

Stillwater Wind

Pattern Energy operates the Stillwater Wind facility in Stillwater County, Montana.

Meaningful Partnerships

We believe in acting as a good neighbor through long-term engagement and giving. Pattern Energy equally commits to listening and respecting the landowners and communities that host our projects through relationship building, open communication, and the reception of feedback. We encourage you to call or email our team to start a conversation.

Job Creation

During construction in 2018, utilized approximately 80 workers on-site, including equipment operators, electricians, laborers, and more. A team of approximately six permanent staff operate and maintain the facility, in addition to the use of local contractors.

Supporting the Community

Supporting communities where we have a presence is one of our core commitments. When the local school district discovered they could no longer use a 100-year-old elementary school, Stillwater Wind contributed funds to help replace the buildings and get the children back into their school.

Lasting Revenue

Provides local families with a new reliable income source through land leases. The facility makes significant contributions to local government and services through taxes and other funding commitments supporting programs such as education and public safety. Over the first 25 years of operations, the facility expects to generate more than \$18 million in tax payments and landowner royalties.

Harnessing the Wind

Wind energy provides local and sustainable electricity to the nation's energy mix. Today's wind energy technologies deliver affordability and reliability, making wind an ideal energy source.

The 80 MW facility uses 31 American-made Siemens Gamesa wind turbines comprised of five 2.3 MW turbines with 108-meter rotors and twenty-six 2.625 MW turbines with 120-meter rotors. The facility provides safe, affordable, and renewable electricity to power the needs of approximately 65,000 Americans yearly. The facility's output is sold to NorthWestern Energy through a 25-year power purchase agreement.

About Us

Pattern Energy is a leading developer, operator and owner of renewable energy infrastructure projects and facilities across North America. Our mission is to transition the world to renewable energy through the sustainable development and responsible operation of facilities with respect for the environment, communities, and cultures where we have a presence.

Our approach begins and ends with establishing trust, accountability, and transparency. Our company values of creative spirit, pride of ownership, follow-through, and a team-first attitude drive us to pursue our mission every day. Our culture supports our values by fostering innovative and critical thinking and a deep belief in living up to our promises.

Headquartered in San Francisco, Pattern has a portfolio of power facilities and transmission assets producing and transporting nearly 6,000 MW of power across North America, serving various customers that provide low-cost clean energy to millions of consumers.
