASE USE BLOCK LETTERS)

1. Please describe where you reside in relation to the Project area? \_\_\_\_\_

- HWY 40 LOT 16 Con/ECK

2. Please provide any relevant information related to the Project area which, in your opinion, should be considered in assessing the potential effects of the Project?

I feel that I was "suckered" when I signed up. Pattern knew the location of where the towers were going & I wasn't going to get one. Now, I have to look at the neighbours new tower (Mrs Danforth), and am only being compensated \$10.00/acre This is an insult. You need to pool the payments and share more for the neighbours who will have to look at the ugly red lights for the rest of their life. In addition, the proposed tower is way too close to my 80 honey bee colonies. Noise & vibration ~~at~~ negatively affect the bees. In addition, will the blades kill the foraging bees?

3. Please provide any comments, questions or concerns related to the Project.

You people should not play farmers  
against each other. A co-operative  
system ~~in~~ in which all affected  
land owners share the economic resource  
generated by the wind turbines.

2. Please provide any relevant information related to the Project area which, in your opinion, should be considered in assessing the potential effects of the Project?

Bird migration } 120 m seems not enough.  
wetlands. }

3. Please provide any comments, questions or concerns related to the Project.

I have concerns that many people will profit financially from this and other projects. Meanwhile, property values can & I feel will be affected. Therefore, many people will continue to pay taxes on property that is devalued. The rural lifestyle changes with previously black skies @ night Flashing red constantly. There should be some sort of rural property tax deduction for those not directly profiting.

## South Kent Wind Project

### Comment Sheet

First Public Meeting: Monday November 22, 2010

(PLEASE USE BLOCK LETTERS)

1. Please describe where you reside in relation to the Project area? Our cottage  
is located in Eriean on Rondeau Bay.  
We have a view of existing wind  
turbines - some are 10 miles away.  
It is not a pretty sight!

2. Please provide any relevant information related to the Project area which, in your opinion, should be considered in assessing the potential effects of the Project?

- 1) Migration of birds and Monarch  
Butterflies - waterfowl and butterflies  
will be greatly affected by adding  
MORE wind turbines. This area is a flyway.
- 2) Property values - The survey I did  
showed that people do not want to see  
these wind turbines and would not buy  
if they had them in their view.
- 3) Chatham/Kent is supposed to be the  
prime farming area - what a waste  
of soil!

3. Please provide any comments, questions or concerns related to the Project.

Chatham / Kent has enough of these  
wind turbines and should share them  
with other areas. How many are  
in the Niagara area?

If you would you like to be included on the Project mailing list, please provide your name and full mailing address below:

Phone: 905-374-5200 Fax: 905-374-1157

Questions RE: Samsung proposal

- 1 Have all the landowners in the indicated area been contacted regarding leases?
- 2 Are leases based on total acreage involved?
- 3 Or are leases based on the number of generators?
- 4 Are lease payments made based on any of the above or by KW generated?
- 5 Under terms of agreement are there restrictions placed on the landowner?
- 6 What is the commercial municipal assessment on each unit?
- 7 Are these commercial taxes billed directly to Samsung or the landowner?
- 8 In the unforeseen case of bankruptcy who is responsible?
- 9 At the termination date of a lease who is responsible for cleanup?
- 10 Is Samsung covering each tower with adequate liability insurance?
- 11 Is Samsung adequately insured in case of civil action brought forth for health reasons or loss of farm income from these generators?

If an attendant is not available to answer these questions at the meeting, I would sincerely request a mailed answer to –

Keith McLean,

Niagara Falls, ON L2E 7J7

Re: South Kent Wind Project

Dear Ms. Kimberly Arnold;

After attending the public meeting at Blenheim, ON on November 22, 2010 I have some comments to bring to your attention.

Our residence at 12263 New Scotland Line is approximately 300 metres from the Dundee natural gas compressor, collection and purification plant on the corner of McKinley Road and New Scotland Line. I request that you consider the impact of sound levels coming from this source in your sound studies if there is to be development in the local area. Sound levels from this source have a local impact.

I was not clear on the required setbacks of a turbine from a non-participating receptor. Verbal information at the meeting indicated that the setbacks would not be less than the "set back distance" in these situations. Could you please confirm?

Some of the setbacks outlined such as from the lake, wood lots, or wildlife areas should be greater than the minimum requirements. Setbacks from non-participating property lines should not be less than the "set back distance."

