

# SunZia Wind Construction Activity Announcement

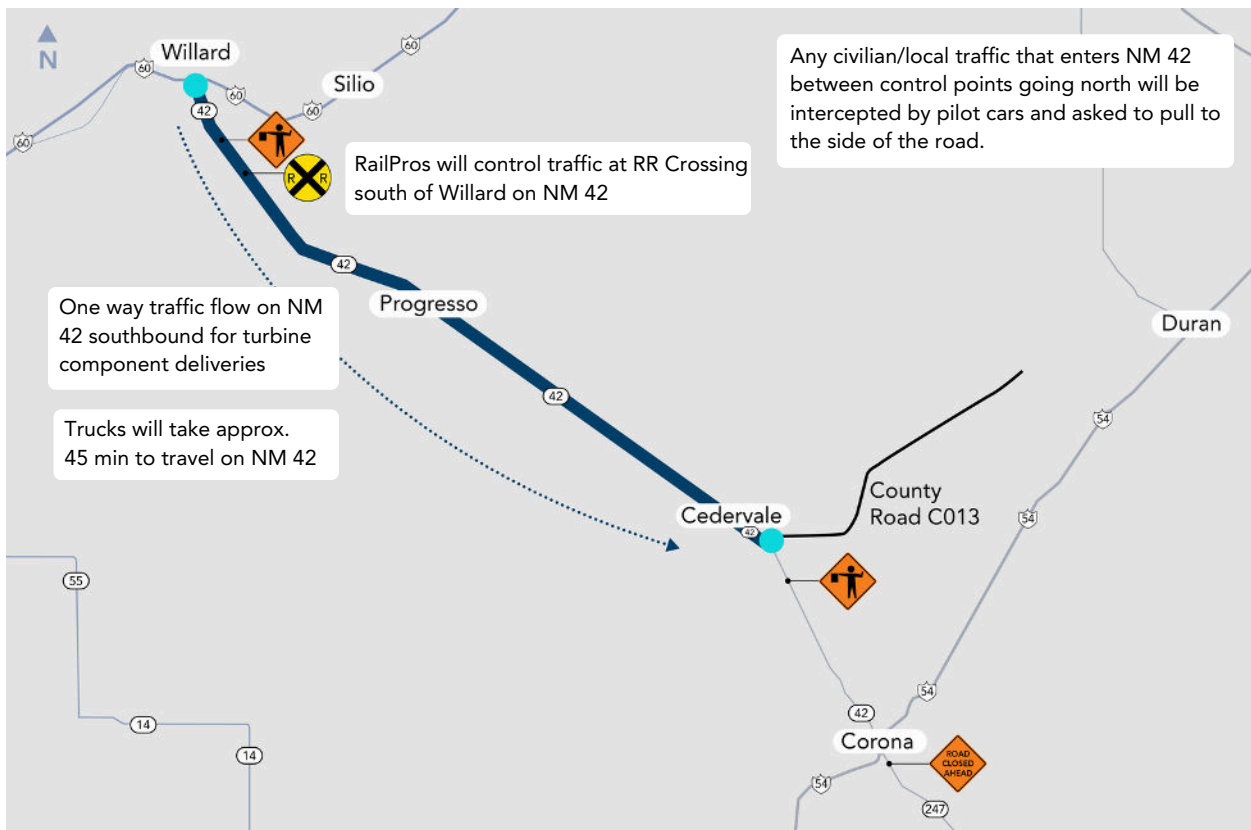

SunZia Wind will begin receiving wind turbine component deliveries on Monday, July 8, 2024, in Torrance and Lincoln Counties. The main delivery route will be along HWY 42, stretching from Willard to Corona.

To facilitate the delivery process, HWY 42 southbound traffic from Willard to Corona will be one-way, while northbound traffic from Corona to Willard will be halted during turbine deliveries, as per the NMDOT permit for oversized delivery vehicles.

Expect the presence of delivery vehicles from 7 a.m. to 4 p.m. Monday through Friday, and occasionally on Saturdays. Traffic stoppages on HWY 42 northbound will last approximately 60 – 75 minutes.

Turbine deliveries are anticipated to conclude by October 2024. Pattern Energy will continue to provide timely updates on construction activities.

We truly appreciate the community's patience and cooperation during this period.
