## Appendix C3. Notices and Cover Letters

# Appendix C3a

## Notice of Commencement of Environmental Assessment and Invitation to Public Information Centre #1

# NOTICE OF COMMENCEMENT OF ENVIRONMENTAL REVIEW AND PUBLIC INFORMATION CENTRE #1

## By Henvey Inlet Wind LP for a Transmission Line

**Name:** Transmission Line for the Henvey Inlet Wind Energy Centre

**Location:** District of Parry Sound, Ontario

### Description:

Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, has commenced planning for the construction of a transmission line with a voltage of up to 500 kilovolts ("kV"). The transmission line will deliver electricity generated from the Henvey Inlet Wind Energy Centre ("HIWEC"), located on the Henvey Inlet First Nation Reserve No. 2, to the Ontario electricity grid. Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require the construction of a transformer station or switching station to connect to the HONI line.

The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, an Environmental Review Report (ERR) will be made available for a 30-day review and comment period. The ERR will include a review of existing conditions, potential effects, mitigation measures and document stakeholders input and consultation activities.

### Notification of Public Information Centre ("PIC") #1:

HIW is hosting a PIC regarding the proposed transmission line on two days at two different locations. Members of the public, Aboriginal communities, agencies and other interested persons are encouraged to attend the PIC at either location. The purpose of this event is to provide an opportunity to learn about the proposed transmission line and submit feedback. The dates and locations of the PIC are provided below:

**Location 1:** Date: ..... March 3, 2015  
Time: ..... 4:00 p.m. to 7:00 p.m.  
Location: ..... Holy Family Church Hall  
949 Riverside Drive, Britt, ON

**Location 2:** Date: ..... March 4, 2015  
Time: ..... 4:00 p.m. to 7:00 p.m.  
Location: ..... Bobby Orr Community Centre  
7-17 Mary Street, Parry Sound, ON

### Documents for Public Review:

The Transmission Line Description Report describes construction, operations and maintenance, and decommissioning. The routes for the transmission line are currently being developed by HIW and will be finalized during the Environmental Review process. A hard copy of the Transmission Line Description Report will be made available for review from January 23 to March 16, 2015, at the following locations:

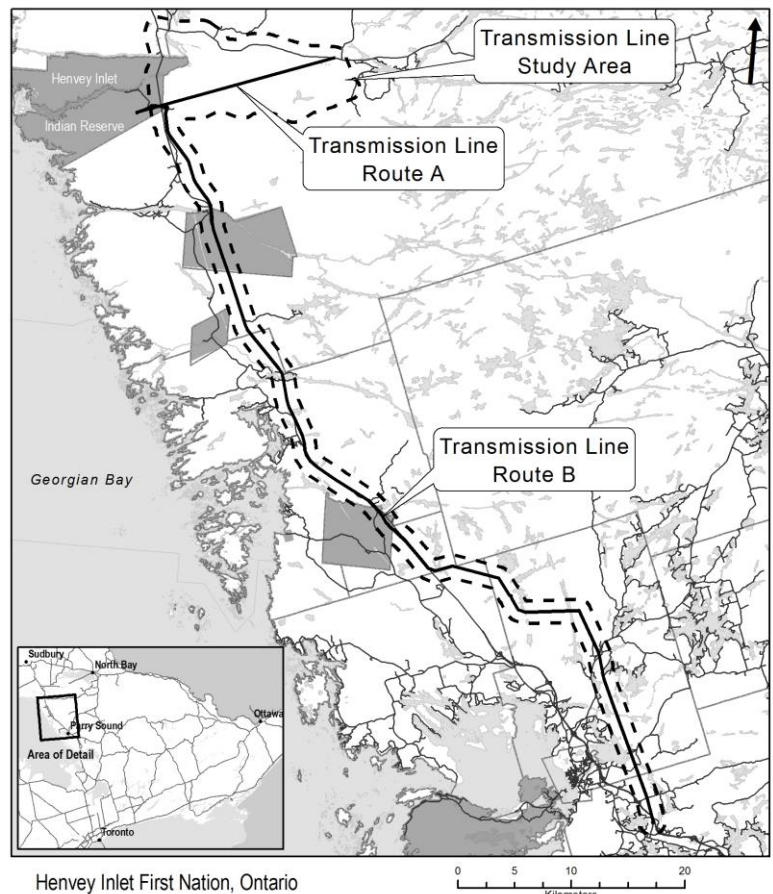

- **Town of Parry Sound Municipal Office**, 52 Seguin Street, Parry Sound, Ontario; and
- **Britt Area Public Library**, located in the Britt Public School at 841 Riverside Drive, Britt, Ontario.

The Transmission Line Description Report will also be available digitally at: [www.henveyinletwind.com](http://www.henveyinletwind.com).

### Project Contacts and Information:

We are committed to engaging with the public, Aboriginal communities and other stakeholder groups throughout the development of the transmission line and encourage anyone who is interested to get in touch with us at any time with questions or concerns. If you are unable to attend this introductory PIC or would like further information or be notified of key milestones and events, please contact:

**Kim Sachtleben**, Project Developer and/or  
**Ken Noble**, Project Developer  
Email: [info@henveyinletwind.com](mailto:info@henveyinletwind.com)  
Phone: (705) 857-5265  
Mail: 100 Simcoe Street, Suite 105  
Toronto, ON M5H 3G2

The wind energy centre associated with this transmission line is being studied under a different EA. For more information, please visit [www.henveyinletwind.com](http://www.henveyinletwind.com).

## NOTICE OF COMMENCEMENT OF ENVIRONMENTAL REVIEW AND PUBLIC INFORMATION CENTRE #1

By Henvey Inlet Wind LP for a Transmission Line

**Name:** Transmission Line for the Henvey Inlet Wind Energy Centre

**Location:** District of Parry Sound, Ontario

**Description:** Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, has commenced planning for the construction of a transmission line with a voltage of up to 500 kilovolts ("kV"). The transmission line will deliver electricity generated from the Henvey Inlet Wind Energy Centre ("HIWEC"), located on the Henvey Inlet First Nation Reserve No. 2, to the Ontario electricity grid. Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require the construction of a transformer station or switching station to connect to the HONI line.

The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, an Environmental Review Report (ERR) will be made available for a 30-day review and comment period. The ERR will include a review of existing conditions, potential effects, mitigation measures and document stakeholders input and consultation activities.

**Notification of Public Information Centre ("PIC") #1:**

HIW is hosting a PIC regarding the proposed transmission line on two days at two different locations. Members of the public, Aboriginal communities, agencies and other interested persons are encouraged to attend the PIC at either location. The purpose of this event is to provide an opportunity to learn about the proposed transmission line and submit feedback. The dates and locations of the PIC are provided below:

**Location 1:** Date: ..... March 3, 2015  
 Time: ..... 4:00 p.m. to 7:00 p.m.  
 Location: ..... Holy Family Church Hall  
 949 Riverside Drive, Britt, ON

**Location 2:** Date: ..... March 4, 2015  
 Time: ..... 4:00 p.m. to 7:00 p.m.  
 Location: ..... Bobby Orr Community Centre  
 7-17 Mary Street, Parry Sound, ON

## Documents for Public Review:

The Transmission Line Description Report describes construction, operations and maintenance, and decommissioning. The routes for the transmission line are currently being developed by HIW and will be finalized during the Environmental Review process. A hard copy of the Transmission Line Description Report will be made available for review from January 23 to March 16, 2015, at the following locations:

- **Town of Parry Sound Municipal Office**, 52 Seguin Street, Parry Sound, Ontario; and
- **Britt Area Public Library**, located in the Britt Public School at 841 Riverside Drive, Britt, Ontario.

The Transmission Line Description Report will also be available digitally at: [www.henveyinletwind.com](http://www.henveyinletwind.com).

## Project Contacts and Information:

We are committed to engaging with the public, Aboriginal communities and other stakeholder groups throughout the development of the transmission line and encourage anyone who is interested to get in touch with us at any time with questions or concerns. If you are unable to attend this introductory PIC or would like further information or be notified of key milestones and events, please contact:

## Municipal Notices www.greatersudbury.ca

### NOTICE OF CONSENT APPLICATIONS CITY OF GREATER SUDBURY

In the matter of applications for Consent under Section 53 of the Planning Act, R.S.O. 1990, Chapter P13, as amended, take notice that the following applications have been made:

**Application # B127/2014**  
Description of Property: 2948 Errington Avenue, Chelmsford  
Purpose of Application: Consolidate two, approximately 0.77 ha (1.9 acre), vest portions of the subject property with each abutting PINs 73348-0482 & 3348-0489, municipally known as 2918 & 2992 Errington Avenue, Chelmsford.

**Application # B1/2015**  
Description of Property: 34 & 38 Billard's Way, Sudbury  
Purpose of Application: Divide the subject property along the party wall of a proposed semi-detached structure.

**Application # B2/2015**  
Description of Property: PIN 73601 0024, Parcel 44157A, Part 7, Plan 53R-6389, at 11, Concession 6, Township of McKim, McKim Mine Road, Sudbury  
Purpose of Application: Grant an easement over a southern portion of the subject property, designated as Part 7, Plan 53R-6217, in favour of PIN 73601-0026.

**Application # B3/2015**  
Description of Property: 99 & 101 Birmingham Drive, Sudbury  
Purpose of Application: Divide the subject property along the party wall of a proposed semi-detached structure.

**Application # B4/2015**  
Description of Property: PINs 73374 0026 & 73374 0280, Lot 5, Concession 1, Township of Watawa, Kentville Road, Lively  
Purpose of Application: Transfer an approximate 30.0 ha (74.13 acre), south, recent portion of the subject property.

Anyone interested in any of these matters may call the number noted below or attend at the Office of the Consent Official, 3rd floor, Tom Davies Square, 200 Brady Street, Sudbury, ON, during regular office hours where additional information regarding the applications will be available for inspection.

Written submissions regarding any of these applications must be received no later than **Friday, February 13, 2015** for consideration.

A copy of the decision will only be sent to each person who files with the Consent Official a written request for notice of the decision(s).

Consent Official, City of Greater Sudbury  
Box 6000, Station "A", 200 Brady Street, Sudbury, ON P3A 5P5  
(705) 674-4446, ext. 4376 or 4348 - (705) 673-2200 fax

Note: If a person or public body that files an appeal of a decision of the Consent Official in respect of the proposed consent does not make a written submission to the Consent Official before a provisional consent is given, the Ontario Municipal Board may dismiss the appeal.

**GROUX, Marcel Regent** - Oct. 28, 1938 - Feb. 1, 2003. In loving memory of a very dear Husband, Father and Grandfather.  
*Our lives go on without you,  
And nothing is the same,  
We have to hold the heartache,  
When someone speaks your name.  
Sad are the hearts that love you,  
Silent the tears that fall.  
Living our lives without you,  
Is the hardest part of all.  
You did so many things for us,  
Your heart was kind and true,  
And when we needed someone,  
We could always count on you.  
The special years will not return,  
When we were all together,  
But with the love within our hearts,  
You will walk with us forever.  
Always Loved - Never Forgotten wife Judy,  
Daughter Cathy (Marc), Son Kevin  
(Andrea), Grandson Christopher,  
Granddaughter Karley.*

**NOTICE OF COMMENCEMENT OF ENVIRONMENTAL REVIEW  
AND PUBLIC INFORMATION CENTRE #1**

**By Henvey Inlet Wind LP for a Transmission Line**

**Name:** Transmission Line for the Henvey Inlet Wind Energy Centre  
**Location:** District of Parry Sound, Ontario  
**Description:**

Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, has commenced planning for the construction of a transmission line with a voltage of up to 500 kilovolts ("KV"). The transmission line will deliver electricity generated from the Henvey Inlet Wind Energy Centre ("HIWEC"), located on the Henvey Inlet First Nation Reserve No. 2, to the Ontario electricity grid. Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require the construction of a transformer station or switching station to connect to the HONI line. The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, an Environmental Review Report (ERR) will be made available for a 30-day review and comment period. The ERR will include a review of existing conditions, potential effects, mitigation measures and document stakeholders input and consultation activities.

**Notification of Public Information Centre ("PIC") #1:**

HIW is hosting a PIC regarding the proposed transmission line on two days at two different locations. Members of the public, Aboriginal communities, agencies and other interested persons are encouraged to attend the PIC at either location. The purpose of this event is to provide an opportunity to learn about the proposed transmission line and submit feedback. The dates and locations of the PIC are provided below:

**Location 1:** Date:..... March 3, 2015  
Time:..... 4:00 p.m. to 7:00 p.m.  
Location:..... Holy Family Church Hall  
949 Riverside Drive, Britt, ON

**Location 2:** Date:..... March 4, 2015  
Time:..... 4:00 p.m. to 7:00 p.m.  
Location:..... Bobby Orr Community Centre  
7-17 Mary Street, Parry Sound, ON

**Documents for Public Review:**

The Transmission Line Description Report describes construction, operations and maintenance, and decommissioning. The routes for the transmission line are currently being developed by HIW and will be finalized during the Environmental Review process. A hard copy of the Transmission Line Description Report will be made available for review from January 23 to March 16 2015, at the following locations:

- **Town of Parry Sound Municipal Office**, 52 Seguin Street, Parry Sound, Ontario; and
- **Britt Area Public Library**, located in the Britt Public School at 841 Riverside Drive, Britt, Ontario.

The Transmission Line Description Report will also be available digitally at: [www.henveyinletwind.com](http://www.henveyinletwind.com).