Thank you;

David Langstaff

# South Kent Wind

Fact Sheet / November 2010

<b>Owner</b>	Samsung Renewable Energy and Pattern Energy Group Joint Venture
<b>Location</b>	Chatham-Kent, Ontario
<b>Turbine Manufacturer</b>	Siemens
<b>Number of Turbines</b>	126
<b>Project Capacity</b>	270 MW
<b>Power Equivalent</b>	73,000 homes
<b>Target Construction Start</b>	Fall 2011
<b>Target Operation Start</b>	Winter 2012
<b>Permanent Jobs</b>	Up to 27
<b>Construction Jobs</b>	Up to 300
<b>Estimated Tax Revenue</b>	\$700-800 thousand per year

The South Kent Wind project initiated the public Renewable Energy Approval (REA) process in October 2010 with the issuance of a Notice of Proposal and Project Description Report. During this process, Pattern and Samsung will host Public Open House events to provide the community with opportunities to meet the project team, learn more about the proposed project and the REA process, and allow the public to ask questions and provide comments about the project.

South Kent Wind will create many economic development benefits for the Chatham-Kent region, including the creation of development, construction and ongoing permanent employment positions during operations, the strong capital infusion from the tax and royalty payments, and the economic ripple effect resulting from the project.

Once complete, the project will produce clean and renewable power equivalent to the annual energy needs of 73,000 Ontario homes. The electricity produced by South Kent Wind will offset more than 877,000 tonnes of carbon dioxide a year compared to electricity generated by coal – the same as taking 157,000 cars off the roads each year.

More information about the project is available on the project website [www.southkentwind.ca](http://www.southkentwind.ca). Your comments are important to us. Please submit project comments to Kim Arnold, Project Environmental Coordinator, through mail, e-mail or phone: 4342 Queen St., Suite 500, Niagara Falls, Ontario, L2E 7J7, [karnold@hatch.ca](mailto:karnold@hatch.ca), 905-374-0701, Ext. 5318.

## ABOUT PATTERN

Pattern Energy Group LP is one of North America's leading independent wind and transmission companies. Our mission is to provide our customers with clean, renewable energy, which we seek to achieve by developing, constructing, owning and operating projects that are built for lasting success.

Pattern commenced operations in June of 2009 as one of the most experienced and best-capitalized renewable energy and transmission development companies in the United States when a private equity fund managed by Riverstone Holdings LLC, an energy and power-focused private equity firm with the largest renewable energy fund in the world, and our Executive Management Team purchased our thriving energy business and development pipeline to form Pattern.

The Pattern team employs approximately 100 highly-skilled scientists, legal and financial professionals, engineers, and construction and operations experts located in San Francisco, Houston, San Diego, New York and Toronto. We are all devoted to a common purpose: developing high performance renewable energy and transmission projects.

Pattern has 385 MW of wind projects in operation and will soon complete construction of our St. Joseph 138 MW wind project in Manitoba. We are growing and building on our current development pipeline, which includes over 4,000 MW of wind power projects and multiple transmission projects in the United States, Canada and Latin America.

## STRONG FINANCIAL BACKING

Facilitating our work is our financial strength as a company. Pattern is well-capitalized and with over \$800 million of equity committed to our business, no corporate debt and significant cash reserves, we have the financial ability to execute our business objectives for many years to come. In our first nine months as an independent company, we successfully raised non-recourse debt for our projects from thirteen U.S. and international banks.

We benefit from the partnership of our major stakeholder, a renewable energy investment fund managed by Riverstone Holdings LLC, an energy-focused investment firm. Riverstone's support assists us in securing and arranging ample capital for the development, construction and operation of all our projects.

## COMMITMENT TO COMMUNITY AND ENVIRONMENT

Commitment to community is one of Pattern's core values. We are dedicated to building strong relationships with our landowners, communities, business partners, and customers. We are also committed to the environment, and we make the effort and take the time to understand and minimize our projects' impact on local habitat and wildlife. These values are supported by a strong company culture that fosters innovative and critical thinking, collaborative problem-solving, and a deep belief in living up to our promises.

The Pattern team will continue using our in-depth industry experience, combined with innovation and science, to deliver the utmost value for our partners and the communities in which we work, while exhibiting a strong commitment to promoting environmental stewardship and corporate responsibility. Pattern's corporate principles include a commitment to integrity and excellence in all aspects of our business.
