

Western Spirit Wind

Pattern Energy owns and operates the Western Spirit Wind facility in Guadalupe, Lincoln and Torrance counties, New Mexico.

Meaningful Partnerships

We believe in acting as a good neighbor through long-term engagement and giving. Pattern Energy equally commits to listening to and respecting the landowners and communities that host our facilities through relationship building, open communication, and the reception of feedback. We encourage you to call or email our team to start a conversation.

Economic Investment

Represents an investment of over \$1.5 billion, helping the American west diversify generation sources, lower electricity prices, and reach its renewable energy goals.

Lasting Revenue

Provides nearly \$3 million per year in payment in lieu of tax revenues for the three counties and two school districts in the area.

Job Creation

Construction of Western Spirit Wind and its accompanying transmission line involved over 1,000 workers on-site over a 15-month period. Approximately 35 full-time, on-site personnel operate and maintain the facility. The number of workers on-site nearly doubles when supplemental maintenance needs arise. Pattern Energy prioritizes using local contractors and suppliers whenever possible.

Giving Back

Community Benefits Program supports the local causes through sponsorships and donations to the local community. Pattern Energy invested in the Tri-County Community Group, Community Foundation of Lincoln County and the Duran Mutual Domestic Heritage Society. All three provide support and local community giving.

About Wind Energy

Wind energy provides local and sustainable electricity to the nation's energy mix. Today's wind energy technologies deliver affordability and reliability, making wind an ideal energy source.

Western Spirit Wind represents the most wind power ever constructed as a single phase in the Americas. The sites utilize a total of 377 GE wind turbines ranging from 2.3 to 2.8 MW in size, totalling 1,050 MW of installed capacity. The combined sites' annual production is equal to the needs of more than 900,000 people. Power is sold through various power purchase arrangements to customers including San Jose Clean Energy and the Southern California Public Power Authority, which sells energy to the Los Angeles Department of Water and Power.

About Us

Pattern Energy is a leading renewable energy company. We develop, construct, own and operate high-quality wind, solar, transmission, and energy storage facilities. Our mission is to transition the world to renewable energy by sustainably developing and responsibly operating facilities safely and responsibly and respecting the environment, communities, and cultures where we have a presence.

Our approach begins and ends with establishing trust, accountability, and transparency. Our company values of creative spirit and energy, pride of ownership, follow-through, and a team-first attitude drive us to pursue our mission every day. Our culture supports our values by fostering innovative and critical thinking and a deep belief in living up to our promises.

Headquartered in the United States, Pattern has a global portfolio of more than 30 power facilities and transmission assets, serving various customers that provide low-cost clean energy to millions of consumers.
