

# North Kent Wind

North Kent Wind, located in the Municipality of Chatham-Kent, is a partnership between Pattern Canada, Samsung Renewable Energy, Bkejwanong First Nation (Walpole Island), and the Municipality of Chatham-Kent through its affiliate Entegrus Renewable Energy.

The 179 MW wind power facility uses 34 Ontario-made 3.2 MW wind turbines with Siemens blades manufactured in Tillsonburg and CS Wind towers built in Windsor using steel from the province. North Kent Wind commenced commercial operations in 2018 and sells 100% of its electrical output to the Independent Electricity System Operator (IESO).

## Good Neighbours Produce Meaningful Partnerships

We believe in acting as a good neighbour through long-term engagement and giving. North Kent Wind equally commits to listening and respecting the landowners and communities that host our facilities through relationship building, open communication, and the reception of feedback. We encourage you to call or email our team to start a conversation.

---

## Giving Back

The facility provided \$4 million to Chatham-Kent for a community benefits contribution and a substantial contribution to the Friends of the New Animal Shelter to support their efforts to build a new shelter.

---

## Long-Term Benefits

North Kent Wind brings economic benefits to the region, including approximately \$5 million over the first 20 years of operations in property taxes for the Municipality and local schools.

---

## Local Jobs

Workers from southwestern Ontario were involved in all aspects of construction, which concluded in 2018 and involved an average of 200 workers on-site. With the help of local contractors, 10 team members operate and

Bkejwanong First Nation (Walpole Island) is located near Wallaceburg, Ontario at the mouth of the St. Clair River. It encompasses six islands that have been occupied by the Ojibwe, Potawatomi and Odawa peoples for thousands of years. Walpole Island has never been set apart as a reserve, giving it the distinction of being unceded territory. The First Nation is committed to a sustainable future within its Traditional Territory, which includes being heavily involved in the renewable energy sector over the past decade. This has culminated in equity participation in four wind energy projects totaling 350 MW.

Entegrus Renewable Energy Inc. is a wholly-owned subsidiary of Entegrus Inc. that was incorporated to make investments in wind developments in the Municipality of Chatham-Kent on behalf of its shareholders. The Entegrus group of companies directly operates and maintains electricity distribution systems for over 58,000 customers in Southwestern Ontario and provides general administrative services, namely in the areas of customer care, billing, call center operations and collection services for companies focused on electricity supply, transmission and distribution, and water supply. Entegrus is committed to maintaining safe, reliable operations while providing high levels of service to its customers, partners and the communities it serves.

Pattern Canada is dedicated to the production of clean, renewable energy—by Canadians and for Canadians. As the country's largest operator of wind power with more than 1,800 MW of installed capacity, our team has brought ten wind facilities to operation across four provinces, including the largest First Nation wind project in the country. We are proud of our coast-to-coast Canadian roots and the results of our work in the country over the past decade. We look forward to providing lasting benefits to the communities, families, and workers involved in all our existing and future renewable energy facilities.

**SAMSUNG RENEWABLE ENERGY INC.**

Samsung Renewable Energy is creating clean, renewable energy for generations to come. Together with our partners, Samsung made a \$5 billion investment in Ontario to create the world's largest cluster of wind and solar power. Our investments have created 900 direct renewable energy manufacturing jobs and 9,000 highly skilled jobs in Ontario.

Samsung and its partners provided much-needed jobs in communities throughout Ontario, including manufacturing facilities in Windsor, Tillsonburg, Toronto and London. Built on Samsung C&T's commercial and technical expertise and the success of its renewable energy projects in several countries—including the United States and Europe—Samsung is creating real jobs, through real investment, benefitting real people.