**Project Contacts and Information:**

We are committed to engaging with the public, Aboriginal communities and other stakeholder groups throughout the development of the transmission line and encourage anyone who is interested to get in touch with us at any time with questions or concerns. If you are unable to attend this introductory PIC or would like further information or be notified of key milestones and events, please contact:

**Kim Sachtleben**, Project Developer and/or

## NOTICE OF COMMENCEMENT OF ENVIRONMENTAL REVIEW AND PUBLIC INFORMATION CENTRE #1

By Harvey Inlet Wind LP for a Transmission Line

**Name:** Transmission Line for the Harvey Inlet Wind Energy Centre  
**Location:** District of Perry Sound, Ontario

### Description:

Harvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Niglo Power Corporation, has commenced planning for the construction of a transmission line with a voltage of up to 500 kilovolts ("kV"). The transmission line will deliver electricity generated from the Harvey Inlet Wind Energy Centre ("HIWEC"), located on the Harvey Inlet First Nation Reserve No. 2, to the Ontario electricity grid. Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Network line ("HONL") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 99 south to the Perry Sound Transformer Station extending approximately 90 km. Both routes may require the construction of a transformer station or switching station to connect to the HONL line.

The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, an Environmental Review Report (ERR) will be made available for a 30-day review and comment period. The ERR will include a review of existing conditions, potential effects, mitigation measures and document stakeholder input and consultation activities.

### Notification of Public Information Centre ("PIC") #1:

HIW is hosting a PIC regarding the proposed transmission line on two days at two different locations. Members of the public, Aboriginal communities, agencies and other interested persons are encouraged to attend the PIC at either location. The purpose of this event is to provide an opportunity to learn about the proposed transmission line and submit feedback. The dates and locations of the PIC are provided below:

**Location 1:** Date: March 3, 2015  
Time: 4:00 p.m. to 7:00 p.m.  
Location: Holy Family Church Hall  
948 Riverside Drive, Britt, ON

Dear Ms. Weaver:

**RE: Notice of Commencement of Environmental Review & Public Information Centre #1**

Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, has commenced planning for the construction of a transmission line with a voltage of up to 500 kilovolts ("kV"). The transmission line will deliver electricity generated from the Henvey Inlet Wind Energy Centre ("HIWEC"), located on the Henvey Inlet First Nation Reserve No. 2, to the Ontario electricity grid. Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The Environmental Review for the transmission line will:

- Review existing conditions of the study area;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Enclosed is a copy of the Notice of Commencement of Environmental Review and Public Information Centre ("PIC") #1, which provides an overview of the Environmental Review process, details on the first round of PICs, and information on the Transmission Line Description Report.

It is anticipated that there will be several future opportunities for input into the Environmental Review. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

If you believe that this matter does not impact your mandate or programs, we would appreciate you letting us know this by endorsing the space provided at the end of this letter. We would be grateful to receive this endorsement by or before **March 16, 2015**.

Throughout this study, should you wish to submit a comment or question, or receive more information, please contact Kim Sachtleben, Project Developer, and/ or Ken Noble, Project Developer, via:

Ms. Kitty Ma  
Regional Environmental Assessment Coordinator  
Health Canada  
Safe Environments Program  
Ontario Region  
180 Queen Street West, 10th Floor  
Toronto, ON M5V 3L7

Dear Ms. Ma:

**RE: Notice of Commencement of Environmental Review & Public Information Centre #1**

Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, has commenced planning for the construction of a transmission line with a voltage of up to 500 kilovolts ("kV"). The transmission line will deliver electricity generated from the Henvey Inlet Wind Energy Centre ("HIWEC"), located on the Henvey Inlet First Nation Reserve No. 2, to the Ontario electricity grid. Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The Environmental Review for the transmission line will:

- Review existing conditions of the study area;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Enclosed is a copy of the Notice of Commencement of Environmental Review and Public Information Centre ("PIC") #1, which provides an overview of the Environmental Review process, details on the first round of PICs, and information on the Transmission Line Description Report.

It is anticipated that there will be several future opportunities for input into the Environmental Review. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

If you believe that this matter does not impact your mandate or programs, we would appreciate you letting us know this by endorsing the space provided at the end of this letter. We would be grateful to receive this endorsement by or before **March 16, 2015**.

Throughout this study, should you wish to submit a comment or question, or receive more information, please contact Kim Sachtleben, Project Developer, and/ or Ken Noble, Project Developer, via:

**Email:**..... [info@henveyinletwind.com](mailto:info@henveyinletwind.com);

**Phone:** ... (705) 857-5265; or

**Mail:** ..... 100 Simcoe Street, Suite 105, Toronto, ON M5H 3G2

We look forward to working with you throughout this study.

Ms. Andrea Stoiko  
Policy Coordinator Strategic Policy Branch  
Regulatory Affairs & Strategic Policy Division  
Ministry of Energy  
2nd Floor, 880 Bay Street  
Toronto, ON M7A 2C1

Dear Ms. Stoiko:

**RE: Notice of Commencement of Environmental Review & Public Information Centre #1**

Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, has commenced planning for the construction of a transmission line with a voltage of up to 500 kilovolts ("kV"). The transmission line will deliver electricity generated from the Henvey Inlet Wind Energy Centre ("HIWEC"), located on the Henvey Inlet First Nation Reserve No. 2, to the Ontario electricity grid. Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The Environmental Review for the transmission line will:

- Review existing conditions of the study area;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Enclosed is a copy of the Notice of Commencement of Environmental Review and Public Information Centre ("PIC") #1, which provides an overview of the Environmental Review process, details on the first round of PICs, and information on the Transmission Line Description Report.

It is anticipated that there will be several future opportunities for input into the Environmental Review. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

If you believe that this matter does not impact your mandate or programs, we would appreciate you letting us know this by endorsing the space provided at the end of this letter. We would be grateful to receive this endorsement by or before **March 16, 2015**.

Ms. Katherine Kirzati  
Heritage Planner  
Ministry of Tourism, Culture and Sport  
401 Bay Street, Suite 1700  
Toronto, ON M7A 0A7

Dear Ms. Kirzati:

**RE: Notice of Commencement of Environmental Review & Public Information Centre #1**

Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, has commenced planning for the construction of a transmission line with a voltage of up to 500 kilovolts ("kV"). The transmission line will deliver electricity generated from the Henvey Inlet Wind Energy Centre ("HIWEC"), located on the Henvey Inlet First Nation Reserve No. 2, to the Ontario electricity grid. Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The Environmental Review for the transmission line will:

- Review existing conditions of the study area;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Enclosed is a copy of the Notice of Commencement of Environmental Review and Public Information Centre ("PIC") #1, which provides an overview of the Environmental Review process, details on the first round of PICs, and information on the Transmission Line Description Report.

It is anticipated that there will be several future opportunities for input into the Environmental Review. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

If you believe that this matter does not impact your mandate or programs, we would appreciate you letting us know this by endorsing the space provided at the end of this letter. We would be grateful to receive this endorsement by or before **March 16, 2015**.

**RE: Notice of Commencement of Environmental Review & Public Information Centre #1**

Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, has commenced planning for the construction of a transmission line with a voltage of up to 500 kilovolts ("kV"). The transmission line will deliver electricity generated from the Henvey Inlet Wind Energy Centre ("HIWEC"), located on the Henvey Inlet First Nation Reserve No. 2, to the Ontario electricity grid. Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The Environmental Review for the transmission line will:

- Review existing conditions of the study area;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Enclosed is a copy of the Notice of Commencement of Environmental Review and Public Information Centre ("PIC") #1, which provides an overview of the Environmental Review process, details on the first round of PICs, and information on the Transmission Line Description Report.

It is anticipated that there will be several future opportunities for input into the Environmental Review. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

If you believe that this matter does not impact your mandate or programs, we would appreciate you letting us know this by endorsing the space provided at the end of this letter. We would be grateful to receive this endorsement by or before **March 16, 2015**.

Throughout this study, should you wish to submit a comment or question, or receive more information, please contact Kim Sachtleben, Project Developer, and/ or Ken Noble, Project Developer, via:

Chief Bob Whitman  
Fire Chief  
Municipality of Whitestone  
21 Church Street  
Dunchurch, ON P0A 1G0

Dear Chief Whitman:

**RE: Notice of Commencement of Environmental Review & Public Information Centre #1**

Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, has commenced planning for the construction of a transmission line with a voltage of up to 500 kilovolts ("kV"). The transmission line will deliver electricity generated from the Henvey Inlet Wind Energy Centre ("HIWEC"), located on the Henvey Inlet First Nation Reserve No. 2, to the Ontario electricity grid. Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The Environmental Review for the transmission line will:

- Review existing conditions of the study area;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Enclosed is a copy of the Notice of Commencement of Environmental Review and Public Information Centre ("PIC") #1, which provides an overview of the Environmental Review process, details on the first round of PICs, and information on the Transmission Line Description Report.

It is anticipated that there will be several future opportunities for input into the Environmental Review. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

If you believe that this matter does not impact your mandate or programs, we would appreciate you letting us know this by endorsing the space provided at the end of this letter. We would be grateful to receive this endorsement by or before **March 16, 2015**.

Throughout this study, should you wish to submit a comment or question, or receive more information, please contact Kim Sachtleben, Project Developer, and/ or Ken Noble, Project Developer, via:

**Email:**..... [info@henveyinletwind.com](mailto:info@henveyinletwind.com);

**Phone:** ... (705) 857-5265; or

**Mail:** ..... 100 Simcoe Street, Suite 105, Toronto, ON M5H 3G2

We look forward to working with you throughout this study.

Encl: Notice of Commencement of Environmental Review and Public Information Centre #1

If you wish to be removed from our transmission line contact list please advise us by endorsing the relevant section below and returning this page by mail (100 Simcoe St., Ste. 105, Toronto, ON M5H 3G2) or email ([info@henveyinletwind.com](mailto:info@henveyinletwind.com)) by **March 16, 2015**.

- ☐ The transmission line will not impact our agency's / organization's mandate or programs; we do not wish to be kept informed about this matter. Please remove us from the transmission line contact list.

January 23, 2015

Mr. Neil Pirie  
Manager  
Parry Sound Municipal Airport  
97 Airport Road  
Seguin, ON P2A 2W8

Dear Mr. Pirie:

**RE: Notice of Commencement of Environmental Review & Public Information Centre #1**

Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, has commenced planning for the construction of a transmission line with a voltage of up to 500 kilovolts ("kV"). The transmission line will deliver electricity generated from the Henvey Inlet Wind Energy Centre ("HIWEC"), located on the Henvey Inlet First Nation Reserve No. 2, to the Ontario electricity grid. Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The Environmental Review for the transmission line will:

- Review existing conditions of the study area;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Enclosed is a copy of the Notice of Commencement of Environmental Review and Public Information Centre ("PIC") #1, which provides an overview of the Environmental Review process, details on the first round of PICs, and information on the Transmission Line Description Report.

It is anticipated that there will be several future opportunities for input into the Environmental Review. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

If you believe that this matter does not impact your mandate or programs, we would appreciate you letting us know this by endorsing the space provided at the end of this letter. We would be grateful to receive this endorsement by or before **March 16, 2015**.

Throughout this study, should you wish to submit a comment or question, or receive more information, please contact Kim Sachtleben, Project Developer, and/ or Ken Noble, Project Developer, via:

**Email:**..... [info@henveyinletwind.com](mailto:info@henveyinletwind.com);

**Phone:** ... (705) 857-5265; or

**Mail:** ..... 100 Simcoe Street, Suite 105, Toronto, ON M5H 3G2

We look forward to working with you throughout this study.

Ms. Sylvie Quelha  
President  
Skerryvore Ratepayers Association  
P.O. Box 52  
Nobel, ON P0G 1G0

Dear Ms. Quelha:

**RE: Notice of Commencement of Environmental Review & Public Information Centre #1**

Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, has commenced planning for the construction of a transmission line with a voltage of up to 500 kilovolts ("kV"). The transmission line will deliver electricity generated from the Henvey Inlet Wind Energy Centre ("HIWEC"), located on the Henvey Inlet First Nation Reserve No. 2, to the Ontario electricity grid. Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The Environmental Review for the transmission line will:

- Review existing conditions of the study area;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Enclosed is a copy of the Notice of Commencement of Environmental Review and Public Information Centre ("PIC") #1, which provides an overview of the Environmental Review process, details on the first round of PICs, and information on the Transmission Line Description Report.

It is anticipated that there will be several future opportunities for input into the Environmental Review. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

If you believe that this matter does not impact your mandate or programs, we would appreciate you letting us know this by endorsing the space provided at the end of this letter. We would be grateful to receive this endorsement by or before **March 16, 2015**.

Dear Chief Thompson:

**RE: Notice of Commencement of Environmental Review & Public Information Centre #1**

Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, has commenced planning for the construction of a transmission line with a voltage of up to 500 kilovolts ("kV"). The transmission line will deliver electricity generated from the Henvey Inlet Wind Energy Centre ("HIWEC"), located on the Henvey Inlet First Nation Reserve No. 2, to the Ontario electricity grid. Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The Environmental Review for the transmission line will:

- Review existing conditions of the study area;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Enclosed is a copy of the Notice of Commencement of Environmental Review and Public Information Centre ("PIC") #1, which provides an overview of the Environmental Review process, details on the first round of PICs, and information on the Transmission Line Description Report.

It is anticipated that there will be several future opportunities for input into the Environmental Review. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

If you believe that this matter does not impact your mandate or programs, we would appreciate you letting us know this by endorsing the space provided at the end of this letter. We would be grateful to receive this endorsement by or before **March 16, 2015**.

Mayor Jamie McGarvey  
Mayor of the Town Parry Sound  
Town of Parry Sound  
52 Seguin Street  
Parry Sound, ON P2A 1B4

Dear Mayor McGarvey:

**RE: Notice of Commencement of Environmental Review & Public Information Centre #1**

Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, has commenced planning for the construction of a transmission line with a voltage of up to 500 kilovolts ("kV"). The transmission line will deliver electricity generated from the Henvey Inlet Wind Energy Centre ("HIWEC"), located on the Henvey Inlet First Nation Reserve No. 2, to the Ontario electricity grid. Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The Environmental Review for the transmission line will:

- Review existing conditions of the study area;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Enclosed is a copy of the Notice of Commencement of Environmental Review and Public Information Centre ("PIC") #1, which provides an overview of the Environmental Review process, details on the first round of PICs, and information on the Transmission Line Description Report.

