

# Heritage Prairie Renewable

Heritage Prairie Renewable is a wind and solar development jointly developed by Pattern Energy and Repsol Renewables. The Heritage Prairie Wind project will be located in western Kankakee County and northeastern Livingston County. The Heritage Prairie Solar project will be located east of the Village of Essex in Kankakee County.

## Meaningful Partnerships

We believe in acting as a good neighbor through long-term engagement and giving. Pattern Energy and Repsol Renewables commit to listening to and respecting the landowners and communities that host our projects through relationship building, open communication, and the reception of feedback. We encourage you to call or email our team to start a conversation.

## Economic Investment

Represents a private investment of over \$1.75 billion, bringing widespread economic benefits to the community.

.....

## Job Creation

Creates hundreds of wind and solar construction jobs, including equipment operators, electricians, laborers, and more. We prioritize hiring locally when possible. Once operational, permanent staff will operate and maintain the wind and solar facilities.

.....

## Business Opportunities

Creates millions of dollars of opportunity for local businesses to provide materials and services.

.....

## Lasting Revenue

Expected to provide over \$235 million to local communities over the facility's projected life. The stable, long-term funding will contribute to education, community services, roads, and first responder capabilities. Land leases will also provide local families with a new reliable income source.

## Harnessing the Power of the Wind and Sun

Wind and solar energy provide local and sustainable electricity to the nation's energy mix. Today's energy technologies deliver affordability and reliability during peak electricity demand, making wind and solar ideal energy sources.

Designed as a ~600 MW wind energy facility and 300 MW solar energy facility, Heritage Prairie Renewable will provide safe, affordable, and renewable electricity to power the needs of approximately 265,000 homes yearly.

We estimate construction will begin in 2025 with a goal of achieving commercial operation in 2027.

## About Repsol Renewables

We are a global multi-energy company present throughout the energy value chain. We employ more than 24,000 people worldwide and our products are sold in nearly 100 countries, reaching around 24 million customers.

Repsol Renewables North America is wholly owned by Repsol, a global multi-energy company that leads the energy transition and has a goal of net zero emissions by 2050. Repsol entered the U.S. renewable energy market in 2021. Today, we operate 800 MW of renewable energy capacity in the U.S. and aim to have an installed capacity of more than 3 GW of renewable energy in North America by 2027.

## About Pattern Energy

Pattern Energy is a leading developer, operator and owner of renewable energy infrastructure projects and facilities across North America. Our mission is to transition the world to renewable energy through the sustainable development and responsible operation of facilities with respect for the environment, communities, and cultures where we have a presence.

Our approach begins and ends with establishing trust, accountability, and transparency. Our company values of creative spirit, pride of ownership, follow-through, and a team-first attitude drive us to pursue our mission every day. Our culture supports our values by fostering innovative and critical thinking and a deep belief in living up to our promises.

Headquartered in San Francisco, Pattern has a portfolio of power facilities and transmission assets producing and transporting nearly 6,000 MW of power across North America, serving various customers that provide low-cost clean energy to millions of consumers.
