

# Phoenix Solar

Pattern Energy owns the Phoenix Solar facility in Fannin County, Texas.

## Meaningful Partnerships

We believe in acting as a good neighbor through long-term engagement and giving. Pattern Energy equally commits to listening and respecting the landowners and communities that host our facilities through relationship building, open communication, and the reception of feedback. We encourage you to call or email our team to start a conversation.

## Job Creation

Created approximately 200 jobs during construction in 2021, including equipment operators, electricians, laborers, and more.

## Giving Back

Supports the community by sponsoring local organizations, causes, and events, including the Fannin County Children's Center, Red River Hoops Association, County Fair, and the Bonham Chamber of Commerce.

## Lasting Revenue

Expects to generate \$13 million in new tax revenue for the Bonham Independent School District and \$4 million for Fannin County over its first 35 years of operations.

## Environmental Stewardship

Environmental experts performed a biological resource assessment to confirm the site did not have critical habitat for threatened or endangered species. Experts also reviewed historical and archaeological records and conducted field checks for cultural artifacts to avoid potential impacts.

## Harnessing the Sun

Solar energy provides local and sustainable electricity to the nation's energy mix. Today's solar technologies deliver affordability and reliability even during peak electricity demand, making solar an ideal energy source.

A 83 MWac solar energy facility, Phoenix Solar provides safe, affordable, and renewable electricity to power the needs of about 50,000 Texans yearly. The facility uses about 240,000 of First Solar's state-of-the-art panels designed with a focus on sustainability. Digital Realty has a 12-year power purchase agreement for most of the site's energy production. NovaSource operates and maintains the facility on Pattern Energy's behalf.

## About Us

Pattern Energy is a leading developer, operator and owner of renewable energy infrastructure projects and facilities across North America. Our mission is to transition the world to renewable energy through the sustainable development and responsible operation of facilities with respect for the environment, communities, and cultures where we have a presence.

Our approach begins and ends with establishing trust, accountability, and transparency. Our company values of creative spirit, pride of ownership, follow-through, and a team-first attitude drive us to pursue our mission every day. Our culture supports our values by fostering innovative and critical thinking and a deep belief in living up to our promises.

Headquartered in San Francisco, Pattern has a portfolio of power facilities and transmission assets producing and transporting nearly 6,000 MW of power across North America, serving various customers that provide low-cost clean energy to millions of consumers.