It is anticipated that there will be several future opportunities for input into the Environmental Review. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

If you believe that this matter does not impact your mandate or programs, we would appreciate you letting us know this by endorsing the space provided at the end of this letter. We would be grateful to receive this endorsement by or before **March 16, 2015**.

January 23, 2015

103.3 Moose FM  
60 James Street, Suite 301  
Parry Sound, ON P2A 1T5

Dear Sir/Madam:

**RE: Notice of Commencement of Environmental Review & Public Information Centre #1**

Nigig Power Corporation ("Nigig") received a Feed-in-Tariff ("FIT") Contract from the Ontario Power Authority ("OPA") in 2011 for a 300 megawatt ("MW") wind energy centre on Reserve No. 2 lands held by the Crown in trust for the benefit of Henvey Inlet First Nation ("HIFN"). These lands are located on the eastern shore of Georgian Bay, north of Parry Sound. Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, is proposing to develop the 300 MW Henvey Inlet Wind Energy Centre ("HIWEC") as well as a transmission line with a voltage of up to 500 kilovolts ("kV") to deliver electricity generated from the HIWEC to the Ontario electricity grid.

Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

HIFN has legal authority to address the environmental assessment ("EA") of projects on its Reserve lands. The EA for the HIWEC is being undertaken to address all HIFN EA requirements. It will result in an HIWEC EA report that will be available for public and HIFN review and will require Band Council approval. The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The assessments will:

- Review existing conditions of the study areas;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Enclosed are copies of the following:

- Notice of Commencement of Environmental Assessment and Public Information Centre ("PIC") #1 by Henvey Inlet Wind LP for the Henvey Inlet Wind Energy Centre; and
- Notice of Commencement of Environmental Review and Public Information Centre #1 by Henvey Inlet Wind LP for a Transmission Line.

These notices provide an overview of the environmental studies to be undertaken, details on the first round of PICs, and information on the HIWEC Description Report and Transmission Line Description Report.

It is anticipated that there will be several future opportunities for input into these EAs. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

If you believe that this matter does not impact your mandate or programs, we would appreciate you letting us know this by endorsing the space provided at the end of this letter. We would be grateful to receive this endorsement by or before **March 16, 2015**.

Throughout this study, should you wish to submit a comment or question, or receive more information, please contact Kim Sachtleben, Project Developer, and/ or Ken Noble, Project Developer, via:

**Email:**.....info@henveyinletwind.com;

**Phone:** ... (705) 857-5265; or

**Mail:** ..... 100 Simcoe Street, Suite 105, Toronto, ON M5H 3G2.

We look forward to working with you throughout these studies.

January 23, 2015

Ms. Sandra Tofani  
Implementation Manager – Adelaide  
Bell Canada  
76 Adelaide Street West, Floor 10A  
Toronto, ON M5H 1P6

Dear Ms. Tofani:

**RE: Notice of Commencement of Environmental Review & Public Information Centre #1**

Nigig Power Corporation ("Nigig") received a Feed-in-Tariff ("FIT") Contract from the Ontario Power Authority ("OPA") in 2011 for a 300 megawatt ("MW") wind energy centre on Reserve No. 2 lands held by the Crown in trust for the benefit of Henvey Inlet First Nation ("HIFN"). These lands are located on the eastern shore of Georgian Bay, north of Parry Sound. Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, is proposing to develop the 300 MW Henvey Inlet Wind Energy Centre ("HIWEC") as well as a transmission line with a voltage of up to 500 kilovolts ("kV") to deliver electricity generated from the HIWEC to the Ontario electricity grid.

Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

HIFN has legal authority to address the environmental assessment ("EA") of projects on its Reserve lands. The EA for the HIWEC is being undertaken to address all HIFN EA requirements. It will result in an HIWEC EA report that will be available for public and HIFN review and will require Band Council approval. The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The assessments will:

- Review existing conditions of the study areas;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Enclosed are copies of the following:

- Notice of Commencement of Environmental Assessment and Public Information Centre ("PIC") #1 by Henvey Inlet Wind LP for the Henvey Inlet Wind Energy Centre; and
- Notice of Commencement of Environmental Review and Public Information Centre #1 by Henvey Inlet Wind LP for a Transmission Line.

These notices provide an overview of the environmental studies to be undertaken, details on the first round of PICs, and information on the HIWEC Description Report and Transmission Line Description Report.

It is anticipated that there will be several future opportunities for input into these EAs. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

If you believe that this matter does not impact your mandate or programs, we would appreciate you letting us know this by endorsing the space provided at the end of this letter. We would be grateful to receive this endorsement by or before **March 16, 2015**.

Throughout this study, should you wish to submit a comment or question, or receive more information, please contact Kim Sachtleben, Project Developer, and/ or Ken Noble, Project Developer, via:

**Email:**.....info@henveyinletwind.com;

**Phone:** ... (705) 857-5265; or

**Mail:** ..... 100 Simcoe Street, Suite 105, Toronto, ON M5H 3G2.

We look forward to working with you throughout these studies.

January 23, 2015

Mr. Stefan Linder  
Manager, Public Works  
Design & Construction  
Canadian National Railway  
4 Welding Way off Administration Road  
Vaughan, ON L4K 1B9

Dear Mr. Linder:

**RE: Notice of Commencement of Environmental Review & Public Information Centre #1**

Nigig Power Corporation ("Nigig") received a Feed-in-Tariff ("FIT") Contract from the Ontario Power Authority ("OPA") in 2011 for a 300 megawatt ("MW") wind energy centre on Reserve No. 2 lands held by the Crown in trust for the benefit of Henvey Inlet First Nation ("HIFN"). These lands are located on the eastern shore of Georgian Bay, north of Parry Sound. Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, is proposing to develop the 300 MW Henvey Inlet Wind Energy Centre ("HIWEC") as well as a transmission line with a voltage of up to 500 kilovolts ("kV") to deliver electricity generated from the HIWEC to the Ontario electricity grid.

Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

HIFN has legal authority to address the environmental assessment ("EA") of projects on its Reserve lands. The EA for the HIWEC is being undertaken to address all HIFN EA requirements. It will result in an HIWEC EA report that will be available for public and HIFN review and will require Band Council approval. The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The assessments will:

- Review existing conditions of the study areas;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Enclosed are copies of the following:

- Notice of Commencement of Environmental Assessment and Public Information Centre ("PIC") #1 by Henvey Inlet Wind LP for the Henvey Inlet Wind Energy Centre; and
- Notice of Commencement of Environmental Review and Public Information Centre #1 by Henvey Inlet Wind LP for a Transmission Line.

These notices provide an overview of the environmental studies to be undertaken, details on the first round of PICs, and information on the HIWEC Description Report and Transmission Line Description Report.

It is anticipated that there will be several future opportunities for input into these EAs. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

If you believe that this matter does not impact your mandate or programs, we would appreciate you letting us know this by endorsing the space provided at the end of this letter. We would be grateful to receive this endorsement by or before **March 16, 2015**.

Nigig Power Corporation ("Nigig") received a Feed-in-Tariff ("FIT") Contract from the Ontario Power Authority ("OPA") in 2011 for a 300 megawatt ("MW") wind energy centre on Reserve No. 2 lands held by the Crown in trust for the benefit of Henvey Inlet First Nation ("HIFN"). These lands are located on the eastern shore of Georgian Bay, north of Parry Sound. Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, is proposing to develop the 300 MW Henvey Inlet Wind Energy Centre ("HIWEC") as well as a transmission line with a voltage of up to 500 kilovolts ("kV") to deliver electricity generated from the HIWEC to the Ontario electricity grid.

Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

HIFN has legal authority to address the environmental assessment ("EA") of projects on its Reserve lands. The EA for the HIWEC is being undertaken to address all HIFN EA requirements. It will result in an HIWEC EA report that will be available for public and HIFN review and will require Band Council approval. The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The assessments will:

- Review existing conditions of the study areas;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Enclosed are copies of the following:

- Notice of Commencement of Environmental Assessment and Public Information Centre ("PIC") #1 by Henvey Inlet Wind LP for the Henvey Inlet Wind Energy Centre; and
- Notice of Commencement of Environmental Review and Public Information Centre #1 by Henvey Inlet Wind LP for a Transmission Line.

These notices provide an overview of the environmental studies to be undertaken, details on the first round of PICs, and information on the HIWEC Description Report and Transmission Line Description Report.

It is anticipated that there will be several future opportunities for input into these EAs. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

If you believe that this matter does not impact your mandate or programs, we would appreciate you letting us know this by endorsing the space provided at the end of this letter. We would be grateful to receive this endorsement by or before **March 16, 2015**.

January 23, 2015

Mr. Bill Lougheed  
Executive Director  
Georgian Bay Land Trust  
920 Yonge Street, Suite 609  
Toronto, ON M4W 3C7

Dear Mr. Lougheed:

**RE: Notice of Commencement of Environmental Review & Public Information Centre #1**

Nigig Power Corporation ("Nigig") received a Feed-in-Tariff ("FIT") Contract from the Ontario Power Authority ("OPA") in 2011 for a 300 megawatt ("MW") wind energy centre on Reserve No. 2 lands held by the Crown in trust for the benefit of Henvey Inlet First Nation ("HIFN"). These lands are located on the eastern shore of Georgian Bay, north of Parry Sound. Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, is proposing to develop the 300 MW Henvey Inlet Wind Energy Centre ("HIWEC") as well as a transmission line with a voltage of up to 500 kilovolts ("kV") to deliver electricity generated from the HIWEC to the Ontario electricity grid.

Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

HIFN has legal authority to address the environmental assessment ("EA") of projects on its Reserve lands. The EA for the HIWEC is being undertaken to address all HIFN EA requirements. It will result in an HIWEC EA report that will be available for public and HIFN review and will require Band Council approval. The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The assessments will:

- Review existing conditions of the study areas;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Enclosed are copies of the following:

- Notice of Commencement of Environmental Assessment and Public Information Centre ("PIC") #1 by Henvey Inlet Wind LP for the Henvey Inlet Wind Energy Centre; and
- Notice of Commencement of Environmental Review and Public Information Centre #1 by Henvey Inlet Wind LP for a Transmission Line.

These notices provide an overview of the environmental studies to be undertaken, details on the first round of PICs, and information on the HIWEC Description Report and Transmission Line Description Report.

It is anticipated that there will be several future opportunities for input into these EAs. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

If you believe that this matter does not impact your mandate or programs, we would appreciate you letting us know this by endorsing the space provided at the end of this letter. We would be grateful to receive this endorsement by or before **March 16, 2015**.

Mr. Walter D. Kloostra  
Transmission Lines Sustainment Manager  
Hydro One Networks Inc.  
483 Bay Street, TCT15-A11, North Tower  
Toronto, ON M5G 2P5

Dear Mr. Kloostra:

**RE: Notice of Commencement of Environmental Review & Public Information Centre #1**

Nigig Power Corporation ("Nigig") received a Feed-in-Tariff ("FIT") Contract from the Ontario Power Authority ("OPA") in 2011 for a 300 megawatt ("MW") wind energy centre on Reserve No. 2 lands held by the Crown in trust for the benefit of Henvey Inlet First Nation ("HIFN"). These lands are located on the eastern shore of Georgian Bay, north of Parry Sound. Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, is proposing to develop the 300 MW Henvey Inlet Wind Energy Centre ("HIWEC") as well as a transmission line with a voltage of up to 500 kilovolts ("kV") to deliver electricity generated from the HIWEC to the Ontario electricity grid.

Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

HIFN has legal authority to address the environmental assessment ("EA") of projects on its Reserve lands. The EA for the HIWEC is being undertaken to address all HIFN EA requirements. It will result in an HIWEC EA report that will be available for public and HIFN review and will require Band Council approval. The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The assessments will:

- Review existing conditions of the study areas;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Enclosed are copies of the following:

- Notice of Commencement of Environmental Assessment and Public Information Centre ("PIC") #1 by Henvey Inlet Wind LP for the Henvey Inlet Wind Energy Centre; and
- Notice of Commencement of Environmental Review and Public Information Centre #1 by Henvey Inlet Wind LP for a Transmission Line.

These notices provide an overview of the environmental studies to be undertaken, details on the first round of PICs, and information on the HIWEC Description Report and Transmission Line Description Report.

It is anticipated that there will be several future opportunities for input into these EAs. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

If you believe that this matter does not impact your mandate or programs, we would appreciate you letting us know this by endorsing the space provided at the end of this letter. We would be grateful to receive this endorsement by or before **March 16, 2015**.

Throughout this study, should you wish to submit a comment or question, or receive more information, please contact Kim Sachtleben, Project Developer, and/ or Ken Noble, Project Developer, via:

Mr. Anthony J. Ierullo  
Transmission Lines Sustainment  
Hydro One Networks Inc.  
483 Bay Street, TCT15-A11, North Tower  
Toronto, ON M5G 2P5

Dear Mr. Ierullo:

**RE: Notice of Commencement of Environmental Review & Public Information Centre #1**

Nigig Power Corporation ("Nigig") received a Feed-in-Tariff ("FIT") Contract from the Ontario Power Authority ("OPA") in 2011 for a 300 megawatt ("MW") wind energy centre on Reserve No. 2 lands held by the Crown in trust for the benefit of Henvey Inlet First Nation ("HIFN"). These lands are located on the eastern shore of Georgian Bay, north of Parry Sound. Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, is proposing to develop the 300 MW Henvey Inlet Wind Energy Centre ("HIWEC") as well as a transmission line with a voltage of up to 500 kilovolts ("kV") to deliver electricity generated from the HIWEC to the Ontario electricity grid.

Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

HIFN has legal authority to address the environmental assessment ("EA") of projects on its Reserve lands. The EA for the HIWEC is being undertaken to address all HIFN EA requirements. It will result in an HIWEC EA report that will be available for public and HIFN review and will require Band Council approval. The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The assessments will:

- Review existing conditions of the study areas;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Enclosed are copies of the following:

- Notice of Commencement of Environmental Assessment and Public Information Centre ("PIC") #1 by Henvey Inlet Wind LP for the Henvey Inlet Wind Energy Centre; and
- Notice of Commencement of Environmental Review and Public Information Centre #1 by Henvey Inlet Wind LP for a Transmission Line.

These notices provide an overview of the environmental studies to be undertaken, details on the first round of PICs, and information on the HIWEC Description Report and Transmission Line Description Report.

It is anticipated that there will be several future opportunities for input into these EAs. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

If you believe that this matter does not impact your mandate or programs, we would appreciate you letting us know this by endorsing the space provided at the end of this letter. We would be grateful to receive this endorsement by or before **March 16, 2015**.

January 23, 2015

Mr. Norm Miller  
Parry Sound/Muskoka Member of Provincial Parliament  
17 James Street  
Parry Sound, ON P2A 1T4

Dear Mr. Miller:

**RE: Notice of Commencement of Environmental Review & Public Information Centre #1**

Nigig Power Corporation ("Nigig") received a Feed-in-Tariff ("FIT") Contract from the Ontario Power Authority ("OPA") in 2011 for a 300 megawatt ("MW") wind energy centre on Reserve No. 2 lands held by the Crown in trust for the benefit of Henvey Inlet First Nation ("HIFN"). These lands are located on the eastern shore of Georgian Bay, north of Parry Sound. Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, is proposing to develop the 300 MW Henvey Inlet Wind Energy Centre ("HIWEC") as well as a transmission line with a voltage of up to 500 kilovolts ("kV") to deliver electricity generated from the HIWEC to the Ontario electricity grid.

Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

HIFN has legal authority to address the environmental assessment ("EA") of projects on its Reserve lands. The EA for the HIWEC is being undertaken to address all HIFN EA requirements. It will result in an HIWEC EA report that will be available for public and HIFN review and will require Band Council approval. The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The assessments will:

- Review existing conditions of the study areas;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Enclosed are copies of the following:

- Notice of Commencement of Environmental Assessment and Public Information Centre ("PIC") #1 by Henvey Inlet Wind LP for the Henvey Inlet Wind Energy Centre; and
- Notice of Commencement of Environmental Review and Public Information Centre #1 by Henvey Inlet Wind LP for a Transmission Line.

These notices provide an overview of the environmental studies to be undertaken, details on the first round of PICs, and information on the HIWEC Description Report and Transmission Line Description Report.

It is anticipated that there will be several future opportunities for input into these EAs. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

If you believe that this matter does not impact your mandate or programs, we would appreciate you letting us know this by endorsing the space provided at the end of this letter. We would be grateful to receive this endorsement by or before **March 16, 2015**.

Throughout this study, should you wish to submit a comment or question, or receive more information, please contact Kim Sachtleben, Project Developer, and/ or Ken Noble, Project Developer, via:

**Email:** .....info@henveyinletwind.com;

**Phone:** ... (705) 857-5265; or

**Mail:** ..... 100 Simcoe Street, Suite 105, Toronto, ON M5H 3G2.

We look forward to working with you throughout these studies.

Bobbi Hunter  
OPE Planner  
Rogers Communications  
855 York Mills  
Toronto, ON M3B 1Z1

Dear Bobbi:

**RE: Notice of Commencement of Environmental Review & Public Information Centre #1**

Nigig Power Corporation ("Nigig") received a Feed-in-Tariff ("FIT") Contract from the Ontario Power Authority ("OPA") in 2011 for a 300 megawatt ("MW") wind energy centre on Reserve No. 2 lands held by the Crown in trust for the benefit of Henvey Inlet First Nation ("HIFN"). These lands are located on the eastern shore of Georgian Bay, north of Parry Sound. Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, is proposing to develop the 300 MW Henvey Inlet Wind Energy Centre ("HIWEC") as well as a transmission line with a voltage of up to 500 kilovolts ("kV") to deliver electricity generated from the HIWEC to the Ontario electricity grid.

Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

HIFN has legal authority to address the environmental assessment ("EA") of projects on its Reserve lands. The EA for the HIWEC is being undertaken to address all HIFN EA requirements. It will result in an HIWEC EA report that will be available for public and HIFN review and will require Band Council approval. The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The assessments will:

- Review existing conditions of the study areas;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Enclosed are copies of the following:

- Notice of Commencement of Environmental Assessment and Public Information Centre ("PIC") #1 by Henvey Inlet Wind LP for the Henvey Inlet Wind Energy Centre; and
- Notice of Commencement of Environmental Review and Public Information Centre #1 by Henvey Inlet Wind LP for a Transmission Line.

These notices provide an overview of the environmental studies to be undertaken, details on the first round of PICs, and information on the HIWEC Description Report and Transmission Line Description Report.

It is anticipated that there will be several future opportunities for input into these EAs. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

If you believe that this matter does not impact your mandate or programs, we would appreciate you letting us know this by endorsing the space provided at the end of this letter. We would be grateful to receive this endorsement by or before **March 16, 2015**.

Ms. Stephanie Demakos  
District EIT, Construction and Growth  
Union Gas Ltd.  
3840 Rhodes Drive, P.O. Box 700  
Windsor, ON N9A 6N7

Dear Ms. Demakos:

**RE: Notice of Commencement of Environmental Review & Public Information Centre #1**

Nigig Power Corporation ("Nigig") received a Feed-in-Tariff ("FIT") Contract from the Ontario Power Authority ("OPA") in 2011 for a 300 megawatt ("MW") wind energy centre on Reserve No. 2 lands held by the Crown in trust for the benefit of Henvey Inlet First Nation ("HIFN"). These lands are located on the eastern shore of Georgian Bay, north of Parry Sound. Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, is proposing to develop the 300 MW Henvey Inlet Wind Energy Centre ("HIWEC") as well as a transmission line with a voltage of up to 500 kilovolts ("kV") to deliver electricity generated from the HIWEC to the Ontario electricity grid.

Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

HIFN has legal authority to address the environmental assessment ("EA") of projects on its Reserve lands. The EA for the HIWEC is being undertaken to address all HIFN EA requirements. It will result in an HIWEC EA report that will be available for public and HIFN review and will require Band Council approval. The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The assessments will:

- Review existing conditions of the study areas;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Enclosed are copies of the following:

- Notice of Commencement of Environmental Assessment and Public Information Centre ("PIC") #1 by Henvey Inlet Wind LP for the Henvey Inlet Wind Energy Centre; and
- Notice of Commencement of Environmental Review and Public Information Centre #1 by Henvey Inlet Wind LP for a Transmission Line.

These notices provide an overview of the environmental studies to be undertaken, details on the first round of PICs, and information on the HIWEC Description Report and Transmission Line Description Report.

It is anticipated that there will be several future opportunities for input into these EAs. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

If you believe that this matter does not impact your mandate or programs, we would appreciate you letting us know this by endorsing the space provided at the end of this letter. We would be grateful to receive this endorsement by or before **March 16, 2015**.

Westwind Forest Stewardship Inc.  
72 Church Street  
Parry Sound, ON P2A 1Y9

Dear Sir/Madam:

**RE: Notice of Commencement of Environmental Review & Public Information Centre #1**

Nigig Power Corporation ("Nigig") received a Feed-in-Tariff ("FIT") Contract from the Ontario Power Authority ("OPA") in 2011 for a 300 megawatt ("MW") wind energy centre on Reserve No. 2 lands held by the Crown in trust for the benefit of Henvey Inlet First Nation ("HIFN"). These lands are located on the eastern shore of Georgian Bay, north of Parry Sound. Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, is proposing to develop the 300 MW Henvey Inlet Wind Energy Centre ("HIWEC") as well as a transmission line with a voltage of up to 500 kilovolts ("kV") to deliver electricity generated from the HIWEC to the Ontario electricity grid.

Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

HIFN has legal authority to address the environmental assessment ("EA") of projects on its Reserve lands. The EA for the HIWEC is being undertaken to address all HIFN EA requirements. It will result in an HIWEC EA report that will be available for public and HIFN review and will require Band Council approval. The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The assessments will:

- Review existing conditions of the study areas;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Enclosed are copies of the following:

- Notice of Commencement of Environmental Assessment and Public Information Centre ("PIC") #1 by Henvey Inlet Wind LP for the Henvey Inlet Wind Energy Centre; and
- Notice of Commencement of Environmental Review and Public Information Centre #1 by Henvey Inlet Wind LP for a Transmission Line.

These notices provide an overview of the environmental studies to be undertaken, details on the first round of PICs, and information on the HIWEC Description Report and Transmission Line Description Report.

It is anticipated that there will be several future opportunities for input into these EAs. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

If you believe that this matter does not impact your mandate or programs, we would appreciate you letting us know this by endorsing the space provided at the end of this letter. We would be grateful to receive this endorsement by or before **March 16, 2015**.

Mr. Mark Fox  
Network Radio Engineer - Public Safety Radio Services  
Ministry of Government Services  
222 Jarvis Street, 7th Floor  
Toronto ON M7A 0B6

Dear Mr. Fox:

**RE: Update on the Henvey Inlet Wind Energy Centre**

We are sending this letter to you as you had expressed interest in the Henvey Inlet Wind Energy Centre ("HIWEC") in 2011 and indicated that you required an update if the HIWEC changed.

Nigig Power Corporation ("Nigig") received a Feed-in-Tariff ("FIT") Contract from the Ontario Power Authority ("OPA") in 2011 for a 300 megawatt ("MW") wind energy centre on Reserve No. 2 lands held by the Crown in trust for the benefit of Henvey Inlet First Nation ("HIFN"). These lands are located on the eastern shore of Georgian Bay, north of Parry Sound. Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, is proposing to develop the 300 MW HIWEC as well as a transmission line with a voltage of up to 500 kilovolts ("kV") to deliver electricity generated from the HIWEC to the Ontario electricity grid.

Two potential Transmission Line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route extends approximately 90 km and follows Highway 69 south before diverting southeast from Highway 69 to follow the existing 500 kV HONI transmission line and connects to the HONI system at the 230 kV line southeast of Parry Sound. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

HIFN has legal authority to address the environmental assessment ("EA") of projects on its Reserve lands. The EA for the HIWEC is being undertaken to address all HIFN EA requirements. It will result in an HIWEC EA report that will be available for public and HIFN review and will require Band Council approval. The Transmission Line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The assessments will:

- Review existing conditions of the study areas;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Attached to this letter is current information on the EAs for the HIWEC and Transmission Line and recently held public meetings, as well as opportunities for comment on each. Please note that Transmission Line Route B may be adjusted slightly based on feedback from the public during PIC #1. Enclosed are copies of the following:

- Notice of Commencement of Environmental Assessment and Public Information Centre ("PIC") #1 by Henvey Inlet Wind LP for the Henvey Inlet Wind Energy Centre; and
- Notice of Commencement of Environmental Review and Public Information Centre #1 by Henvey Inlet Wind LP for a Transmission Line.

These notices provide an overview of the environmental studies to be undertaken, details on the first round of PICs, and information on the HIWEC Description Report and Transmission Line Description Report. A PIC was held on February 25, 2015 for the HIWEC and on March 3 and March 4, 2015 for the Transmission Line. The information boards that were on display at these events as well as more information on the HIWEC and Transmission Line can be accessed via the HIW website: [www.henveyinletwind.ca](http://www.henveyinletwind.ca).

It is anticipated that there will be several future opportunities for input into these EAs. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

If you believe that this matter does not impact your mandate or programs, we would appreciate you letting us know this by endorsing the space provided at the end of this letter. We would be grateful to receive this endorsement by or before **April 10, 2015**.

Throughout this study, should you wish to submit a comment or question, or receive more information, please contact Kim Sachtleben, Project Developer, and/or Ken Noble, Project Developer, via:

**Email:** .....info@henveyinletwind.com;

**Phone:** ... (705) 857-5265; or

March 20, 2015

Mr. David Sweetnam  
Executive Director  
Georgian Bay Forever  
PO Box 163  
Caledon ON L7E 5T2

Dear Mr. Sweetnam:

**RE: Update on the Henvey Inlet Wind Energy Centre**

We are sending this letter to you as you had expressed interest in the Henvey Inlet Wind Energy Centre ("HIWEC") in 2011 and indicated that you required an update if the HIWEC changed.

Nigig Power Corporation ("Nigig") received a Feed-in-Tariff ("FIT") Contract from the Ontario Power Authority ("OPA") in 2011 for a 300 megawatt ("MW") wind energy centre on Reserve No. 2 lands held by the Crown in trust for the benefit of Henvey Inlet First Nation ("HIFN"). These lands are located on the eastern shore of Georgian Bay, north of Parry Sound. Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, is proposing to develop the 300 MW HIWEC as well as a transmission line with a voltage of up to 500 kilovolts ("kV") to deliver electricity generated from the HIWEC to the Ontario electricity grid.

Two potential Transmission Line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route extends approximately 90 km and follows Highway 69 south before diverting southeast from Highway 69 to follow the existing 500 kV HONI transmission line and connects to the HONI system at the 230 kV line southeast of Parry Sound. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

HIFN has legal authority to address the environmental assessment ("EA") of projects on its Reserve lands. The EA for the HIWEC is being undertaken to address all HIFN EA requirements. It will result in an HIWEC EA report that will be available for public and HIFN review and will require Band Council approval. The Transmission Line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The assessments will:

- Review existing conditions of the study areas;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Attached to this letter is current information on the EAs for the HIWEC and Transmission Line and recently held public meetings, as well as opportunities for comment on each. Please note that Transmission Line Route B may be adjusted slightly based on feedback from the public during PIC #1. Enclosed are copies of the following:

- Notice of Commencement of Environmental Assessment and Public Information Centre ("PIC") #1 by Henvey Inlet Wind LP for the Henvey Inlet Wind Energy Centre; and
- Notice of Commencement of Environmental Review and Public Information Centre #1 by Henvey Inlet Wind LP for a Transmission Line.

These notices provide an overview of the environmental studies to be undertaken, details on the first round of PICs, and information on the HIWEC Description Report and Transmission Line Description Report. A PIC was held on February 25, 2015 for the HIWEC and on March 3 and March 4, 2015 for the Transmission Line. The information boards that were on display at these events as well as more information on the HIWEC and Transmission Line can be accessed via the HIW website: [www.henveyinletwind.ca](http://www.henveyinletwind.ca).

It is anticipated that there will be several future opportunities for input into these EAs. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

If you believe that this matter does not impact your mandate or programs, we would appreciate you letting us know this by endorsing the space provided at the end of this letter. We would be grateful to receive this endorsement by or before **April 10, 2015**.

March 20, 2015

Mr. Larry Woolner  
President  
Sail Parry Sound  
PO Box 734  
Parry Sound ON P2A 2Z1

Dear Mr. Woolner:

**RE: Update on the Henvey Inlet Wind Energy Centre**

We are sending this letter to you as you had expressed interest in the Henvey Inlet Wind Energy Centre ("HIWEC") in 2011 and indicated that you required an update if the HIWEC changed.

Nigig Power Corporation ("Nigig") received a Feed-in-Tariff ("FIT") Contract from the Ontario Power Authority ("OPA") in 2011 for a 300 megawatt ("MW") wind energy centre on Reserve No. 2 lands held by the Crown in trust for the benefit of Henvey Inlet First Nation ("HIFN"). These lands are located on the eastern shore of Georgian Bay, north of Parry Sound. Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, is proposing to develop the 300 MW HIWEC as well as a transmission line with a voltage of up to 500 kilovolts ("kV") to deliver electricity generated from the HIWEC to the Ontario electricity grid.

Two potential Transmission Line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route extends approximately 90 km and follows Highway 69 south before diverting southeast from Highway 69 to follow the existing 500 kV HONI transmission line and connects to the HONI system at the 230 kV line southeast of Parry Sound. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

HIFN has legal authority to address the environmental assessment ("EA") of projects on its Reserve lands. The EA for the HIWEC is being undertaken to address all HIFN EA requirements. It will result in an HIWEC EA report that will be available for public and HIFN review and will require Band Council approval. The Transmission Line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The assessments will:

- Review existing conditions of the study areas;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Attached to this letter is current information on the EAs for the HIWEC and Transmission Line and recently held public meetings, as well as opportunities for comment on each. Please note that Transmission Line Route B may be adjusted slightly based on feedback from the public during PIC #1. Enclosed are copies of the following:

- Notice of Commencement of Environmental Assessment and Public Information Centre ("PIC") #1 by Henvey Inlet Wind LP for the Henvey Inlet Wind Energy Centre; and
- Notice of Commencement of Environmental Review and Public Information Centre #1 by Henvey Inlet Wind LP for a Transmission Line.

These notices provide an overview of the environmental studies to be undertaken, details on the first round of PICs, and information on the HIWEC Description Report and Transmission Line Description Report. A PIC was held on February 25, 2015 for the HIWEC and on March 3 and March 4, 2015 for the Transmission Line. The information boards that were on display at these events as well as more information on the HIWEC and Transmission Line can be accessed via the HIW website: [www.henveyinletwind.ca](http://www.henveyinletwind.ca).

It is anticipated that there will be several future opportunities for input into these EAs. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

If you believe that this matter does not impact your mandate or programs, we would appreciate you letting us know this by endorsing the space provided at the end of this letter. We would be grateful to receive this endorsement by or before **April 10, 2015**.

April 23, 2015

Eastern Georgian Bay Stewardship Council

Dear Sir/Madam:

**RE: Henvey Inlet Wind Energy Centre**

We are sending this letter to you as you may have interest in the Henvey Inlet Wind Energy Centre ("HIWEC").

Nigig Power Corporation ("Nigig") received a Feed-in-Tariff ("FIT") Contract from the Ontario Power Authority ("OPA") in 2011 for a 300 megawatt ("MW") wind energy centre on Reserve No. 2 lands held by the Crown in trust for the benefit of Henvey Inlet First Nation ("HIFN"). These lands are located on the eastern shore of Georgian Bay, north of Parry Sound. Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, is proposing to develop the 300 MW HIWEC as well as a transmission line with a voltage of up to 500 kilovolts ("kV") to deliver electricity generated from the HIWEC to the Ontario electricity grid.

Two potential Transmission Line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route extends approximately 90 km and follows Highway 69 south before diverting southeast from Highway 69 to follow the existing 500 kV HONI transmission line and connects to the HONI system at the 230 kV line southeast of Parry Sound. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

HIFN has legal authority to address the environmental assessment ("EA") of projects on its Reserve lands. The EA for the HIWEC is being undertaken to address all HIFN EA requirements. It will result in an HIWEC EA report that will be available for public and HIFN review and will require Band Council approval. The Transmission Line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The assessments will:

- Review existing conditions of the study areas;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Attached to this letter is current information on the EAs for the HIWEC and Transmission Line and recently held public meetings, as well as opportunities for comment on each. Please note that Transmission Line Route B may be adjusted slightly based on feedback from the public during PIC #1. Enclosed are copies of the following:

- Notice of Commencement of Environmental Assessment and Public Information Centre ("PIC") #1 by Henvey Inlet Wind LP for the Henvey Inlet Wind Energy Centre; and
- Notice of Commencement of Environmental Review and Public Information Centre #1 by Henvey Inlet Wind LP for a Transmission Line.

These notices provide an overview of the environmental studies to be undertaken, details on the first round of PICs, and information on the HIWEC Description Report and Transmission Line Description Report. A PIC was held on February 25, 2015 for the HIWEC and on March 3 and March 4, 2015 for the Transmission Line. The information boards that were on display at these events as well as more information on the HIWEC and Transmission Line can be accessed via the HIW website: [www.henveyinletwind.ca](http://www.henveyinletwind.ca).

It is anticipated that there will be several future opportunities for input into these EAs. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

If you believe that this matter does not impact your mandate or programs, we would appreciate you letting us know this by endorsing the space provided at the end of this letter. We would be grateful to receive this endorsement by or before **May 15, 2015**.

Throughout this study, should you wish to submit a comment or question, or receive more information, please contact Kim Sachtleben, Project Developer, and/or Ken Noble, Project Developer, via:

Ms. Gail Mitchell  
Director  
Aboriginal Affairs and Northern Development Canada  
Ontario Region  
25 St. Clair Avenue East, 8th Floor  
Toronto, ON M4T 1M2

Dear Ms. Mitchell:

**RE: Notice of Commencement of Environmental Assessment & Public Information Centre #1**

Nigig Power Corporation ("Nigig") received a Feed-in-Tariff ("FIT") Contract from the Ontario Power Authority ("OPA") in 2011 for a 300 megawatt ("MW") wind energy centre on Reserve No. 2 lands held by the Crown in trust for the benefit of Henvey Inlet First Nation ("HIFN"). These lands are located on the eastern shore of Georgian Bay, north of Parry Sound. Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, is proposing to develop the 300 MW Henvey Inlet Wind Energy Centre ("HIWEC"). The HIWEC will be connected to a transmission line with a voltage of up to 500 kilovolts ("kV") to deliver electricity to the Ontario electricity grid.

Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

HIFN has legal authority to address the environmental assessment ("EA") of projects on its Reserve lands. The EA for the HIWEC is being undertaken to address all HIFN EA requirements. It will result in an HIWEC EA report that will be available for public and HIFN review and will require Band Council approval. The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The assessments will:

- Review existing conditions of the study areas;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

Enclosed are copies of the following:

- Notice of Commencement of Environmental Assessment and Public Information Centre ("PIC") #1 by Henvey Inlet Wind LP for the Henvey Inlet Wind Energy Centre; and
- Notice of Commencement of Environmental Review and Public Information Centre #1 by Henvey Inlet Wind LP for a Transmission Line.

These notices provide an overview of the environmental studies to be undertaken, details on the first round of PICs, and information on the HIWEC Description Report and Transmission Line Description Report.

As part of our notification efforts for the transmission line, we intend to notify the Magnetawan First Nation, Shawanaga First Nation, Wasauksing First Nation, Dokis First Nation and Métis Nation of Ontario. HIW values the participation of Aboriginal communities, and wishes to ensure that all Aboriginal interests and concerns are taken into consideration and addressed in a timely manner. We request that you confirm that these communities are the most appropriate for consultation, and that you will identify any other communities or groups that should also be consulted for the transmission line.

It is anticipated that there will be several future opportunities for input into these EAs. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

Throughout this study, should you wish to submit a comment or question, or receive more information, please contact Patricia Stirbys, Aboriginal Practice Leader, and Ken Noble, Project Developer, via:

January 23, 2015

Chief William Diabo and Council  
Magnetawan First Nation  
Administration Building, 10 Hwy 529  
Britt, ON P0G 1A0

Dear Chief Diabo and Council:

**RE: Notice of Commencement of Environmental Assessment & Public Information Centre #1**

Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, has commenced planning for the construction of a transmission line with a voltage of up to 500 kilovolts ("kV"). The transmission line will deliver electricity generated from the Henvey Inlet Wind Energy Centre ("HIWEC"), located on the Henvey Inlet First Nation Reserve No. 2, to the Ontario electricity grid. Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station to connect to the HONI line.

The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The Environmental Review for the transmission line will:

- Review existing conditions of the study area;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

As part of our notification efforts, we value your community's participation in the planning of the transmission line. We also wish to give you an opportunity to ensure that all of your Aboriginal interests and concerns are taken into consideration and addressed in a timely manner. Please also identify any individuals that should be included on the mailing list for future notices. We would be happy to engage them through future notices or discussions.

Enclosed is a copy of the Notice of Commencement of Environmental Review and Public Information Centre ("PIC") #1, providing an overview of the Environmental Review process, details on the first round of PICs, and information on the Transmission Line Description Report.

Your community will be notified of each stage of the Environmental Review process and provided opportunities to provide feedback. It is anticipated that there will be several future opportunities for input into these EAs. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

Please advise us of your interest in this study by responding to this letter with the following information by **March 16, 2015**:

- The representative from your community / organization who will participate as part of the study;
- If you would like to be removed from the transmission line contact list because your community / organization has no concerns; and/or
- Initial comments and feedback pertaining to the study that should be considered as we move forward.

Please be advised that in association with this letter to your community / organization, we have issued letters to the following federal and provincial agencies, as well as Aboriginal communities / organizations:

- Aboriginal Affairs and Northern Development, Environmental Unit;
- Ministry of Aboriginal Affairs, Consultation Unit; and
- Aboriginal Communities / Organizations:
  - Magnetawan First Nation;
  - Shawanaga First Nation;
  - Wasauksing First Nation;
  - Dokis First Nation; and
  - Métis Nation of Ontario.

Throughout this study, should you wish to submit a comment or question, or receive more information, please contact Patricia Stirbys by:

**Email:**.....info@henveyinletwind.com;

**Phone:** ... (705) 857-5265; or

January 23, 2015

Mr. Adam Good  
Consultation Points Person  
Shawanaga First Nation  
R.R. 1, 2 Village Road  
Nobel, ON P0G 1G0

Dear Mr. Good:

**RE: Notice of Commencement of Environmental Assessment & Public Information Centre #1**

Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, has commenced planning for the construction of a transmission line with a voltage of up to 500 kilovolts ("kV"). The transmission line will deliver electricity generated from the Henvey Inlet Wind Energy Centre ("HIWEC"), located on the Henvey Inlet First Nation Reserve No. 2, to the Ontario electricity grid. Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station to connect to the HONI line.

The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The Environmental Review for the transmission line will:

- Review existing conditions of the study area;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

As part of our notification efforts, we value your community's participation in the planning of the transmission line. We also wish to give you an opportunity to ensure that all of your Aboriginal interests and concerns are taken into consideration and addressed in a timely manner. Please also identify any individuals that should be included on the mailing list for future notices. We would be happy to engage them through future notices or discussions.

Enclosed is a copy of the Notice of Commencement of Environmental Review and Public Information Centre ("PIC") #1, providing an overview of the Environmental Review process, details on the first round of PICs, and information on the Transmission Line Description Report.

Your community will be notified of each stage of the Environmental Review process and provided opportunities to provide feedback. It is anticipated that there will be several future opportunities for input into these EAs. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

Please advise us of your interest in this study by responding to this letter with the following information by **March 16, 2015**:

- The representative from your community / organization who will participate as part of the study;
- If you would like to be removed from the transmission line contact list because your community / organization has no concerns; and/or
- Initial comments and feedback pertaining to the study that should be considered as we move forward.

Please be advised that in association with this letter to your community / organization, we have issued letters to the following federal and provincial agencies, as well as Aboriginal communities / organizations:

- Aboriginal Affairs and Northern Development, Environmental Unit;
- Ministry of Aboriginal Affairs, Consultation Unit; and
- Aboriginal Communities / Organizations:
  - Magnetawan First Nation;
  - Shawanaga First Nation;
  - Wasauksing First Nation;

Chief Wayne Pamajewon and Council  
Shawanaga First Nation  
R.R. 1, 2 Village Road  
Nobel, ON P0G 1G0

Dear Chief Pamajewon and Council:

**RE: Notice of Commencement of Environmental Assessment & Public Information Centre #1**

Henvey Inlet Wind LP ("HIW"), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, has commenced planning for the construction of a transmission line with a voltage of up to 500 kilovolts ("kV"). The transmission line will deliver electricity generated from the Henvey Inlet Wind Energy Centre ("HIWEC"), located on the Henvey Inlet First Nation Reserve No. 2, to the Ontario electricity grid. Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station to connect to the HONI line.

The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The Environmental Review for the transmission line will:

- Review existing conditions of the study area;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

As part of our notification efforts, we value your community's participation in the planning of the transmission line. We also wish to give you an opportunity to ensure that all of your Aboriginal interests and concerns are taken into consideration and addressed in a timely manner. Please also identify any individuals that should be included on the mailing list for future notices. We would be happy to engage them through future notices or discussions.

Enclosed is a copy of the Notice of Commencement of Environmental Review and Public Information Centre ("PIC") #1, providing an overview of the Environmental Review process, details on the first round of PICs, and information on the Transmission Line Description Report.

Your community will be notified of each stage of the Environmental Review process and provided opportunities to provide feedback. It is anticipated that there will be several future opportunities for input into these EAs. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

Chief Wayne McQuabbie and Council

Henvey Inlet First Nation  
295 Pickerel River Road  
Pickerel, ON P0G 1J0

Dear Chief McQuabbie and Council:

**RE: Notice of Commencement of Environmental Assessment & Public Information Centre #1**

Nigig Power Corporation ("Nigig") received a Feed-in-Tariff ("FIT") Contract from the Ontario Power Authority ("OPA") in 2011 for a 300 megawatt ("MW") wind energy centre on Reserve No. 2 lands held by the Crown in trust for the benefit of Henvey Inlet First Nation ("HIFN"). A limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, is proposing to develop the 300 MW Henvey Inlet Wind Energy Centre ("HIWEC") as well as a transmission line with a voltage of up to 500 kilovolts ("kV") to deliver electricity generated from the HIWEC to the Ontario electricity grid.

Two potential transmission line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. ("HONI") transmission line (approximately 20 kilometres ("km")). The second route follows Highway 69 south to the Parry Sound Transformer Station extending approximately 90 km. Both routes may require construction of a transformer station or switching station to connect to the HONI line.

HIFN has legal authority to address the environmental assessment ("EA") of projects on its Reserve lands. As the HIWEC will be located on HIFN Reserve No. 2, the EA for the HIWEC is being undertaken to address all HIFN EA requirements. It will result in an HIWEC EA report that will be available for public and HIFN review and will require Band Council approval. The transmission line, existing off of reserve lands, will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, a Report will be made available for a 30-day review and comment period.

The assessments will:

- Review existing conditions of the study areas;
- Assess potential effects of construction, operations and maintenance and decommissioning on the environment and establish appropriate mitigation measures, if necessary; and
- Collect, document and assess input and feedback from the public, Aboriginal communities and other stakeholder groups.

We value HIFN's participation in the planning of the wind energy centre and the transmission line. We also wish to give you an opportunity to ensure that all of your Aboriginal interests and concerns are taken into consideration and addressed in a timely manner.

Enclosed is a copy of the Notice of Commencement of Environmental Assessment and Community Information Centre ("CIC") #1 that was distributed to the HIFN Band Members. Also enclosed is a copy of the Notice of Commencement of Environmental Review and Public Information Centre ("PIC") #1 for the HIWEC and PIC #1 for the Transmission Line study. These will provide you with an overview of the Environmental Review processes, details on the first round of PICs, and information on the HIWEC and Transmission Line Description Reports.

Enclosed are copies of the following:

- Notice of Commencement of Environmental Assessment and Public Information Centre ("PIC") #1 by Henvey Inlet Wind LP for the Henvey Inlet Wind Energy Centre;
- Notice of Commencement of Environmental Review and Public Information Centre #1 by Henvey Inlet Wind LP for a Transmission Line;
- Notice of Commencement of Environmental Assessment and Community Information Centre ("CIC") #1;
- HIWEC Description Report; and
- Transmission Line Description Report.

HIFN will be notified of each stage of the EA process and provided opportunities to provide feedback. It is anticipated that there will be several future opportunities for input into these EAs. Two rounds of PICs as well as several meetings with agencies, Local Area Municipalities, and cottagers are planned.

Please respond to this letter with the following information by **March 16, 2015**:

- The representative from your community / organization who will participate as part of the study;
- Any individuals that should be included on the mailing list for future notices.
- ; and/or
- Initial comments and feedback pertaining to the study that should be considered as we move forward.

Please be advised that we have issued letters to the following federal and provincial agencies, as well as Aboriginal communities / organizations:

- Aboriginal Affairs and Northern Development, Environmental Unit;
- Ministry of Aboriginal Affairs, Consultation Unit; and
- Aboriginal Communities / Organizations:
  - Magnetawan First Nation;
  - Shawanaga First Nation;
  - Wasauksing First Nation;
  - Dokis First Nation; and
  - Métis Nation of Ontario.

Throughout this study, should you wish to submit a comment or question, or receive more information, please contact Patricia Stirbys by:

**Email:**.....info@henveyinletwind.com;

**Phone:** ... (705) 857-5265; or

**Mail:** ..... 100 Simcoe Street, Suite 105, Toronto, ON M5H 3G2

Encl: • Notice of Commencement of Environmental Assessment and Public Information Centre ("PIC") #1 by Henvey Inlet Wind LP for the Henvey Inlet Wind Energy Centre  
• Notice of Commencement of Environmental Assessment and Public Information Centre #1 for Henvey Inlet Wind LP Wind Energy Centre  
• Notice of Commencement of Environmental Review and Public Information Centre #1 by Henvey Inlet Wind LP for a Transmission Line  
• HIWEC Description Report  
• Transmission Line Description Report

## Notice of Public Information Centre #2

# NOTICE OF PUBLIC INFORMATION CENTRE #2

## By Henvey Inlet Wind LP for a Transmission Line

**Name:** Henvey Inlet Wind Transmission Line

**Location:** District of Parry Sound, Ontario

### Description:

Henvey Inlet Wind LP (HIW), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, has commenced planning for the construction of a Transmission Line with a voltage of up to 500 kilovolts (kV). The HIW Transmission Line will deliver electricity generated from the Henvey Inlet Wind Energy Centre (HIWEC), located on the Henvey Inlet First Nation Reserve No. 2, to the Ontario electricity grid. Two potential Transmission Line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. (HONI) transmission line (approximately 20 kilometres (km)). The second route is approximately 90 km and travels south from Henvey Inlet First Nation Reserve No. 2, generally parallel to the future Highway 69 alignment before diverting southeast from Highway 69 to follow the existing 500 kV HONI corridor. This route connects to the HONI system at the 230 kV line southeast of Parry Sound. Both routes may require the construction of a switching station to connect to the HONI line.

The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, an Environmental Review Report (ERR) will be made available for a 30-day review and comment period. The ERR will include a review of existing conditions, potential effects, mitigation measures and document stakeholders input and consultation activities.

### Invitation to Public Information Centre (PIC) #2:

HIW is hosting the second PIC regarding the proposed Transmission Line on Saturday, August 1, 2015, at two different locations. Members of the public, Anishinabek and other Aboriginal communities, agencies and all other interested parties are encouraged to attend the PIC at either location. The purpose of this event is to provide an opportunity to review and provide comments on the studies and investigations that have been conducted to date for the Transmission Line. The date and locations of the PICs are provided below:

**Location 1:** *Date:* ..... Saturday, August 1, 2015  
*Time:* ..... 10:00 a.m. to 12:00 p.m.  
*Location:* ..... Britt Legion  
511 Riverside Drive, Britt, ON

**Location 2:** *Date:* ..... Saturday, August 1, 2015  
*Time:* ..... 3:00 p.m. to 5:00 p.m.  
*Location:* ..... Bobby Orr Community Centre –  
Hart Trophy Room  
7-17 Mary Street, Parry Sound, ON

### Interim Draft Available for Review and Comment:

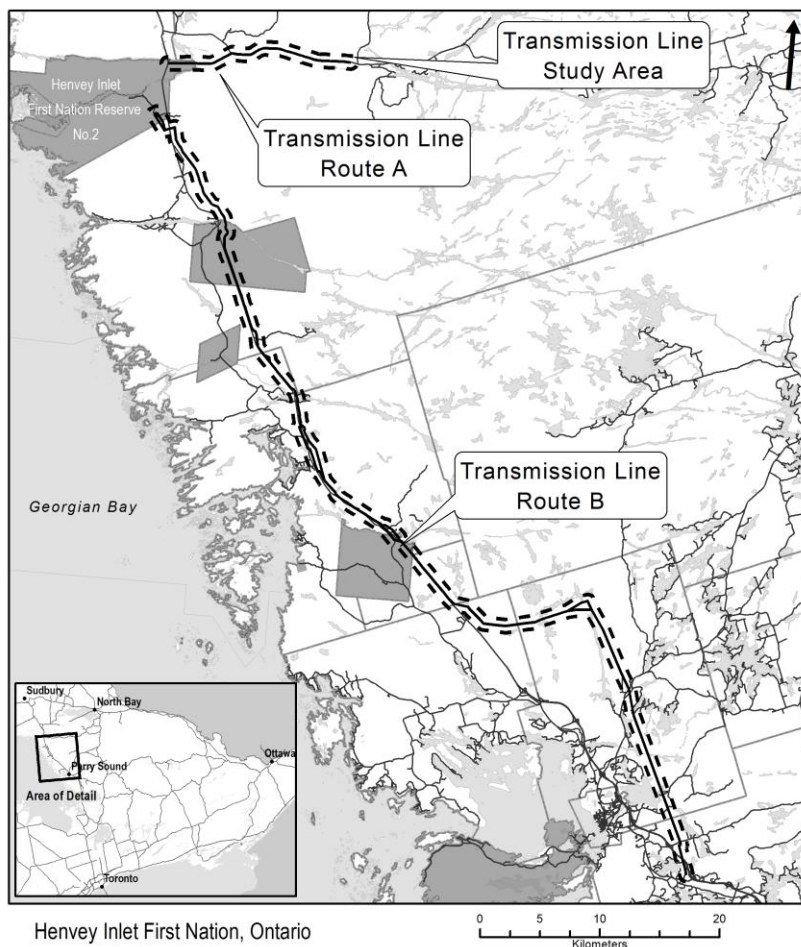

An Interim Draft ERR which includes a description of the undertaking and baseline studies for the HIW Transmission Line will be made available on July 2, 2015, on the HIW website: [www.henveyinletwind.com](http://www.henveyinletwind.com). We encourage all interested parties to review and provide comment on this document - your feedback is important to us and will be considered as part of the assessment process. The deadline for comments on the Interim Draft ERR is August 8, 2015.

### HIW Contacts and Further Information:

We are committed to engaging all stakeholders throughout the development of the Transmission Line and encourage anyone who is interested to get in touch with us at any time with questions, comments or concerns. If you are unable to attend either of these PICs and would like further information, please contact:

**Kim Sachtleben**, Project Developer and/or  
**Ken Noble**, Project Developer  
*Email:* [info@henveyinletwind.com](mailto:info@henveyinletwind.com)  
*Phone:* 705.857.5265  
*Mail:* Henvey Inlet Wind Office  
295 Pickerel River Road  
Pickersel, ON P0G 1J0

Please note: the Wind Energy Centre associated with this Transmission Line is being studied under a different Environmental Assessment process. For more information, please visit [www.henveyinletwind.com](http://www.henveyinletwind.com).

## Adults on Calgary area First Nation share cash

CALGARY - It's a happy day for adult members of a Calgary-area First Nation. Residents of the Tsuu T'ina reserve who are over 18 are to receive an equal share of \$137.5 million received in a land transfer deal for a city ring road project. Another \$137.5 million from the agreement with the Alberta government is to be invested in a legacy trust fund. Chief Roy Whitney says the deal not only provides money for individuals but will allow for the development of Tsuu T'ina land for business expansion.

The exact amount of money for each resident has not been released, and is subject to a population count.

# Akwesasne men kept armed watch over territory's edge

By Jorge Barrera  
APTN

AKWESASNE - Two escaped murderers were caught and shot dead by NY state police bringing calm to the Akwesasne community where reports of the escapees were circulating.

At Akwesasne men armed with shotguns and

AR-15s, searched the swamp and thick bush on the edge of the territory Saturday for an escaped murderer who has been on the run from authorities for three weeks.

The camouflage-clad men, known as "Land Defenders," were acting on a tip from the community that a white male had been

spotted entering the woods in an area known as the "Al Capone bootleg trail" because it was used to smuggle booze during the prohibition area.

Roger Jock, who led the four-hour search, said the ongoing manhunt for the escaped inmate was beginning to put people in Akwesasne on edge.

"We have been watching and listening to this unfolding," said Jock. "A lot of people here are on edge."

The second of two convicted murderers who staged a brazen escape three weeks ago from a maximum-security prison in northern New York was shot and captured on an

Amish dairy farm near the Canadian border on Sunday, two days after his fellow inmate was killed in a confrontation with law enforcement officers, state police said. New York State and U.S. federal authorities had focused their search on an area about 16 kilometres south of Malone, NY, which sits about 40 kilometres south-east of the U.S.-side of the Akwesasne Mohawk territory. Akwesasne straddles the Canada-U.S. border and is about 120 kilometres west of Montreal.

State and federal authorities established a 35 square-kilometre perimeter around the area they believed still contained David Sweat, one of two men who escaped the Clinton Correctional prison on June. 6. About 1,200 state and federal law enforcement officers are involved in the manhunt.

St. Regis Mohawk police chief Matthew Rourke said in an interview with APTN National News Friday that the hunt for the escaped inmate is still too far away from where we are, if not farther away," said Rourke. "We are aware of the situation and we will provide whatever assistance as required."

Jock said he believes Sweat had likely slipped through the police perimeter.

New York State police said last week that investigators believed the escaped men were headed to Canada. Jock said he grew concerned the men could end up in Akwesasne and put out a call for eyes on the edge of the territory.

Jock also got in touch with Duane Chapman,

also known as Dog the Bounty Hunter, who is now in Malone.

Chapman was in sporadic contact with Charles Kader, an Akwesasne journalist, during the day. At one point Chapman texted, "go, go, go" after Kader sent him a photo of Jock and his crew searching through the bush.

The search crew waded through swamp and dense brush while swarmed by black flies and mosquitoes.

Jerry Jock joined the search out of concern for his family.

"It's basically about protecting our people," said Jock, as he sat at the back of a pick-up truck with an AR-15 next to him. "My kids are down the road over there."

Bryan King said he trekked through swamp and bush for the same reason.

"I live up the road too," said King, who carried a shotgun during the search. "We're basically all family."

Roger Jock said it is up to the men to protect the community and he said words have little meaning without action.

"If we can't protect our people, then we'll let someone else do it," he said. "But I am a strong believer in protecting our own."

Later in the evening, Jock received a request to check an area around a large garage at the end of a bush trail. He and a relative, with their semi-automatic long-guns in hand, slowly walked around the building and peered between rusting cars and trucks for any signs of an unwanted visitor.

"The plan is to make sure we don't take any rumours of sightings lightly," said Jock. "It's our responsibility." (With TIN files)

## NOTICE OF PUBLIC INFORMATION CENTRE #2

By Henvey Inlet Wind LP for a Transmission Line

**Name:** Henvey Inlet Wind Transmission Line

**Location:** District of Parry Sound, Ontario

### Description:

Henvey Inlet Wind LP (HIW), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, has commenced planning for the construction of a Transmission Line with a voltage of up to 500 kilovolts (kV). The HIW Transmission Line will deliver electricity generated from the Henvey Inlet Wind Energy Centre (HIWEC), located on the Henvey Inlet First Nation Reserve No. 2, to the Ontario electricity grid. Two potential Transmission Line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. (HONI) transmission line (approximately 20 kilometres (km)). The second route is approximately 90 km and travels south from Henvey Inlet First Nation Reserve No. 2, generally parallel to the future Highway 69 alignment before diverting southeast from Highway 69 to follow the existing 500 kV HONI corridor. This route connects to the HONI system at the 230 kV line southeast of Parry Sound. Both routes may require the construction of a switching station to connect to the HONI line.

The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, an Environmental Review Report (ERR) will be made available for a 30-day review and comment period. The ERR will include a review of existing conditions, potential effects, mitigation measures and document stakeholders input and consultation activities.

### Invitation to Public Information Centre (PIC) #2:

HIW is hosting the second PIC regarding the proposed Transmission Line on Saturday, August 1, 2015, at two different locations. Members of the public, Anishinabek and other Aboriginal communities, agencies and all other interested parties are encouraged to attend the PIC at either location. The purpose of this event is to provide an opportunity to review and provide comments on the studies and investigations that have been conducted to date for the Transmission Line. The date and locations of the PICs are provided below:

**Location 1:** Date: ..... Saturday, August 1, 2015  
Time: ..... 10:00 a.m. to 12:00 p.m.  
Location: ..... Britt Legion  
511 Riverside Drive, Britt, ON

**Location 2:** Date: ..... Saturday, August 1, 2015  
Time: ..... 3:00 p.m. to 5:00 p.m.  
Location: ..... Bobby Orr Community Centre –  
Hart Trophy Room  
7-17 Mary Street, Parry Sound, ON

### Interim Draft Available for Review and Comment:

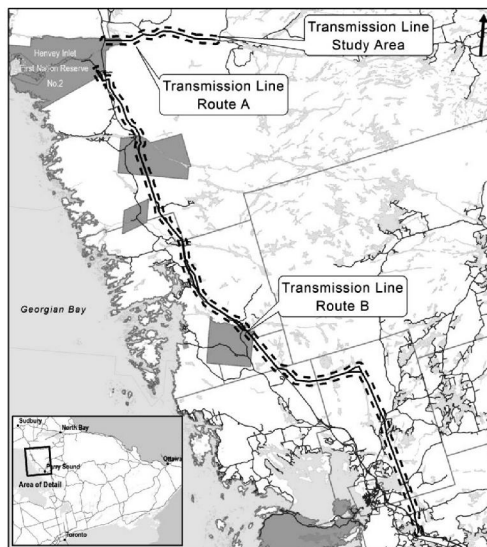

An Interim Draft ERR which includes a description of the undertaking and baseline studies for the HIW Transmission Line will be made available on July 2, 2015, on the HIW website: [www.henveyinletwind.com](http://www.henveyinletwind.com). We encourage all interested parties to review and provide comment on this document – your feedback is important to us and will be considered as part of the assessment process. The deadline for comments on the Interim Draft ERR is August 8, 2015.

### HIW Contacts and Further Information:

We are committed to engaging all stakeholders throughout the development of the Transmission Line and encourage anyone who is interested to get in touch with us at any time with questions, comments or concerns. If you are unable to attend either of these PICs and would like further information, please contact:

### Full-time Position - Recreation Employee

The Town of Parry Sound is now accepting applications for a Recreation Employee to complement its staff. The Corporation is committed to excellence, realized through strong and effective leadership, strategic and business planning, and a focus on its people and customers. The successful candidate will be an important member of the Public Works Department.

The successful applicant will be responsible for a variety of duties with respect to the position of Recreation Employee including:

- Assists in the maintenance of high standards of safety, cleanliness and technical operation for parks and recreation properties and programs and independently supervises and oversees site use and core upkeep;
- undertakes inside and outside maintenance operations and mechanical and technical repairs to equipment and facilities;
- assists in the organization, care, maintenance and operations of parks, properties and recreation services, special events and programs;
- responds to emergencies and participates in the on-call rotation as may be required.

The ideal candidate will possess:

- Minimum Grade 12 diploma;
- valid "G" driver's license in good standing;
- ability to operate ice maintenance equipment
- possess or be willing to obtain in a time-frame as determined by the Director of Public Works: O.R.F.A. Ice Technician certification (Basic Refrigeration, Ice Making and Painting Technologies and Ice Maintenance and Equipment Operation.)
- mechanical and construction skills to operate and maintain equipment such as trucks, ice resurfacers, edgers and grounds maintenance equipment;
- understanding of horticulture, arboriculture, turf maintenance and property maintenance practices;
- some of the duties require the incumbent to be able to fulfill the physical needs of the job;

This is a permanent full-time unionized position.

Wage rate: \$21.84 - \$24.00 per hour  
(as per CUPE Contract, 2014 wage schedule).

**Please submit your resume, with full details of your education, training and experience, by 4:00 p.m. on Wednesday, July 8, 2015**  
to the attention of Peter Brown, C.E.T., Director of Public Works, Town of Parry Sound, 52 Seguin Street, Parry Sound, ON, P2A 1B4 or by fax to (705)746-7461, or by email to [pbrown@townofparrysound.com](mailto:pbrown@townofparrysound.com).

*We thank everyone for his or her interest. Only those applicants selected for an interview will be notified after the closing date. Personal information is collected under the authority of the Municipal Freedom of Information and Protection of Privacy Act and will be used for employment assessment purposes only.*

The Town of Parry Sound is an equal opportunity employer that is committed to inclusive, barrier-free recruitment and selection processes. Accommodation will be provided in all parts of the hiring process as required under the Town of Parry Sound Recruitment Policy. If you require an accommodation, we will work with you to meet your needs.

### Personal Support Worker

*A position is available in the Town of Parry Sound to assist a person who has a physical disabilities.*

20 hours a week

no weekends or holidays.

PSW Certificate or Equivalent required.

A current CIPIC a must!

### NOTICE OF PUBLIC INFORMATION CENTRE #2

By Henvey Inlet Wind LP for a Transmission Line

Name: Henvey Inlet Wind Transmission Line  
Location: District of Parry Sound, Ontario

#### Description:

Henvey Inlet Wind LP (HIWL), a limited partnership between Pattern Renewable Holdings Canada ULC and Niglo Power Corporation, has commenced planning for the construction of a Transmission Line with a voltage of up to 500 kilovolts (kV). The HIWL Transmission Line will deliver electricity generated from the Henvey Inlet Wind Energy Centre (HIWEC), located on the Henvey Inlet First Nation Reserve No. 2, to the Ontario electricity grid. Two potential Transmission Line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. (HONI) transmission line (approximately 20 kilometres (km)). The second route is approximately 90 km and travels south from Henvey Inlet First Nation Reserve No. 2, generally parallel to the future Highway 89 alignment before diverting southeast from Highway 89 to follow the existing 500 kV HONI corridor. This route connects to the HONI system at the 230 kV line southeast of Parry Sound. Both routes may require the construction of a switching station to connect to the HONI line.

The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's Guide to Environmental Assessment Requirements for Electricity Projects (January 2011). At the end of the Environmental Review, an Environmental Review Report (ERR) will be made available for a 30-day review and comment period. The ERR will include a review of existing conditions, potential effects, mitigation measures and document stakeholders input and consultation activities.

#### Invitation to Public Information Centre (PIC) #2:

HIWL is hosting the second PIC regarding the proposed Transmission Line on Saturday, August 1, 2015, at two different locations. Members of the public, Anishinabek and other Aboriginal communities, agencies and all other interested parties are encouraged to attend the PIC at either location. The purpose of this event is to provide an opportunity to review and provide comments on the studies and investigations that have been conducted to date for the Transmission Line. The date and locations of the PICs are provided below:

**Location 1:** Date: Saturday, August 1, 2015  
Time: 10:00 a.m. to 12:00 p.m.  
Location: Britt Legion  
511 Riverside Drive, Britt, ON

**Location 2:** Date: Saturday, August 1, 2015  
Time: 3:00 p.m. to 5:00 p.m.  
Location: Boleby Orr Community Centre  
Hart Trophy Room  
7-17 Mary Street, Parry Sound, ON

#### Interim Draft Available for Review and Comment:

An Interim Draft ERR which includes a description of the undertaking and baseline studies for the HIWL Transmission Line will be made available on July 2, 2015, on the HIWL website: [www.henveyinletwind.com](http://www.henveyinletwind.com). We encourage all interested parties to review and provide comment on this document - your feedback is important to us and will be considered as part of the assessment process. The deadline for comments on the Interim Draft ERR is August 8, 2015.

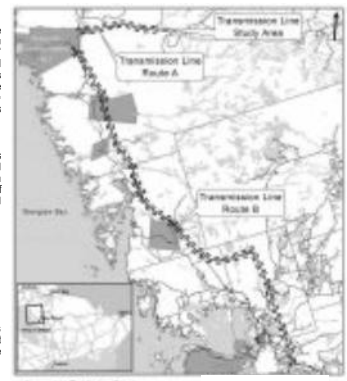

#### HIWL Contacts and Further Information:

We are committed to engaging all stakeholders throughout the development of the Transmission Line and encourage anyone who is interested to get in touch with us at any time with questions, comments or concerns. If you are unable to attend either of these PICs and would like further information, please contact:

Kim Sachleben, Project Developer and/or  
Ken Noble, Project Developer  
Email: [info@henveyinletwind.com](mailto:info@henveyinletwind.com)  
Phone: 705.857.5255

Pickering, ON P0G 1J0

Please note: the Wind Energy Centre associated with this Transmission Line is being studied under a different Environmental Assessment process. For more information, please visit [www.henveyinletwind.com](http://www.henveyinletwind.com).

Notice Released - July 1, 2015

YourClassifieds.ca

## Car strikes hydro pole; causes power outage

A portion of the territory was without power on Saturday after a car crashed into a hydro pole on Onondaga Road. Around noon on Saturday, firefighters from two Six Nations fire stations were dispatched to a single vehicle collision at 1575 Onondaga Road. A quick response was made with first arriving crews of Pumper/Rescue One arriving within five minutes of receiving the call. The first arriving crews reported that the collision involved a single vehicle older model car which left the roadway striking a hydro pole causing the hydro pole to break in half. Crews said that as a result of the break in the pole, the hydro lines were down and very close to the car and the ground. Due to the electrical hazard which was present, arriving crews were forced to create a defensive perimeter until the arrival of Hydro One crews.

# Ontario won't renew agreement with Confederacy

By Donna Durie  
Writer

A spokesperson for the Ontario Ministry of Aboriginal Affairs says it won't renew a communication framework it signed in 2012 with then-Aboriginal Affairs Minister Kathleen Wynne, now the premier of Ontario, with the Haudenosaunee Confederacy Chiefs Council.

Instead the Haudenosaunee Confederacy Chiefs' Council is being told it is welcome to sign a new political accord the province has entered into with elected chiefs in Ontario.

Flavia Mussio, MAA spokesperson, said the communications framework, which expired last year, has "served its purpose."

"The purpose of the communications framework was to help build a relationship between the Ministry of Aboriginal Affairs and the Confederacy Chiefs," she said in an email to the Turtle Island News. "The communications framework agreement served its purpose, and now Ontario is taking an inclusive approach to accomplish the

desired outcomes. The Haudenosaunee chiefs are very welcome to join those discussions. The door is open to an inclusive approach."

Mussio did not clarify what she meant by "desired outcomes."

The accord establishes a formal political relationship between the Province of Ontario and elected band

councils.

Ontario says the accord, which has yet to be formally signed, is meant to provide opportunity for "further reconciliation between First Nations and Ontario" and to "discuss topics that are of mutual interest such as resource benefits sharing and the treaty relationship."

"At the heart of the matter is the common desire of Ontario and the Chiefs in Council to make real progress in developing strategic, integrated and responsive policies and initiatives to improve outcomes for First Nations people and create prosperous, healthy and strong communities," said Mussio. "Ontario is committed to continuing to build positive relationships with First Nations and to work together to improve the quality of life in First Nation communities."

On June 17, a number of Ontario band council chiefs agreed to the political accord.

A formal signing ceremony between the Government of Ontario and the Chiefs of Ontario will be held sometime this summer.

The idea for the accord was first proposed by the Chiefs of Ontario.

"The accord recognizes First Nations have an inherent right to self-government and commits the Province and the Chiefs of Ontario to work together on shared priorities that improve the lives of First Nations people," the MAA stated in a press release.

Among the signatories will be newly-elected Ontario Regional Chief Isadore Day, and Premier Kathleen Wynne.

The accord was agreed to in principle with the following stipulations:

- First Nations, represented by the Chiefs-in-Assembly and the Government of Ontario, wish to move forward together in a spirit of respectful co-existence and with a view to revitalizing the treaty relationship;
- First Nations exist as self-governing Indigenous Nations and Peoples with their own governments, cultures, languages, traditions, customs and territories;

- The Ontario provincial Crown's jurisdiction and legal obligations are determined by the Canadian constitutional framework, which includes the common law and treaties entered into between First Nations and the Crown;
- First Nations and Ontario recognize the importance of strong First Nations governments in achieving a better quality of life for First Nations and creating a better future for First Nations children and youth;

- The accord is not intended to impact the interpretation of the rights, legal obligations or jurisdiction of the First Nations or Ontario.

The accord will recognize that First Nations have "an inherent right to self-government and that the relationship between Ontario and the First Nations must be based upon respect for this right."

Under the accord, the signatories will agree to host a meeting, at least twice per year, between the leadership of the COO and the premier. The parties will work to identify and address common priorities and issues, that will include, but are not limited to, the treaty relationship, resource benefits and revenue sharing and jurisdictional matters involving First Nations and Ontario.

"This political accord shows that there is a spirit of openness and a willingness from both our government and First Nations to work together to achieve common goals," said David Zimmer, Ontario Minister of Aboriginal Affairs. "Negotiating this accord has been a very positive experience. I look forward to continuing to work with the First Nations in Ontario, guided by this significant agreement."

Isadore Day, Ontario Regional Chief, says "I am pleased that the First Nations and Ontario have renewed their relationship. This accord recognizes that First Nations and Ontario must work together to address the pressing needs of our communities. I look forward to working with Ontario in the spirit of the accord."

## NOTICE OF PUBLIC INFORMATION CENTRE #2

By Henvey Inlet Wind LP for a Transmission Line

**Name:** Henvey Inlet Wind Transmission Line

**Location:** District of Parry Sound, Ontario

### Description:

Henvey Inlet Wind LP (HIW), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, has commenced planning for the construction of a Transmission Line with a voltage of up to 500 kilovolts (kV). The HIW Transmission Line will deliver electricity generated from the Henvey Inlet Wind Energy Centre (HIWEC), located on the Henvey Inlet First Nation Reserve No. 2, to the Ontario electricity grid. Two potential Transmission Line routes are currently being considered. The first route extends east from the HIWEC connecting to the existing 500 kV Hydro One Networks Inc. (HONI) transmission line (approximately 20 kilometres (km)). The second route is approximately 90 km and travels south from Henvey Inlet First Nation Reserve No. 2, generally parallel to the future Highway 69 alignment before diverting southeast from Highway 69 to follow the existing 500 kV HONI corridor. This route connects to the HONI system at the 230 kV line southeast of Parry Sound. Both routes may require the construction of a switching station to connect to the HONI line.

The transmission line will undergo a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). At the end of the Environmental Review, an Environmental Review Report (ERR) will be made available for a 30-day review and comment period. The ERR will include a review of existing conditions, potential effects, mitigation measures and document stakeholders input and consultation activities.

### Invitation to Public Information Centre (PIC) #2:

HIW is hosting the second PIC regarding the proposed Transmission Line on Saturday, August 1, 2015, at two different locations. Members of the public, Anishinabek and other Aboriginal communities, agencies and all other interested parties are encouraged to attend the PIC at either location. The purpose of this event is to provide an opportunity to review and provide comments on the studies and investigations that have been conducted to date for the Transmission Line. The date and locations of the PICs are provided below:

**Location 1:** Date: Saturday, August 1, 2015  
Time: 10:00 a.m. to 12:00 p.m.  
Location: Britt Legion  
511 Riverside Drive, Britt, ON

**Location 2:** Date: Saturday, August 1, 2015  
Time: 3:00 p.m. to 5:00 p.m.  
Location: Bobby Orr Community Centre –  
Hart Trophy Room  
7-17 Mary Street, Parry Sound, ON

### Interim Draft Available for Review and Comment:

An Interim Draft ERR which includes a description of the undertaking and baseline studies for the HIW Transmission Line will be made available on July 2, 2015, on the HIW website: [www.henveyinletwind.com](http://www.henveyinletwind.com). We encourage all interested parties to review and provide comment on this document - your feedback is important to us and will be considered as part of the assessment process. The deadline for comments on the Interim Draft ERR is August 8, 2015.

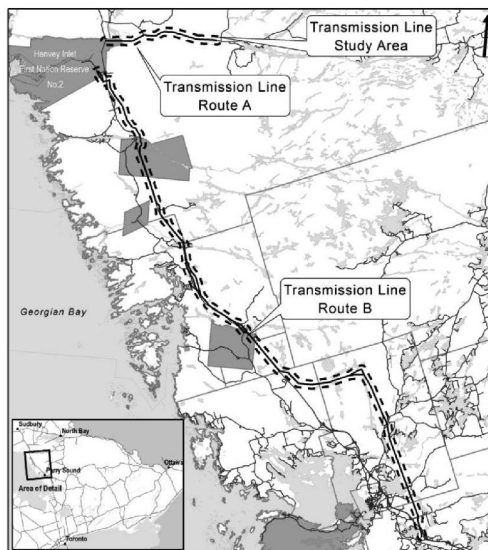

### HIW Contacts and Further Information:

We are committed to engaging all stakeholders throughout the development of the Transmission Line and encourage anyone who is interested to get in touch with us at any time with questions, comments or concerns. If you are unable to attend either of these PICs and would like further information, please contact:

**Kim Sachtleben**, Project Developer and/or  
**Ken Noble**, Project Developer  
Email: [info@henveyinletwind.com](mailto:info@henveyinletwind.com)  
Phone: 705.857.5265  
Mail: Henvey Inlet Wind Office  
295 Pickering River Road  
Pickering, ON P0G 1J0

Please note: the Wind Energy Centre associated with this Transmission Line is being studied under a different Environmental Assessment process. For more information, please visit [www.henveyinletwind.com](http://www.henveyinletwind.com).

## DAVE MILES

David Gary Miles passed away suddenly on Tuesday, July 14, 2015. Age 54 years. Beloved son of Ruth Ann Miles and the late Ross E. Miles. Dear nephew of Kirk and Nancy Sauer, and the late Mary Clancy. Fondly remembered by his nieces, nephews, other relatives, and friends.

Cremation has taken place.

Memorial visitation will take place at the **Logan Funeral Home**, 81 James Street, Parry Sound (705-746-5855), on Sunday, July 19th, 2015 from 2:00 - 4:00 P.M.

As expressions of sympathy, donations to the West Parry Sound Health Centre would be appreciated.

To send an on-line condolence please visit [www.logansfuneralhome.com](http://www.logansfuneralhome.com)

## LYNN STEPHENSON

Lynn Joseph Stephenson passed away at Health Sciences North, Sudbury, on Tuesday, July 14th, 2015. Age 76 years. Beloved husband of Dorothy May (Ritchie) Stephenson. Loving father of Deborah Lynn Dunlop (Kelly Berndt). Dear brother of Shirley and her husband Bill Norrie; Ron and his wife Adella; Bob and his wife Gerry; Ken and his wife Ruby; Karen and her husband Rodger Adams; and Gary and his wife Marj. Fondly remembered by his nieces, nephews, other relatives, and friends.

Resting in the **Logan Funeral Home**, 81 James Street, Parry Sound (705-746-5855), where friends will be received on Friday, July 17th, from 2:00 - 4:00 & 7:00 - 9:00 P.M. Funeral Service in the Logan Memorial Chapel on Saturday, July 18th, at 11:00 A.M. Interment Sylvan Acres Cemetery. Reception to follow.

As expressions of sympathy, donations to the Canadian Cancer Society, or the charity of your choice would be appreciated.

To send an on line condolence please visit [www.logansfuneralhome.com](http://www.logansfuneralhome.com)

## PUBLIC NOTICE

### Proposed By-laws

Notice is hereby given that the Council of The Corporation of the Township of Seguin intends to consider the following By-laws at the regular meeting of Council on Tuesday, August 4th, 2015 commencing at 4:30 p.m. in the Council Chambers located at the Township of Seguin Municipal Offices, 5 Humphrey Drive.

- By-law No. 2015-056, Being a By-law to regulate traffic and to govern and control parking - reduce speed limit on Horseshoe Lake Road.
- By-law No. 2015-057, Being a By-law to regulate Motor Vehicle Racing.

Copies of the proposed By-laws are available at the Township of Seguin Municipal Office free of charge. The proposed By-laws are also available on the Township's web site: [www.seguin.ca](http://www.seguin.ca) under the "Public Notices" Section.

Written comments will be received until 4:00 pm on July 27th, 2015 at the:

Township of Seguin Municipal Office  
5 Humphrey Drive  
Seguin, ON P2A 2W8  
Fax: 705-732-6347

## Notice of Study Completion and Final Draft Environmental Assessment Report

# NOTICE OF COMPLETION OF ENVIRONMENTAL REVIEW REPORT

## By Henvey Inlet Wind LP for a Transmission Line

**Name:** Henvey Inlet Wind Transmission Line

**Location:** District of Parry Sound, Ontario

**Description:** Henvey Inlet Wind LP (HIW), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, has undertaken an Environmental Review for the construction of a Transmission Line which will deliver electricity generated from the Henvey Inlet Wind Energy Centre (HIWEC), located on the Henvey Inlet First Nation Reserve No. 2 (HIFN I.R. #2), to the Ontario electricity grid. The proposed HIW Transmission Line is 86 km in length and travels south from HIFN I.R. #2, generally parallel to the future Highway 69/400 before diverting from Highway 69/400 to follow the existing 500 kV HONI Transmission Line System. This route connects to the HONI system at the 230 kV line southeast of Parry Sound. The HIW Transmission Line is subject to Ontario Regulation 116/01 and is subject to a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (the Guide) (January 2011).

### Report Available for Review and Comment:

The Final Environmental Review Report, identified as **Volume B**, has been completed for the Transmission Line and includes a review of existing conditions, potential effects, mitigation measures, stakeholder input and a description of consultation activities undertaken during the EA process. The results of the studies undertaken indicate that the Transmission Line will have no significant net environmental effects, during construction, operation or decommissioning. HIW intends to proceed with the Transmission Line, subject to the application of mitigation measures and obtaining the necessary approvals.

**The purpose of this Notice is to inform you that the Final ERR is now available for review and comment for 30 days from September 30, 2015 to October 30, 2015.**

The Final ERR is available on HIW's website ([www.henveyinletwind.com](http://www.henveyinletwind.com)) or in hard copy at the following locations:

#### Britt Public Library

841 Riverside Drive, Britt, ON

#### Town of Parry Sound Municipal Office

52 Seguin St, Parry Sound, ON

#### Henvey Inlet Wind Office

295 Pickerel River Road, Pickerel, ON

Note: the HIWEC associated with this Transmission Line is being studied under a different Environmental Assessment (EA) process. The Final Draft EA Report for the HIWEC (**Volume A**) and the assessment of the overlapping and cumulative effects associated with the Transmission Line and the HIWEC (**Volume C**) will also be available at the above review locations during the same period with the deadline for comments ending October 30, 2015. For more information, please visit [www.henveyinletwind.com](http://www.henveyinletwind.com).

### Contacts, Further Information and Elevation Requests:

All questions and comments should be sent to:

**Ken Noble**, Project Developer and/or

**Kim Sachtleben**, Project Developer

Email: [info@henveyinletwind.com](mailto:info@henveyinletwind.com)

Phone: 705.857.5265

Mail: Henvey Inlet Wind Office  
295 Pickerel River Road  
Pickerel, ON P0G 1J0

HIW is committed to engaging stakeholders throughout the development of the Transmission Line. If upon review of the Final ERR, an interested party has outstanding environmental concerns about the Transmission Line, they should be raised with HIW as soon as possible.

In the event that issues cannot be resolved, the concerned party may make a written request during the 30-day review and comment period to the Director of the Ministry of the Environment and Climate Change, Environmental Approvals Branch at the address noted below, to elevate the HIW Transmission Line to an Individual Environmental Assessment under the Ontario *Environmental Assessment Act* (1990). A copy of the elevation request must also be sent to HIW at the above-noted address.

**Sarah Paul**, Director

Environmental Approvals Branch

Ministry of the Environment and Climate Change

135 St. Clair Avenue West, 1<sup>st</sup> Floor

Toronto, Ontario M4V 1P5

**Elevation requests must be made in accordance with the provisions set out in the Guide and must be received by the Director of the Environmental Approvals Branch by October 30, 2015.** A copy of the Guide is available on the Government of Ontario website at: [www.ontario.ca/document/guide-environmental-assessment-requirements-electricity-projects](http://www.ontario.ca/document/guide-environmental-assessment-requirements-electricity-projects)

Notice Released: September 25, 2015
